Television Studies: The Basics

McNae's Essential Law for Journalists

ANGELICA HILLARYRecent Advances and Lessons from Practice The Stationery Office

Television Studies: The Basics is a lively introduction to the study of a powerful medium. It examines the major theories and debates surrounding production and reception over the years and considers both the role and future of television. Topics covered include: broadcasting history and technology institutions and ownership genre and content audiences Complete with global case studies, questions for discussion, and suggestions for further reading, this is an invaluable and engaging resource for those interested in how to study television.

What's the Point of Ofcom? Routledge

Just how bad is television? Drawing on a range of theoretical sources including Husserl Lacan, Lefebvre, Sartre, Schutz and Adam Smith, this book takes a phenomenological approach to the small screen to offer an original sociological approach to television and its contribution to moral culture of late modern societies.

The Parliamentary Debates (Hansard). Routledge

Media law is a fast-developing area of scholarship that raises many high-profile and controversial questions. Recent issues include the use of privacy injunctions, the regulation of the press, the political power of media moguls, mass leaks of government information, and the responsibility of the digital media to prevent the spread of extreme content and fake news. This study looks at these issues and the key debates in media law. The book includes chapters examining the protection of personal rights to reputation and privacy, the administration of justice, the role of government censorship, the protection of the newsgathering process, the regulation of the media and the impact of digital communications. The analysis is grounded in an account of media freedom that looks at the important democratic functions performed by the media and journalism. Examining various key themes, this study shows how those functions continue to evolve in a changing political culture and also how the media are subject to a range of legal and informal constraints. The book asks whether the law strikes the right balance in protecting media freedom while preventing the abuse of media power, and considers the future of media law in the digital era. It is essential reading for students and scholars of media law alike.

a comparative legal survey Council of Europe

Children and teenagers are often the first to adopt new media technologies, and parents and policy makers continue to be concerned about the widespread use of diverse media and its potential effects on young people. Harm and Offence in Media Content presents a significant and comprehensive analysis of the benefits and dangers posed by both established and emergent technologies. Newly updated, this balanced, critical account examines all media, including interactive games, social networking and mobile phones. Many examples specifically focus on the United States, noting the ways in which young people are using new technologies and the partnerships this has given rise to between state governments, media regulators and Internet service providers. This informative guide to a controversial field of study will be a useful resource for scholars in media, communication, psychology, sociology and education.

Beyond Connectivity Corwin Press

Europe is marked by a great diversity in public service broadcasting culture which is a result of the different political, economic, cultural and social realities in different European countries. This publication examines the development of public service broadcasting, its current *raison d'être* and its perspectives in the digital media era. It also addresses the demands and expectations placed on public service broadcasting: how are these demands expressed and how do today's broadcasters meet these demands? Fourteen European countries are covered in detail: Bulgaria, Denmark, Finland, France, Germany, Hungary, Italy, Lithuania, Poland, Romania, Spain, Switzerland, The Netherlands, United Kingdom. The countries were chosen to provide an overview of the different regulatory models developed throughout Europe. Each contribution describes the foundations of the public service remit, the economic and financing model as well as the decision-making process. In addition, it examines the influence of a country's cultural, political or social aspects on the selection of the public service broadcasting system and its organisational structures.

Redressing Everyday Discrimination UNESCO

McNae's Essential Law for Journalists remains the definitive media law guide for both journalists and media students. Endorsed by the National Council for the Training of Journalists as the essential text for students on journalism courses and widely used in newsrooms across the UK, McNae's is unrivalled in its accuracy, detail and ease of use. In this 21st edition, the authors combine fully up-to-date examples and case studies with practical advice to give a clear and accessible guide to media law. It also features new 'at a glance' advice on web-related journalism. The new edition is accompanied by an extensive website that includes multiple choice questions, additional chapters, interactive testing resources and checklists and comments on topical issues. With its easy-access summaries, clear cross-references and practical advice, McNae's continues to meet the needs of busy journalists who need quick and reliable answers to the questions they face in their day-to-day work while also providing students with authoritative coverage of key media law topics. Online resource centre McNae's Essential Law for Journalists is complemented by a free to use website featuring the following resources: Updates from the authors Downloadable glossary Self-marking multiple choice questions and chapter-related questions Downloadable checklists Additional chapters Weblinks

Religion and Socio-Cultural Change in the Twenty-First Century Routledge

Hilaire Barnett's Constitutional and Administrative Law has provided generations of students with reliable, accessible and comprehensive coverage of the Public Law syllabus. Mapped to the common course outline, it equips students with an understanding of the constitution's past, present and future by analysing and illustrating the political and socio-historical contexts which have shaped the major legal rules and principles of public law, as well as on-going constitutional reform. The 12th edition will address key recent developments including: The referendum result on the UK's membership of the EU and its ongoing impact on constitutional and administrative law The continuing process of devolution to the nations Terrorism and national security Future developments, particularly in relation to 'Brexit' will be discussed in regular updates to the companion website.

Ofcom is one of the key regulators in twenty first century Britain. It supervises the big industries of the present and the future: telephony, broadcasting, media, and so on. It is at the intersection of technology, culture and politics. Ofcom is also at its own crossroads with a new chair to be announced in late Spring 2021. That individual could shape the public sphere for decades to come. Hence, this book - the first to my knowledge about the regulator - simply asks what is the point of Ofcom? And is it fit for purpose after close to two decades of existence? A panoply of those with knowledge and experience cast their minds to these big questions: Rt.Hon Sir Alan Moses, Judge, Former Head Independent Press Standards Organisation; Bill Emmott, Former Editor The Economist, Former Chair Ofcom Content Board; Steve Barnett, Professor of Communications, University of Westminster; Mark Thompson, Former BBC DG/New York Times CEO; Clive Myrie, Royal Television Society Journalist of the Year 2021; David Elstein Former Senior Executive Thames, Sky Television, Channel Five; Janice Hughes CBE Graphite Strategy. Early Oftel/Ofcom strategist; Simon Albury MBE, Former CEO The Royal Television Society; Marcus Ryder MBE, Diversity Champion; Robin Aitken MBE, Daily Telegraph columnist; Jacqui Hughes, Former Ofcom executive; Peter Jukes, Byline Times; Paul Connew, Former Editor Sunday Mirror/Media commentator; Phillip Collins, former Chief speech writer for Tony Blair/Columnist at The Times; Julian Petley, Professor of Journalism, Brunel University; Christopher Williams, Telegraph Business Editor

Constitutional & Administrative Law Bloomsbury Publishing

Media and Entertainment Law presents a contemporary analysis of the law relating to the media and entertainment industry both in terms of its practical application and its theoretical framework. Looking at key aspects such as TV and radio broadcasting, the print press, the music industry, online news and entertainment and social networking sites, this textbook provides students with detailed coverage of the key principles, cases and legislation as well as a critical analysis of regulatory bodies such as the Press Complaints Commission and OFCOM. Media and Entertainment Law is also the first book to discuss superinjunctions and the phone-hacking scandal involving News of the World.

Since the first edition of this landmark textbook, online shopping has grown exponentially to the point that it now threatens to eclipse the high street. With online retail offering both advantages and challenges that are distinct from traditional commerce, this textbook provides new approaches to retailing and as such helps readers to take advantage of new digital technologies. This long-awaited new edition provides a thorough and substantial update to its solid core principle of digital retailing and its relationship with conventional retail methods. These principles are explained clearly and practically to provide students, entrepreneurs and researchers with a reliable guide to the

implementation and operation of a successful online retailing business. Updates to this edition include: Search engine marketing and search engine optimization. New and updated case studies, including Tesco's virtual store, Ray-Ban's smart mirror, IKEA's mobile catalogue and Nordstrom's TextStyle. Social networks and electronic word-of-mouth communication. A new chapter on ubiquitous retailing. A brand new companion website to support tutors. With accessibly written features such as key learning points, questions, think points and further reading, Internet Retailing and Future Perspectives is ideal for anyone using, studying or researching digital commerce. report, together with formal minutes, minutes of evidence and appendices The Stationery Office Further issues for BBC charter Review : 2nd report of session 2005-06, Vol. 2: Evidence *A BBC for the Future* Oxford University Press

Nowadays, the Internet plays a vital role in our lives. It is currently one of the most effective media that is shifting to reach into all areas in today's society. While we move into the next decade, the future of many emerging technologies (IoT, cloud solutions, automation and AI, big data, 5G and mobile technologies, smart cities, etc.) is highly dependent on Internet connectivity and broadband communications. The demand for mobile and faster Internet connectivity is on the rise as the voice, video, and data continue to converge to speed up business operations and to improve every aspect of human life. As a result, the broadband communication networks that connect everything on the Internet are now considered a complete ecosystem routing all Internet traffic and delivering Internet data faster and more flexibly than ever before. This book gives an insight into the latest research and practical aspects of the broadband communication networks in support of many emerging paradigms/applications of global Internet from the traditional architecture to the incorporation of smart applications. This book includes a preface and introduction by the editors, followed by 20 chapters written by leading international researchers, arranged in three parts. This book is recommended for researchers and professionals in the field and may be used as a reference book on broadband communication networks as well as on practical uses of wired/wireless broadband communications. It is also a concise guide for students and readers interested in studying Internet connectivity, mobile/optical broadband networks and concepts/applications of telecommunications engineering.

Mediating Faiths Religion and Socio-Cultural Change in the Twenty-First Century Routledge

Vulnerable Consumers and the Law Mediating Faiths Religion and Socio-Cultural Change in the Twenty-First Century

Taking an historical approach, Broadcasting Pluralism and Diversity argues that early policy and regulatory decisions regarding broadcasting continue to have a significant influence on current reforms. While policy and reform debates focus on ownership and control measures, this book argues that such measures cannot be considered in isolation from other regulatory instruments, and

that a holistic regulatory approach is required. As such, content regulation and competition regulation are also considered. Underlying the study is the contention that much of the policy informing pluralism and diversity regulation, although making reference to the importance of the media's role in the democratic process, has been skewed by a futile focus on the different regulatory treatment of the press and broadcasting which is adversely influencing current policy debates. The book argues that a different approach, using the public sphere concept, needs to be adopted and used as a measure against which regulatory reform in the changing media environment can be assessed. *Broadcasting Pluralism and Diversity* is the first book to study policy and regulatory measures relating to the promotion of media diversity in the jurisdictions of the UK, US, and

Australia.
