Medieval Texts in  
Translation Cambridge  
University Press

This information filled  
Encyclopedia of over 2400  
entries covers the  
political, intellectual.  
Literary, and musical  
history of the country  
from the early fifth

century to the late  
fifteenth. The shorter  
entries offer succinct  
summaries of the lives of  
individuals, events, works,  
cities, monuments, and  
other important subjects,  
followed by essential  
bibliographies. Longer  
essay-length articles  
provide interpretative  
comments about  
significant institutions and  
important periods or

events.

*Johannes Pfefferkorn and  
Christian Writings about  
Jewish Life and Literature  
in Early Modern Europe*  
Walter de Gruyter GmbH  
& Co KG

From the deserts of Egypt  
to the emergence of the  
great monastic orders, the  
story of late antique and  
medieval monasticism in  
the West used to be  
straightforward. But today

we see the story as far 'messier' - less linear, less unified, and more historicized. In the first part of this book, the reader is introduced to the astonishing variety of forms and experiences of the monastic life, their continuous transformation, and their embedding in physical, socio-economic, and even personal settings. The second part surveys and discusses the extensive international scholarship on which the first part is built. The third part, a research tool, rounds off

the volume with a carefully representative bibliography of literature and primary sources. From the First Century CE to the Third Taylor & Francis  
Through this comprehensive Handbook, the reader will obtain a balanced and cohesive picture of the Early Church. It gives an overall view of the reception, transmission, and interpretation of the Bible in the life and thought of the Church during the first five centuries of Christianity.

The Book Of Minerals  
Dalcassian Publishing Company  
Monasticism, in all of its variations, was a feature of almost every landscape in the medieval West. So ubiquitous were religious women and men throughout the Middle Ages that all medievalists encounter monasticism in their intellectual worlds. While there is enormous interest in medieval monasticism among Anglophone scholars, language is often a barrier to accessing some of the most important and

groundbreaking research emerging from Europe. The Cambridge History of Medieval Monasticism in the Latin West offers a comprehensive treatment of medieval monasticism, from Late Antiquity to the end of the Middle Ages. The essays, specially commissioned for this volume and written by an international team of scholars, with contributors from Australia, Belgium, Canada, England, France, Germany, Italy, the Netherlands, Spain, Switzerland, and the United States, cover a

range of topics and themes and represent the most up-to-date discoveries on this topic.

No one can describe a wine like Karen MacNeil. Comprehensive, entertaining, authoritative, and endlessly interesting, The Wine Bible is a lively course from an expert teacher, grounding the reader deeply in the fundamentals—vine-yards and varietals, climate and terroir, the nine attributes of a wine's

greatness—while layering on tips, informative asides, anecdotes, definitions, photographs, maps, labels, and recommended bottles. Discover how to taste with focus and build a wine-tasting memory. The reason behind Champagne's bubbles. Italy, the place the ancient Greeks called the land of wine. An oak barrel's effect on flavor. Sherry, the world's most misunderstood and underappreciated wine. How to match wine with food—and mood. Plus

everything else you need to know to buy, store, serve, and enjoy the world's most captivating beverage.

The WWDR 2014 on Water and Energy is now an annual and thematic

report with a focus on different strategic water issues each year. It is shorter in the order of 100 pages with a standardized structure and data and case studies annexes related to the theme. The WWDR 2014 will be launched during the main World Water Day celebrations in Tokyo, Japan on 21 March 2014. Water and energy are closely interconnected and highly interdependent. Trade-offs need to be managed to limit negative impacts and foster opportunities

for synergy. Water and energy have crucial impacts on poverty alleviation both directly, as a number of the Millennium Development Goals depend on major improvements in access to water, sanitation, power and energy sources, and indirectly, as water and energy can be binding constraints on economic growth the ultimate hope for widespread poverty reduction. This fifth edition of the United Nations World Water Development Report

(WWDR 2014) seeks to inform decision-makers  
**Safety in Welding and Cutting** BRILL

Eminent physicist and economist, Robert Ayres, examines the history of technology as a change agent in society, focusing on societal roots rather than technology as an autonomous, self-perpetuating phenomenon. With rare exceptions, technology is developed in response to societal needs that have evolutionary roots and causes. In our genus Homo, language evolved

in response to a need for our ancestors to communicate, both in the moment, and to posterity. A band of hunters had no chance in competition with predators that were larger and faster without this type of organization, which eventually gave birth to writing and music. The steam engine did not leap fully formed from the brain of James Watt. It evolved from a need to pump water out of coal mines, driven by a need to burn coal instead of firewood, in turn due to deforestation. Later, the

steam engine made machines and mechanization possible. Even quite simple machines increased human productivity by a factor of hundreds, if not thousands. That was the Industrial Revolution. If we count electricity and the automobile as a second industrial revolution, and the digital computer as the beginning of a third, the world is now on the cusp of a fourth revolution led by microbiology. These industrial revolutions have benefited many in the

short term, but devastated the Earth's ecosystems. Can technology save the human race from the catastrophic consequences of its past success? That is the question this book will try to answer.

Berg- und hüttenmännische Zeitung  
Good Press

This book makes the case for why we should care about islands and their sustainability. Islands are hotspots of biocultural diversity and home to 600 million people that

depend on one-sixth of the earth's total area, including the surrounding oceans, for their subsistence. Today, they are at the frontlines of climate change and face an existential crisis. Islands are, however, potential "hubs of innovation" that are uniquely positioned to be leaders in sustainability and climate action. This volume argues that a full-fledged program on "island industrial ecology" is urgently needed, with the aim of offering policy-relevant insights and

strategies to sustain small islands in an era of global environmental change. The nine contributions in this volume cover a wide range of applications of socio-metabolic research, from flow accounts to stock analysis and their relationship to services in space and time. They offer insights into how reconfiguring patterns of resource use will allow island governments to build resilience and adapt to the challenges of climate change.

**The Medieval Culture of Disputation** BRILL

Late Medieval and Renaissance art was surprisingly pushy; its architecture demanded that people move through it in prescribed patterns, its sculptures played elaborate games alternating between concealment and revelation, while its paintings charged viewers with imaginatively moving through them. Viewers wanted to interact with artwork in emotional and/or performative ways. This inventive and personal interface between viewers and

artists sometimes conflicted with the Church's prescribed devotional models, and in some cases it complemented them. Artists and patrons responded to the desire for both spontaneous and sanctioned interactions by creating original ways to amplify devotional experiences. The authors included here study the provocation and the reactions associated with medieval and Renaissance art and architecture. These essays trace the impetus towards interactivity from

the points of view of their creators and those who used them. Contributors include: Mickey Abel, Alfred Acres, Kathleen Ashley, Viola Belghaus, Sarah Blick, Erika Boeckeler, Robert L.A. Clark, Lloyd DeWitt, Michelle Erhardt, Megan H. Foster-Campbell, Juan Luis González García, Laura D. Gelfand, Elina Gertsman, Walter S. Gibson, Margaret Goehring, Lex Hermans, Fredrika Jacobs, Annette LeZotte, Jane C. Long, Henry Luttikhuizen, Elizabeth Monroe, Scott B.

Montgomery, Amy M. Morris, Vibeke Olson, Katherine Poole, Alexa Sand, Donna L. Sadler, Pamela Sheingorn, Suzanne Karr Schmidt, Anne Rudloff Stanton, Janet Snyder, Rita Tekippe, Mark Trowbridge, Mark S. Tucker, Kristen Van Ausdall, Susan Ward. An Artist in the Death Camps Prabhat Prakashan At the height of its power, the Roman Empire encompassed the entire Mediterranean basin, extending much beyond it from Britain to Mesopotamia, from the

Rhine to the Black Sea. Rome prospered for centuries while successfully resisting attack, fending off everything from overnight robbery raids to full-scale invasion attempts by entire nations on the move. How were troops able to defend the Empire's vast territories from constant attacks? And how did they do so at such moderate cost that their treasury could pay for an immensity of highways, aqueducts, amphitheaters, city baths, and magnificent temples?

In *The Grand Strategy of the Roman Empire*, seasoned defense analyst Edward N. Luttwak reveals how the Romans were able to combine military strength, diplomacy, and fortifications to effectively respond to changing threats. Rome's secret was not ceaseless fighting, but comprehensive strategies that unified force, diplomacy, and an immense infrastructure of roads, forts, walls, and barriers. Initially relying on client states to buffer

attacks, Rome moved to a permanent frontier defense around 117 CE. Finally, as barbarians began to penetrate the empire, Rome fielded large armies in a strategy of "defense-in-depth," allowing invaders to pierce Rome's borders. This updated edition has been extensively revised to incorporate recent scholarship and archeological findings. A new preface explores Roman imperial statecraft. This illuminating book remains essential to both ancient

historians and students of modern strategy.

[A Companion to Joachim of Fiore](#) Litres

Scholastic disputation, the formalized procedure of debate in the medieval university, is one of the hallmarks of intellectual life in premodern Europe. Modeled on Socratic and Aristotelian methods of argumentation, this rhetorical style was refined in the monasteries of the early Middle Ages and rose to prominence during the twelfth-century Renaissance. Strict rules governed disputation, and

it became the preferred method of teaching within the university curriculum and beyond. In *The Medieval Culture of Disputation*, Alex J. Novikoff has written the first sustained and comprehensive study of the practice of scholastic disputation and of its formative influence in multiple spheres of cultural life. Using hundreds of published and unpublished sources as his guide, Novikoff traces the evolution of disputation from its ancient origins to its

broader impact on the scholastic culture and public sphere of the High Middle Ages. Many examples of medieval disputation are rooted in religious discourse and monastic pedagogy: Augustine's inner spiritual dialogues and Anselm of Bec's use of rational investigation in speculative theology laid the foundations for the medieval contemplative world. The polemical value of disputation was especially exploited in the context of competing Jewish and Christian

interpretations of the Bible. Disputation became the hallmark of Christian intellectual attacks against Jews and Judaism, first as a literary genre and then in public debates such as the Talmud Trial of 1240 and the Barcelona Disputation of 1263. As disputation filtered into the public sphere, it also became a key element in iconography, liturgical drama, epistolary writing, debate poetry, musical counterpoint, and polemic. *The Medieval Culture of Disputation*

places the practice and performance of disputation at the nexus of this broader literary and cultural context.

*Berg- und Hüttenmännische Zeitung*  
Springer Science & Business Media

The Vita Christi of the fourteenth century Carthusian, Ludolph of Saxony, is the most comprehensive series of meditations on the life of Christ of the late Middle Ages. Ludolph assembles a wealth of commentary from the fathers of the church and the great

medieval spiritual writers and weaves them into a seamless exposition on the Gospel. This is the first English translation of this classic work, and it also is the first edition in any language to identify the thousands of sources used by Ludolph, both those he quotes and the many he cites without attribution. It will be of great interest to students of Christian spirituality, but it is intended, as was the original text, for ordinary believers seeking to enter more deeply into the meaning of the life of

Christ. When complete, there will be 4 volumes.

**Der Berggeist** Springer Nature

Recounts the author's experiences during the Holocaust, from the time of the Nazi invasion of Poland to the liberation of the Theresienstadt concentration camp by the Red Army in 1945.

The Traditio Legis:

Anatomy of an Image

Workman Publishing

The Exposition of the Apocalypse by Tyconius of Carthage (fl. 380) was pivotal in the history of interpretation of the Book

of Revelation. While expositors of the second and third centuries viewed the Apocalypse of John, or Book of Revelation, as mainly about the time of Antichrist and the end of the world, in the late fourth century Tyconius interpreted John's visions as figurative of the struggles facing the Church throughout the entire period between the Incarnation and the Second Coming of Christ. Tyconius's "ecclesiastical" reading of the Apocalypse was highly regarded by

early medieval commentators like Caesarius of Arles, Primasius of Hadrumetum, Bede, and Beatus of Liebana, who often quoted from Tyconius's Exposition in their own Apocalypse commentaries. Unfortunately no complete manuscript of the Exposition by Tyconius has survived. A number of recent scholars, however, believed that a large portion of his Exposition could be reconstructed from citations of it in the

aforementioned early medieval writers; and this task was undertaken by Monsignor Roger Gryson. Gryson's edition, a reconstruction of the *Expositio Apocalypseos* of Tyconius, was published in 2011 in *Corpus Christianorum Series Latina*. The present translation of that reconstructed text, with introduction and notes, exhibits Tyconius's unique non-apocalyptic approach to the Book of Revelation. It also shows that throughout the Exposition Tyconius made use of

interpretive rules that he had laid out in an earlier work on hermeneutics, the Book of Rules, strongly suggesting that Tyconius wrote his Exposition as a companion to his Book of Rules. Thus, the Exposition served as an exemplar of how those rules would apply to interpretation of even the most intriguing of biblical texts, the Apocalypse. *The Life of Jesus Christ* SUNY Press  
The subfamily Coelotinae is defined to include 20 genera and 277 species.

10 new genera are proposed: Asiacoelotes, new genus, with 15 East Asian species; Bifidocoelotes, new genus, with 2 species from China; Eurocoelotes, new genus, with 11 European species; Femoracoelotes, new genus, with 2 species from Taiwan; Himacoelotes, new genus, fully revised here, with 10 species from the Himalayas; Leptocoelotes, new genus, with 2 species from China; Longicoelotes, new genus, with 1 species from China;

Platocoelotes, new genus, with 4 species from China; Robusticoelotes, new genus, with 1 species from China; and Spiricoelotes, new genus, with 2 East Asian species. 84 new combinations are suggested, 14 species are newly synonymized, and 9 new species are described.

From well-known classics & literary fiction and non-fiction to forgotten—or yet undiscovered gems—of world literature, we issue the books that need to be read. Each Good Press edition has been meticulously edited and formatted to boost readability for all e-readers and devices. Our goal is to produce eBooks that are user-friendly and accessible to everyone in

a high-quality digital format.

Some Jewish Witnesses For Christ CUA Press

The bearded and mature figure of Christ stands majestically raising his right hand, open palm facing the viewer. In his left he holds an unfurled scroll. Saints Peter and Paul appear on either side, Peter approaching to catch or protect the dangling bookroll. This image, the so-called *tradio legis*, first appeared in late fourth-century Rome in a variety of media, from the

monumental to the miniature, including mosaic, catacomb painting, gold-glass and, the most numerous group, marble relief carving on sarcophagi. This monograph engages in a close reading of the *tradio legis*, highlighting its novelty and complexity to early Christian viewers. The image is analyzed as a conflation of two distinct forms of representation, each constructed of unusual and potentially multivalent elements. Iconographical details like

the hirsute Christ, his  
gesture, Peter's covered  
hands and the unorthodox  
positioning of the two

saints are examined in  
isolation and as elements  
of the whole. The

synthetic composition  
invited alternative and  
over-determined  
meanings.
