SHERLYN BENJAMIN

The Oxford History of the Ancient Near East Oxford Encyclopedias of the Bi
"This comprehensive five-volume work analyzes the archaeological and linguistic data that pertain to the broad cultural milieu of the ancient Near East, the crossroads of three of the world's most influential religions -- Judaism, Christianity, and Islam. Ranging from prehistoric times up to the early centuries of the rise of Islam, the work covers the civilizations of Syria-Palestine, Mesopotamia, Anatolia, Iran, Arabia, Cyprus, Egypt, and the coastal regions of North and East Africa. It includes 1,125 alphabetically arranged entries on sites, languages, material culture, archaeological methods, organizations and institutions, and major excavators and scholars of the field. This one-of-a-kind, accessibly written reference brings new breadth to the study of archaeology in the biblical world, making it a valuable resource not only to scholars and students of archaeology, but also to those with an interest in ancient art and architecture, languages, history, and religion." -- Alibris.com.
Encyclopedia of Christianity Oxford University Press
Annotation Featuring 600 original articles written by leading scholars, The Oxford Encyclopedia of Ancient Egypt goes far beyond the records of archaeology to make available what we know about the full social, political, religious, cultural and artistic legacy of this 5,000 year civilization. The Encyclopedia offers the most complete picture available of ancient Egyptian civilization, from the predynastic era to its eclipse in the seventh century CE. Here is the Egyptian world in illuminating, accessible detail: art, architecture, religion, language, literature, trade, politics, everyday social life and the culture of the court. Of special interest is the coverage of themes and issues that are particularly controversial--such as the new theories of the origins of complex society in the Nile Valley, new discoveries about Greco-Roman Egypt, and new developments in literature, religion, linguistics and other fields, including the debates about Egypt's African legacy. Extensively illustrated with photographs, line drawings, and maps, the Encyclopedia of Ancient Egypt is designed for the widest possible access, serving students, teachers, and scholars in fields ranging from Near East archaeology and classics to ancient art, architecture, history, language and religion, as well as general readers fascinated by a world that remains--even today--incompletely mapped.

The Oxford Encyclopedia of Mesoamerican Cultures OUP USA

Presents a collection of alphabetically arranged articles related to Christianity, covering its history, events, and important figures and individuals. Includes maps, charts, and illustrations.

"The Grove Encyclopedia of Materials and Techniques deals with all aspects of materials, techniques, conservation, and restoration in both traditional and nontraditional media, including ceramics,

sculpture, metalwork, painting, works on paper, textiles, video, digital art, and more. Drawing upon the expansive scholarship in The Dictionary of Art and adding new entries, this work is a comprehensive reference resource for artists, art dealers, collectors, curators, conservators, students, researchers, and scholars." "Similar in design to The Grove Encyclopedia of Decorative Arts, this one-volume reference work contains articles of various lengths in alphabetical order. The shorter, more factual articles are combined with larger, multi-section articles tracing the development of materials and techniques in various geographical locations. The Encyclopedia provides unparalleled scope and depth, and it offers fully updated articles and bibliography as well as over 150 illustrations and color plates." "The Grove Encyclopedia of Materials and Techniques offers scholarly information on materials and techniques in art for anyone who studies, creates, collects, or deals in works of art. The entries are written to be accessible to a wide range of readers, and the work is designed as a reliable and convenient resource covering this essential area in the visual arts."

The Oxford Companion to Theatre and Performance Oxford University Press, USA

Presenting the most up-to-date coverage on our knowledge of this society, The Oxford Encyclopedia of Mesoamerican Cultures is the first comprehensive and comparative reference source to chronicle Pre-Hispanic, Colonial, and modern Mesoamerica. Written for a wide audience, it is an invaluable reference for interested lay persons, students, teachers, and scholars in such fields as art, archaeology, religious studies, anthropology, Latin American culture, and the history of the region. Organized alphabetically, the articles range from 500-word biographies to 7,000-word entries on geography and history to the legacy of the arts, writings, architecture, and religious rituals. An extensive network of cross-references, blind entries, and annotated bibliographies guide the reader to related entries within the Encyclopedia and provide the groundwork for further research.

As the first major encyclopedia of its kind, The Oxford Encyclopedia of the Bible and Gender Studies (OEBGS) is the go-to source for scholars and students undertaking original research in the field.

Extending the work of nineteenth and twentieth century feminist scholarship and more recent queer studies, the Encyclopedia seeks to advance the scholarly conversation by systematically exploring the ways in which gender is constructed in the diverse texts, cultures, and readers that constitute "the world of the Bible." With contributions from leading scholars in gender and biblical studies as well as contemporary gender theorists, classicists, archaeologists, and ancient historians, this comprehensive reference work reflects the diverse and interdisciplinary nature of the field and traces both historical and modern conceptions of gender and sexuality in the Bible. The two-volume Encyclopedia contains more than 160 entries ranging in length from 1,000 to 10,000 words. Each entry includes bibliographic references and suggestions for further reading, as well as a topical outline and index to aid in research. The OEBGS builds upon the pioneering work of biblically focused gender theorists to help guide and encourage further gendered discussions of the Bible.

The Oxford Encyclopedia of Islam and Women will provide clear, current, comprehensive information on the major topics of scholarly interest within the study of Islam and women.

The Oxford Children's Encyclopedia of History Rowman & Littlefield

The Oxford International Encyclopedia of Legal History is a comprehensive, international, interdisciplinary reference work that includes approximately 1,000 articles on all aspects of legal history throughout the world from ancient to modern times. Articles deal with private law, public law, and constitutional/higher law throughout the world and are written and signed by one of the many noteworthy contributors, which include major scholars and experts. For years, scholars have been investigating the remote origins of their respective national and religious law. Only recently has there been a developing interest in and study of the history of law in modern times. This encyclopedia will bring together the study of ancient law with the study of modern law-examining statutes and administrative rulings as well as judicial decisions, legislatures, agencies, and courts. The Encyclopedia will cover ancient, medieval, early modern, and modern law in eight legal traditions and geographical/cultural areas: Ancient Greek Law, Ancient Roman Law, Chinese Law, English Common Law, Islamic Law, Medieval Roman Law, United States Law, and law in other regions (Africa, Latin America, and South Asia among them). It will address major categories of law within these traditions, including private law (contract, tort, civil procedure), varieties of public law (criminal law, administrative law, statutory law), and higher law/ constitutional law. It will be the first encyclopedia of law to provide historical and contemporary comparisons of world legal systems. - Publisher.

An authoritative reference covering primarily actors, playwrights, directors, styles and movements, companies and organizations.

The Ancient Near East: A Very Short Introduction Oxford University Press, USA

The Dictionary of Classical Myth and Religion offers a fully rounded and highly authoritative point of

access to all aspects of ancient religious life and thought. Dr Simon Price and Dr Emily Kearns, area advisers for the third edition of the Oxford Classical Dictionary, have come together to select, revise, edit, and in some cases wholly recast, a large number of key entries from OCD to create this handy, accessible reference work on mythology and religion in the Graeco-Roman world. Bringing to the attention of a wider audience the authority and scholarly rigour of OCD, the Oxford Dictionary of Classical Myth and Religion provides students, teachers, and general readers with an affordable comprehensive, and wide-ranging A-Z reference source. The Dictionary is unique in that in addition to Greek myths and Roman festivals it covers Greek and Roman religious places, monuments, religious personnel, divination, astrology, and magic, and also contains many entries on Judaism and Christianity in Greek and Roman times.

[The Oxford encyclopedia of ancient Greece and Rome. - Vol. 1 - 7](#) Oxford University Press, USA

The archaeological study of the ancient world has become increasingly popular in recent years. A Research Guide to the Ancient World: Print and Electronic Sources, is a partially annotated bibliography. The study of the ancient world is usually, although not exclusively, considered a branch of the humanities, including archaeology, art history, languages, literature, philosophy, and related cultural disciplines which consider the ancient cultures of the Mediterranean world, and adjacent Egypt and southwestern Asia. Chronologically the ancient world would extend from the beginning of the Bronze Age of ancient Greece (ca. 1000 BCE) to the fall of the Western Roman Empire (ca. 500 CE). This book will close the traditional subject gap between the humanities (Classical World; Egyptology) and the social sciences (anthropological archaeology; Near East) in the study of the ancient world. This book is uniquely the only bibliographic resource available for such holistic coverage. The volume consists of 17 chapters and seven appendixes, arranged according to the traditional types of library research materials (bibliographies, dictionaries, atlases, etc.). The appendixes are mostly subject specific, including graduate programs in ancient studies, reports from significant archaeological sites, numismatics, and paleography and writing systems. These extensive author and subject indexes help facilitate ease of use.

[The Oxford International Encyclopedia of Legal History](#) Oxford University Press, USA

The Oxford Dictionary of Late Antiquity is the first comprehensive reference book covering every aspect of history, culture, religion, and life in Europe, the Mediterranean, and the Near East (including the Persian Empire and Central Asia) between the mid-3rd and the mid-8th centuries AD, the era now generally known as Late Antiquity. This period saw the re-establishment of the Roman Empire, its conversion to Christianity and its replacement in the West by Germanic kingdoms, the continuing Roman Empire in the Eastern Mediterranean, the Persian Sassanian Empire, and the rise of Islam. Consisting of over 1.5 million words in more than 5,000 A-Z entries, and written by more than 400 contributors, it is the long-awaited middle volume of a series, bridging a significant period of history between those covered by the acclaimed Oxford Classical Dictionary and The Oxford Dictionary of the Middle Ages. The scope of the Dictionary is broad and multi-disciplinary; across the wide geographical span covered (from Western Europe and the Mediterranean as far as the Near East and Central Asia), it provides succinct and pertinent information on political history, law, and administration; military history; religion and philosophy; education; social and economic history; material culture; art and architecture; science; literature; and many other areas. Drawing on the

latest scholarship, and with a formidable international team of advisers and contributors, The Oxford Dictionary of Late Antiquity aims to establish itself as the essential reference companion to a period that is attracting increasing attention from scholars and students worldwide.

The Oxford Companion to Classical Civilization Brighter Child

Examining every aspect of the culture from antiquity to the founding of Constantinople in the early Byzantine era, this thoroughly cross-referenced and fully indexed work is written by an international group of scholars. This Encyclopedia is derived from the more broadly focused Encyclopedia of Greece and the Hellenic Tradition, the highly praised two-volume work. Newly edited by Nigel Wilson, this single-volume reference provides a comprehensive and authoritative guide to the political, cultural, and social life of the people and to the places, ideas, periods, and events that defined ancient Greece.

The Oxford Dictionary of Late Antiquity Routledge

This Oxford Companion to the ancient classical world is aimed at the general reader interested in learning more about the very bedrock of Western culture, covering such topics as history, morals, mythology, medicine and social life.

The Oxford Encyclopedia of Ancient Egypt Oxford University Press

This book explores the lands of the ancient Near East from around 3200 BCE to 539 BCE. The earth-shaking changes that marked this era include such fundamental inventions as the wheel and the plow and intellectual feats such as the inventions of astronomy, law, and diplomacy.

The Oxford Dictionary of the Classical World Amber Books

Spanning the wide world of sports, this volume is packed with every conceivable fact that anyone would possibly want to know about nearly 300 sports, including history and practice worldwide.
