Ansul Kitchen Suppression System - Authorised Ansul ...

The R-102 system is cooking equipment friendly and offered in two designs: Appliance-Specific and Overlapping. The appliance-specific design aims the nozzles at the specific hazard areas of each appliance. With the overlapping design, the nozzles are arranged to overlap and provide a "fire-free zone" throughout a group of appliances. As an authorised distributor we offer installation, servicing, repair and upgrading of all Ansul kitchen suppression systems.

Kitchen Knight Suppression System Installation

This manual is intended for use with PYRO-CHEM KITCHEN KNIGHT II Restaurant Fire Suppression Systems. Those who install, operate, recharge, or maintain these fire suppression systems should read this entire manual. Specific sections will be of particular interest depending upon one's responsibilities.

DESIGN, INSTALLATION, RECHARGE, AND MAINTENANCE MANUAL

Watermist systems can be used for kitchens and can be a more cost-effective solution to Ansul systems and other water chemical systems. However, careful design is needed and approval from insurers. It's important to remember that unapproved companies cannot install or even source Ansul fire suppression equipment, so you must ensure the company you deal with are fully approved.

KITCHEN KNIGHT II Restaurant Fire Suppression System

The KITCHEN KNIGHT II Restaurant Kitchen Fire Suppression System is a pre-engineered solution to appliance and ventilating hood and duct grease fires. The system is designed to maximize hazard protection, reliability, and installation efficiency. Automatic or manual system activation releases a throttle discharge of potassium carbonate solution on the protected area in the form of fine droplets to suppress the fire and help prevent re-ignition after the discharge is complete.

Kitchen Knight Suppression System Installation Manual

Once a fire has been detected, we use one of the many suppression agents such as Inert gas (IG55), INERGEN® Clean Chemical Agents (FE-227, FM200 or Novec 1230), CO2, Wet Chemical Agents (Kitchen Knight II and Kitchen Mister) or Dry Powder to suppress the fire by removing one of the three elements of the fire triangle.
