## JIMENEZ KENYON

**Navigating Data Security Within Data Sharing In Today's Evolving Landscape** Php Microservices  
 (microservices architecture ... Node.js, Java, Python, PHP, Ruby on Rails. What continues to impress me about these services is the breadth of application environments added and ...  
**Cloud Tech Innovations You May Be Overlooking: Taking Advantage Of Microservice Architectures**As a cloud-native platform built with a microservices architecture, the iBASEt Digital Operations Suite simplifies how complex manufacturing operations are performed as part of a larger enterprise ...  
**Gartner Names iBASEt a Visionary in 2021 Magic Quadrant for Manufacturing Execution Systems**Lightrun Cloud gives Java community the power of "shift left" observability into running production code, simplifying debugging with a simple IDE plugin and native CLITEL AVIV, Israel--(BUSINESS WIRE) ...  
**Lightrun Launches Free Debugger For Developer-Native Observability**They shine for wrapping up microservices that do one small thing ... JavaScript (Node.js), or PHP (Drupal, WordPress, etc.). Figuring out whether you'll see a big savings will depend heavily on the ...  
**7 ways the cloud is changing**Camunda Co-founder Bernd Ruecker's latest book, published by O'Reilly, tackles orchestration and integration in modern architecturesWALTHAM, Mass.--(BUSINESS WIRE)--  
**#microservices--Camunda today ...**New O'Reilly Book Spotlights Practical Process Automation for Modern ArchitecturesPeachPie, a platform that allows developers to use PHP as if it were a native .NET language, has reached its 1.0.0 release. The platform consists of a compiler, runtime, extension libraries ...  
**PeachPie 1.0.0 enables developers to use PHP as a native .NET language**They share their experience with microservices on production ... the framework can be used with Google App Engine, .NET, PHP and so on. One of the interesting features of RestfulX is ability ...  
**Virtual Panel: State of the Art in Enterprise Flex Frameworks**This online cloud computing training also covers the Python programming language, machine learning and microservices. Cloud computing jobs are considered some of the most in-demand positions in tech.  
**Want to be a cloud computing expert? Check out these training courses**with data and applications functions refactored as microservices. All Azure cloud services that currently run on Arc, including Azure Data Services, and as Andrew has covered, Azure Machine ...  
**Microsoft Ignite Data and Analytics roundup: Platform extensions are the key theme**Increasingly, apps are built as microservices communicating over well-defined APIs. Often, these APIs are remote or external. This means an app can use several methods to accomplish a task ...  
**The Role of Visibility in Securing Cloud Applications**"Developers and Security teams will each gain a better understanding of when, where and how applications and microservices are communicating via APIs, even across multi-cloud environments ...  
**VMware acquires Mesh7 for cloud-native application security**Vaultspeeds customer base ranges from California across Europe to Japan. The rise of microservices fueling the multiplication of distributed data, the move to the cloud, the accelerating volume of ...

cloud, the accelerating volume of ...  
**Vaultspeed Closes 3.6 Million in Series A Funding**This can be achieved using business-driven microservices architectures for enterprise-wide transformation - with security as the backdrop. In a microservices architecture, the emphasis is on building ...  
**Navigating Data Security Within Data Sharing In Today's Evolving Landscape**Features ready-made dynamic remediation, real-time end-to-end monitoring, smart alerting, and risk analysis for the full DevOps life cycle. TEL AVIV, Israel, March 10, 2021 - Lightspin, a pioneer ...  
**Lightspin Announces Enhanced Cloud Contextual Security**Therefore, we rely on you to work with software engineers to create a reliable, secure and performing environment for different types of architectures - PAAS, microservices, Kubernetes and ...  
**Cloud Engineer**The launched PaaS is open for all types of projects supporting both traditional (so called legacy) applications and cloud-native microservices ... that supports a wide-variety of technologies (PHP, ...)  
**Jelastic PaaS Expanded for Educational Institutions with Reclaim Cloud Hosting in the USA, Canada and the United Kingdom**We are looking for a Back-end developer (Python, Ruby or PHP) to help take our software ... stack consists of various applications, APIs, and microservices, written in multiple languages, so ...
