EVERYONE HAS TO COME OUT IN THE OPEN EVENTUALLY. A mysterious sniper is killing random New York City citizens every day at the same time. Detective Joe Bannon and his partner Hannah Trimble follow the breadcrumb trail of clues down repeated blind alleys. With citizens fearing to venture outside, the streets of Manhattan have become nearly deserted. When the sniper begins escalating the profile of his targets, higher level government agencies are pulled in. But the shooter always seems to be one step ahead of the law and slips away whenever the authorities get close. As copycat killings begin spreading to other cities across the U.S., the President hatches a dangerous plan to trap the killer. Can Joe and Hannah catch the assassin before he executes the most closely guarded man in history?

Video Shooter is a guide to both the mechanics of the video camera and the craft of shooting. Written by a veteran in the industry and utilizing an engaging, conversational style (including illustrative anecdotes from the author's many years of experience), the book takes the reader beyond "button pushing" to teach the complete range of skills required to capture compelling images. Topics include equipment selection, camera setup and

operation, shooting techniques, and working with lighting and audio. Although the techniques illustrated in Video Shooter are appropriate for users of a wide range of camera models, the book focuses on the most popular 3-CCD DV and HDV cameras. A chapter on issues and techniques relating to DVD output makes the book especially suitable for industrial, educational, and government video producers. The book also features a companion DVD with tutorials, footage demonstrating storytelling techniques, and technical matter such as a comparison of various filters.
