ELT Activities for Young Learners Aged 6-12 Cambridge University Press  
Teaching Young Learners to Think offers 80 activities with photocopiable worksheets and easy-to-follow teacher's notes. Herbert Puchta, author of a wide range of innovative teaching materials, and Marion Williams, well-known for her book *Psychology for Language Teachers*, have developed specifically designed tasks that develop children's foreign language competence while promoting the basic thinking skills they will need as they grow older. Teachers will enjoy using the motivating tasks that have been carefully devised to match the language level of EFL learners. Students will enjoy the fun of the thinking challenges these activities offer.

In *Writing Without Teachers*, well-known advocate of innovative teaching methods Peter Elbow outlines a practical program for learning how to write. His approach is especially helpful to people who get "stuck" or blocked in their writing, and is equally useful for writing fiction, poetry, and essays, as well as reports, lectures, and memos. The core of Elbow's thinking is a challenge against traditional writing methods. Instead of editing and outlining material in the initial steps of the writing process, Elbow celebrates non-stop or free uncensored writing, without editorial checkpoints first, followed much later by the editorial process. This approach turns the focus towards encouraging ways of developing confidence and inspiration through free writing, multiple drafts, diaries, and notes. Elbow guides the reader through his metaphor of writing as "cooking:" his term for heating up the creative process

where the subconscious bubbles up to the surface and the writing gets good. 1998 marks the twenty-fifth anniversary of *Writing Without Teachers*. In this edition, Elbow reexamines his program and the subsequent influence his techniques have had on writers, students, and teachers. This invaluable guide will benefit anyone, whether in the classroom, boardroom, or living room, who has ever had trouble writing.

You've probably heard the advice "put on your own oxygen mask before assisting others." This is true both in airplanes and in classrooms—you have to take care of yourself before you can help someone else. If teachers are stressed out and exhausted, how can they have the patience, positive energy, and enthusiasm to provide the best instruction for students? Author Mike Anderson asked that question as a teacher himself, and the answers he found form the basis of *The Well-Balanced Teacher*. He found that teachers need to take care of themselves in five key areas to keep themselves in shape to care for their students. In addition to paying proper attention to their basic needs for nutrition, hydration, sleep, exercise, and emotional and spiritual refreshment, teachers also need Belonging: Teachers need to feel positive connections with other people, both in school and outside school. Significance: Teachers want to know that they make a positive difference through the work they do.

Positive engagement: When teachers enjoy their work, they have great energy and passion for their teaching. Balance: Healthy teachers set boundaries and create routines so that they can have rich lives both in the classroom and at home. Anderson devotes a chapter to each of these needs, describing in frank detail his own struggles and offering a multitude of practical tips to help readers find solutions that will work for them. When teachers find ways to take care of their own needs, they will be healthier and happier, and they will have the positive energy and stamina needed to help their students learn and grow into healthy adults themselves.
