Statistics are everywhere. Their power and their undoubted efficacy in many areas have given rise to faith in measurement and metrics. More of them will tell us all that we need to know. Their use carries with it a number of presuppositions: that reality can be satisfactorily represented and that it can be controlled or the risks managed. The papers in this book interpret the ethics and aesthetics of statistics in terms of representation, visualisation and accessibility, focus on the appeal of 'simplicity', of technical languages, numbers, diagrams and

pictures, and pay attention to their connection with action plans. The book explores what has made educational researchers dependent on statistics, and deals with their use in areas such as the prevalence of maltreatment of children, European citizenship, well-being and happiness, illegal migrants, and university expansion. There is discussion of how the quest for more and better statistics finds its voice in policy initiatives that become slogans, and how public opinion polls are used to rationalise political decision-making. Can a more limited and modest use be made of statistics which does not deflect attention away from education's core business and which does not destroy the local practical knowledge that on which good education is based? 'Smeyers and Depaepe continue to bring together a

significant international group of educational philosophers and historians on topics of importance to researchers. This fifth volume in their series takes up the 'gold standard' use of statistics in case studies not contributed elsewhere. I highly recommend this text to counter a current over-emphasis on technique in research methodology. Use of statistics remains but herein under new, insightful conceptualizations.' Lynda Stone, Philosophy of Education, University of North Carolina at Chapel Hill, USA 'Once again, Depaepe and Smeyers succeeded in bringing together distinguished international and cross-disciplinary scholars exploring very timely and critical issues in current educational research. This is a groundbreaking book on a theme that can't be ignored by educational

researchers and those interested in a better understanding of the culture of science and science as culture. Moreover, the present book instigates to study history of educational research, a limited but developing field, and invites reflection to those who are sometimes too reliant on number crunching as a mode of interpretation and rather credulous in the acceptance of institutional records. The most comprehensive account of Georges Simenon's life and work in either English or French--from his youth and adolescence in Belgium, through his spirited beginnings as a writer of pulp fiction in the Paris of the 20s, his invention of Maigret in 1930, his turn to straight fiction in the 30s, and from the 40s on, his prolific output of detective and straight fiction. His obsession with women and his major friendships (Jean Renoir, Charlie Chaplin, Thornton Wilder, and others) are detailed. Also, critical evaluations of his fiction (including the largely ignored pulp fiction), Simenon's relationship to popular traditions, literature, detective fiction, high literature and the critics are offered. The photographs are rare and revealing (e.g., with Josephine Baker, cutting up in a bistro.)

"Jean Gabin was more than just a star of iconic movies. To many, he was France itself. This biography traces his involvement in the réalisme poétique and film noir movements of the 1930s and 1940s, his Hollywood years, his role in the World War II liberation of France, his affairs and his real-life role as a farmer"--*An Annotated Guide to Novels in Series*

This book captures the intensity of the relationship between writers and their typewriters from the 1880s, when the machine was first commercialized, to the 1980s, when word-processing superseded it. Drawing on examples from the United States, Britain, Europe, and Australia, *The Typewriter Century* focuses on "celebrity writers," including Henry James, Jack Kerouac, Agatha Christie, Georges Simenon, and Erle Stanley Gardner, who wrote prolifically and mechanically, developing routines in which typing, handwriting, and dictation were each allotted important functions. The typewriter de-personalized the text; the office typewriter bureaucratized it. At the same time, some authors found a new and disturbing distance between themselves and their compositions while others believed the typewriter facilitated spontaneous and automatic typing. *The Typewriter Century* provides a cultural history of the typewriter, outlining the ways in which it can be considered an agent of change as well as demonstrating how it influenced all writers, canonical and otherwise.

"This book examines the importance of social class and social change in the Maigret stories, with a particular emphasis on the early formative novels, and the development of plot, characterization and settings. The work seeks to establish the extent to which Simenon's portrait of French society is historically accurate"--*Maigret et le client du samedi ; Maigret et le clochard ; La Colère de Maigret ; Maigret et le fantôme ; Maigret se défend ; La Patience de Maigret ; Maigret et l'affaire Nahour ; Le Voleur de Maigret ; Maigret à Vichy* Penguin

There is little hope of reconstructing by means of comparative or typological studies a lingua adamica essentially different from present-day languages. The distant preverbal past is however still present in live speech. Phonetic, syntactic and semantic rule transgressions, far from being products of a deficient output, are governed by a universal iconic apparatus, a sort of 'anti-grammar' or 'proto-grammar' which enables the speaker and the poet to express preconscious and

subconscious mental contents that could not be conveyed by means of the grammar of any language. Secondary messages, generated by the proto-grammar are integrated into the primary grammatical message. The two messages whose structural and semantic divergence represents a chronological distance of hundreds of thousands of years, constitute a dialectic unity which characterize natural languages. The evolutive approach offers a different, perhaps better understanding of questions related to dynamic synchrony, vocal and verbal style, poetic language, language change. Chapters on: Diversity of the lexicon; Dual encoding: vocal style; Syntactic gesturing; Syntactic regressions; Prosodic expression of emotions; Poetry and vocal art; Situation and meaning; A hidden presence: verbal magic; Playing with language: joke and metaphor; Metaphor: a research instrument; Dynamics of poetic language; Semantic structure of possessive constructions; Semantic structure of punctuation marks; Why gestures?; Between acts and words; Language within language: dynamics, change and evolution.

"One of the greatest writers of the twentieth century . . . Simenon was unequalled at making us look inside, though the ability was masked by his brilliance at absorbing us obsessively in his stories." —The Guardian
When a beggar is pulled from the River Seine, having been badly beaten, Inspector Maigret must investigate the man to uncover his attacker. While sleeping under the Pont Marie bridge, a homeless man known as Doc is viciously beaten and thrown into the River Seine to drown. A pair of bargemen manage to rescue him, and his identification reveals he was once a doctor in Mulhouse, where, coincidentally, Inspector Maigret's sister-in-law lives. Seizing on this connection, Maigret must delve into the man's personal circumstances to figure out just who might have wanted him dead—and why. A fascinating, fast-paced story about the past lives we try to leave behind, and the ways in which they return, Maigret and the Tramp is a riveting mystery from Georges Simenon.

Quand le passé ressurgit... - A Paris, à la hauteur du pont Marie, une nuit de mars, deux bateliers tirent de la Seine un clochard grièvement blessé. Quand le passé ressurgit... A Paris, à la hauteur du pont Marie, une nuit de mars, deux bateliers tirent de la Seine un clochard grièvement blessé. L'un d'eux, le jeune Van Houtte, affirme avoir noté la présence d'une Peugeot 403 rouge sur le quai, peu de temps avant le drame. Maigret retrouve les occupants de la voiture, mais ceux-ci parviennent à prouver leur innocence. L'identification du clochard ne va pas sans surprises : il s'agit d'un ancien médecin du nom de François Keller qui, n'ayant pu concilier son idéalisme avec la mentalité bourgeoise de sa femme et de son milieu, a rompu tout lien avec la société et s'est installé dans le monde marginal de la " cloche ". Adapté pour la télévision en 1982, dans par Louis Gros-pierre, avec Jean Richard (Commissaire Maigret), Daniel Gélin (François Keller), Annick Tanguy (Mme Maigret) et en 2004, par Laurent Heynemann, avec Bruno Cremer (Commissaire Maigret).
