You're only a startup CEO once. Do it well with Startup CEO, a "master class in building a business." —Dick Costolo, Former CEO, Twitter Being a startup CEO is a job like no other: it's difficult, risky, stressful, lonely, and often learned through trial and error. As a startup CEO seeing things for the first time, you're likely to make mistakes, fail, get things wrong, and feel like you

don't have any control over outcomes. Author Matt Blumberg has been there, and in *Startup CEO* he shares his experience, mistakes, and lessons learned as he guided Return Path from a handful of employees and no revenues to over \$100 million in revenues and 500 employees. *Startup CEO* is not a memoir of Return Path's 20-year journey but a thoughtful CEO-focused book that provides first-time CEOs with advice, tools, and approaches for the situations that startup CEOs will face. You'll learn: How to tell your story to new hires, investors, and customers for greater alignment How to create a values-based culture for speed and engagement How to create business and personal operating systems so that you can balance your life and grow your company at the same time How to develop, lead, and leverage your board of directors for greater impact How to ensure that your company is bought, not sold, when you exit *Startup CEO* is the field guide every CEO needs throughout the growth of their company.

This study examines the contributing factors to different turnovers of chief financial officers (CFOs) and the implication of these CFO turnovers on firm operating performance, accounting information quality and management forecast accuracy. The performance-turnover relation is examined under a more refined turnover classification, which considers organizational commitment and job satisfaction, the two most common determinants of employee turnovers shown in the psychology

literature. By studying 1,182 CFO turnovers during 2002 to 2012, I find the CFO performance-turnover relation varies significantly across different turnover categories. As anticipated, no turnover-performance relation is observed among CFO turnovers due to non-work responsibilities. However, better performance does not translate into higher likelihood of promotions. Furthermore, while under-performing CFOs are more likely to be replaced involuntarily, these disciplinary turnovers trigger limited or no subsequent improvements in firm performance. Finally, voluntary CFO turnovers are followed by significant deterioration in accounting reporting quality, with no concurrent changes in real firm activities. These turnovers reflect accounting policy changes, which should be analyzed and accounted for when conducting future firm valuations.
