A Vedic Concordance is a monumental work by the famous American Sanskritist Maurice Bloomfield planned prepared and published during the years 1892-1906. It affords primarily an easy and ready means of ascertaining the following things: First where a given mantra occurs if it occurs but once second whether it occurs elsewhere either with or without variants and in what

places and third if it occurs with variants what those variants are. One hundred and nineteen texts in all have been drawn upon for contributions to the concordance comprising .The concordance also includes a very considerable amount of material not yet published. The concordance may also be readily put to certain indirect or secondary uses which are scarcely less important for the systematic progress of vedic study.

As global capitalism expands and reaches ever-further corners of the world, practical problems continue to escalate and repercussions become increasingly serious and irreversible. These practical problems carry with them equally important and ethical issues. Global Ethics and Environment explores these ethical issues from a range of perspectives and using a wide

range of case studies. Chapters focus on: the impact of development in new industrial regions; the ethical relationship between human and non-human nature; the application of ethics in different cultural and institutional contexts; environmental injustice in the location of hazardous materials and processes; the ethics of the impact of a single event (Chernobyl) on the global community; the ethics of transitional institutions. This collection will both stimulate debate and provide an excellent resource for wide-ranging case study material and solid academic context.

In *The Myth of Persecution*, Candida Moss, a leading expert on early Christianity, reveals how the early church exaggerated, invented, and forged stories of Christian martyrs and how the dangerous legacy of a martyrdom complex is employed today to silence dissent and galvanize a new generation of culture warriors. According to cherished church tradition and popular belief, before the Emperor Constantine made Christianity legal in the fourth century, early Christians were systematically persecuted by a brutal Roman Empire intent on their destruction. As the story goes, vast numbers of believers were thrown to the lions, tortured, or burned alive because they refused to renounce Christ. These saints, Christianity's inspirational heroes, are still venerated today. Moss, however, exposes that the "Age of Martyrs" is a fiction—there was no sustained 300-year-long effort by the Romans to persecute Christians. Instead, these stories were pious exaggerations; highly stylized rewritings of Jewish, Greek, and Roman noble death traditions; and even forgeries designed to marginalize heretics, inspire the faithful, and fund

churches. The traditional story of persecution is still taught in Sunday school classes, celebrated in sermons, and employed by church leaders, politicians, and media pundits who insist that Christians were—and always will be—persecuted by a hostile, secular world. While violence against Christians does occur in select parts of the world today, the rhetoric of persecution is both misleading and rooted in an inaccurate history of the early church. Moss urges modern Christians to abandon the conspiratorial assumption that the world is out to get Christians and, rather, embrace the consolation, moral instruction, and spiritual guidance that these martyrdom stories provide.

For the banyan tree called Hindu religion, Vedas are the base roots and the Shanmata are the air roots. Hence it can be inferred that the six principles holding the Hinduism are all equal in all respects. Only those who comprehend this, can understand Hinduism in its entirety - Gaanapatyam, Koumaaram, Shaivam, Vaishnavam, Souram and Shaaktam as separate an integrated entity. Krajina ("borderland"), the Habsburg Military Frontier, was once the name of a string of territories which provided an essential link in the chain defending Europe from the Ottoman onslaught in the 16th and 17th centuries. For many generations the Serbian population of these regions was periodically decimated by

warfare in the service of the Austrian Emperor. In 1941-1945 the Serbs were subject to a genocidal attack after the Germans put the Croatian Usta movement in power in Zagreb. Their resistance to this slaughter and the ensuing epic struggle is the story both of the royalist etniks and of their bitter rivals for post-war power, Communist-led Partisans. The history of the Krajina Serbs, ending in the mass exodus of 1995, is an element in the story of most of the great wars in Europe, from the Ottoman offensives after the fall of Constantinople to the last decade of the twentieth century.

Excerpts from the interview of Padamshree Dr. Vijay Bhaskar: "As I am a scientist; while thinking about the Naadi palm leaves, my entire focal point was the computational aspect of it. How do the Maharishis know in advance the names and other information about the native? After an in-depth study, I conclude: if the supercomputers of ten years from today compute this information, it will take 10,00,00,00,00,00,00,00,00,000 calculations to collect information of one native. Simply putting, it is mathematically impossible. In the terms of computer science, this is referred to as the NP complete problem." Here is sample how the name of a person appears in the leaf:
