The Hard Truth About Soft Skills Princeton University Press

In addressing environmental challenges like climate change, governments, charities and business tend to focus either on changing policy or business practice, or on urging individuals to adopt different behaviour. The role of human identity is largely absent from the debate. And yet, our identities - who we see ourselves as being - have a profound impact in shaping the responses we make to environmental challenges. This provocative book will rattle the cages of many environmentalists, 'green-minded' business-people and policy makers. In it, Crompton and Kasser suggest that many current approaches to addressing problems like climate change may actually inadvertently serve to reinforce those aspects of identity that drive us towards unsustainable behaviour in first place. They suggest that it will only be by re-shaping political debate and social institutions in order to promote more helpful aspects of identity that we can have any hope of

meeting environmental challenges. The book closes by highlighting the opportunities that this perspective presents for building new alliances between people working not just on environmental issues, but also on a range of social and developmental concerns: Many of those aspects of human identity that frustrate progress on the environmental agenda also frustrate progress on meeting other challenges.

The Rocky Road To Democracy Larousse Kingfisher Chambers

In all major regions of the world, the economic recession is deep-seated, resulting in mass

unemployment, the collapse of state social programs and the impoverishment of millions of people. The meltdown of financial markets was the result of institutionalized fraud and financial manipulation. The economic crisis is accompanied by a worldwide process of militarization, a "war without borders" led by the U.S. and its NATO allies. This book takes the reader through the corridors of the Federal Reserve, into the plush corporate boardrooms on Wall Street where far-reaching financial transactions are routinely undertaken. Each of the authors in this timely collection digs beneath the gilded surface to reveal a complex web of deceit and media distortion which serves to conceal the workings of the global economic system and its devastating impacts on people's lives.

Traditionally, legal problems arising in connection with international business transactions had to be solved by a national law. This view was challenged in post war scholarly writing and transnational practice. It was argued that transnational rules (such as transnational contracts, general conditions, trade usages, general principles, uniform rules, arbitral cases) should be applied instead. Often, these transnational rules are referred to as *lex mercatoria*. This volume analyzes the different legal approaches to international business problems (including the theory of *lex mercatoria*) as well as their implications for international practice. As such, the relevance and importance of substantive law and conflict of laws and of national, international and transnational rules are discussed both with regard to their application by national courts and by international commercial arbitrators.

When it was first published in the author's native country, THE PALACE OF DREAMS was immediately banned. The novel revolves around a secret ministry whose task is not just to spy on its citizens, but to collect and interpret their dreams. An entire nation's unconscious is thus tapped and meticulously laid bare in the form of images and symbols of the dreaming mind.

Access to high quality abortion care is essential to women's health, as evidenced by the dramatic decrease in pregnancy-related morbidity and mortality since the legalization of abortion in the

United States, and by high rates of maternal death and complications in those countries where abortion is still provided under unsafe conditions. The past two decades have brought important advances in abortion care as well as increasing cross-disciplinary use of abortion technologies in women's health care. Abortion is an important option for pregnant women who have serious medical conditions or fetal abnormalities, and fetal reduction techniques are now well-integrated into infertility treatment to reduce the risks of multiple pregnancies resulting from assisted reproductive technologies. Management of Unintended and Abnormal Pregnancy: Comprehensive Abortion Care is the textbook of the National Abortion Federation, and serves as the standard, evidence-based reference text in abortion care. This state-of-the-art textbook provides a comprehensive overview of the public health implications of unsafe abortion and reviews the best surgical and medical practices for pregnancy termination, as well as managing ectopic and other abnormal pregnancies. Management of Unintended and Abnormal Pregnancy: Comprehensive Abortion Care is the leading source for a comprehensive understanding of issues related to unintended and abnormal pregnancy. This textbook: is authored by internationally-known leaders in women's health care; addresses unintended pregnancy and abortion from historical, legal, public health, clinical, and quality care perspectives; includes chapters on pregnancy loss, ectopic pregnancy, gestational trophoblastic disease, and multifetal pregnancy reduction; covers treatment of pregnancies in the first and second trimester by both medical and surgical techniques; and provides resources for clinical, scientific, and social support for the abortion provider and patient.

Upon her arrival in Tirana, Albania, in April 1994, the author found a city unlike any other she had experienced. Rotting trash was piled in the center of the streets, animals shared the rutted roads with cars, and housing, when it could be found, was crowded and crumbling. But she found a people full of optimism, particularly the women. Despite the subservient role forced by tradition on nearly all Albanian women, they have increasingly become the foundation upon which the country exists. Not only are they responsible for caring for extended households, these women are now also becoming vital parts of the country's economy. Most importantly, however, they maintain a faith in Albania that belies the country's turbulent past and widely predicted future. Through interviews with over 200 Albanian women, this work is an insightful, often poignant, look at a country that remains a mystery to most in the West.

Digital citizenship competences define how we act and interact online. They comprise the values, attitudes, skills and knowledge and critical understanding necessary to responsibly navigate the constantly evolving digital world, and to shape technology to meet our own needs rather than to be shaped by it. The Digital citizenship education handbook offers information, tools and good practice to support the development of these competences in keeping with the Council of Europe's vocation to empower and protect children, enabling them to live together as equals in today's culturally diverse democratic societies, both on- and offline. The Digital citizenship education handbook is intended for teachers and parents, education decision makers and platform providers alike. It describes in depth the multiple dimensions that make up each of 10 digital citizenship

domains, and includes a fact sheet on each domain providing ideas, good practice and further references to support educators in building the competences that will stand children in good stead when they are confronted with the challenges of tomorrow's digital world. The Digital citizenship education handbook is consistent with the Council of Europe's Reference Framework of Competences for Democratic Culture and compatible for use with the Internet literacy handbook. (Box of 25 sheets)

"THE CODE OF LEKE DUKAGJINI is a great cultural treasure, comparable to the chapters of The Old Testament." "It provides deep insights into the ancient society of the Albanians, their somber dignity & their magnificent sense of honor."--David Binder, The New York Times. "This legal system was established & passed on to future generations as a common law by Leke Dukagjini, a co-fighter of the legendary Skenderbeg." "The 'Besa' or the 'word of honor' as stated in THE CODE OF LEKE DUKAGJINI which means peace & protection to those whom it is given, has become today an important fighting tool in the political struggle of Kosovo's Albanians against Serb oppression."--Victor Meier, The Frankfurter Allgemeine Zeitung. "The legal Code of the Albanians known by them for a thousand years, is one of the most original in the history of mankind. Among the basic pillars of this code are the equality of men before the code & the non-abuse of justice." "The entire essence of the legal code of the Albanians is an unparalleled rigorous respect for this basic principle: non-violation of the dignity of a man- his honor, home, & life."--Ismail Kadare, Albanian writer.

What is national identity? What are the main challenges posed to national identity by the strengthening of regional identities and the growth of cultural diversity? How is right-wing nationalism connected to the desire to preserve a traditional image of national identity? Can we forge a new kind of national identity that responds to the challenges of globalization and other deep-seated changes? In this important new book, Montserrat Guibernau answers these and other compelling questions about the future of national identity. For Guibernau, the nation-states traditional project to unify its otherwise diverse population by generating a shared sense of national identity among them was always contested, and was accomplished with various degrees of success in Europe and North America. Such processes involved the cultural and linguistic homogenization of an otherwise diverse citizenry and were pursued by different means according to the specific contexts within which they were applied. At present, the impact of strong structural socio-political and economic transformations has resulted in greater challenges being posed to the idea that all citizens of a state should share a homogeneous national identity. Diversity is increasing, and plans for further European integration contain the potential to generate significant tensions, casting greater doubt on the classical concept of national identity. As a result, we are faced with a set of new dilemmas concerning the way in which national identity is constructed and defined. The book offers a theoretical as well as a comparative approach, with case studies involving Austria, Britain, Canada and Spain, as well as the European Union and the United States of America. The Identity of Nations will be essential reading for advanced students and professional scholars in sociology, politics and international relations.

A New York Review Books Original Hav is like no place on earth. Rumored to be the site of Troy, captured during the crusades and recaptured by Saladin, visited by Tolstoy, Hitler, Grace Kelly, and Princess Diana, this Mediterranean city-state is home to several architectural marvels and an annual rooftop race that is a feat of athleticism and insanity. As Jan Morris guides us through the corridors and quarters of Hav, we hear the mingling of Italian, Russian, and Arabic in its markets, delight in its famous snow raspberries, and meet the denizens of its casinos and cafés. When Morris published Last Letters from Hav in 1985, it was short-listed for the Booker Prize. Here it is joined by Hav of the Myrmidons, a sequel that brings the story up-to-date. Twenty-first-century Hav is nearly unrecognizable. Sanitized and monetized, it is ruled by a group of fanatics who have rewritten its history to reflect their own blinkered view of the past. Morris's only novel is dazzlingly sui-generis, part erudite travel memoir, part speculative fiction, part cautionary political tale. It transports the reader to an extraordinary place that never was, but could well be.
