Twenty years ago it was impossible to imagine the president of the United States embracing same-sex marriage or Bruce Jenner transitioning to Caitlyn Jenner, an open transgender woman. LGBTQ Stats chronicles the ongoing LGBTQ revolution, providing the critical statistics, and draws upon and synthesizes newly collected data. Deschamps and Singer—whose previous books and films on LGBTQ topics have won numerous awards and found audiences around the globe—provide chapters on family and marriage, workplace discrimination, education, youth, criminal justice, and immigration, as well as evolving policies and laws affecting LGBTQ communities. A chapter on LGBTQ life around the globe contrasts the dramatic progress for LGBTQ people in the United States with violent backlash in countries such as Russia, Iran, and Nigeria, which have discriminatory laws that make same-sex activity punishable by prison or death. A lively, accessible, and eye-opening snapshot, LGBTQ Stats offers an invaluable resource for activists, journalists, lawmakers, and

general readers who want the facts and figures on LGBTQ lives in the twenty-first century.

Redeeming the Feminine Soul Rowman & Littlefield

Breathing is a continuous battle between our need for oxygen and forces in nature that attack our lungs. Three hundred thousand Americans will die of respiratory diseases this year. *Gasping for Air* is the dramatic story of how infections, toxins, carcinogens, and air pollution strike against one of our basic body functions. The book also describes how we come into the struggle with diseases like asthma, cystic fibrosis, and sleep apnea, which make us vulnerable to assaults on breathing from without and within. We have powerful weapons to defend breathing. Medical science, public health, engineering, and business, all play important roles in the effort to support breathing. Yet, *Gasping for Air* also reminds readers how breathing support has been at the eye of the storm in many ethical dilemmas of modern healthcare. Here, Kevin Glynn, an experienced pulmonologist and lifelong asthma sufferer tells stories about the third most common cause of premature deaths in the developed world, describes lethal forces in Nature (infections, genetic predispositions) and from human activities (dusty occupations, tobacco smoking, chemical toxins, drug overdoses) that threaten to suffocate us, and offers sage advice for how to prevent and address those threats and

the damage they cause.

"A theory in the flesh means one where the physical realities of our lives all fuse to create a political born of necessity," writes activist Cherríe L. Moraga. This volume of new essays stages an intergenerational dialogue among philosophers to introduce and deepen engagement with U.S. Latinx and Latin American feminist philosophy, and to explore their "theories in the flesh." It explores specific intellectual contributions in various topics in U.S. Latinx and Latin American feminisms that stand alone and are unique and valuable; analyzes critical contributions that U.S. Latinx and Latin American interventions have made in feminist thought more generally over the last several decades; and shows the intellectual and transformative value of reading U.S. Latinx and Latin American feminist theorizing. The collection features a series of essays analyzing decolonial approaches within U. S. Latinx and Latin American feminist philosophy, including studies of the functions of gender within feminist theory, everyday modes of resistance, and methodological questions regarding the scope and breadth of decolonization as a critical praxis. Additionally, essays examine theoretical contributions to feminist discussions of selfhood,

narrativity, and genealogy, as well as novel epistemic and hermeneutical approaches within the field. A number of contributors in the book address themes of aesthetics and embodiment, including issues of visual representation, queer desire, and disability within U. S. Latinx and Latin American feminisms. Together, the essays in this volume are groundbreaking and powerful contributions in the fields of U.S Latinx and Latin American feminist philosophy.

Why Americans have never elected a woman president, how we changed to make it possible, and why it matters. From Hollywood to the halls of Congress, a lively conversation about women's leadership, equal pay, and family-work balance is underway. On the cusp of a historic breakthrough—the potential election of America's first woman president—Nancy L. Cohen takes us inside the world of America's women political leaders. Drawing on hundreds of hours of interviews with women governors and senators from both parties, experts, political operatives, and a diverse array of voters, Breakthrough paints an intimate portrait of the savvy women who've built an alternative to the old boys club and are rewriting the playbook for how women succeed in politics. In this accessible and often surprising story, Cohen introduces us to the inspiring women behind the women who have brought us to this threshold, and to a dynamic group of young leaders who are redefining how we think about leadership, feminism, and men's essential role in achieving gender equality. Breakthrough takes on our cultural assumptions to show that the barriers that once blocked a woman's ascent to the presidency have fallen, even more than we realize.

Made Up exposes the multibillion-dollar beauty industry that promotes unrealistic beauty standards through a market basket of advertising tricks, techniques, and technologies. Cosmetics magnate Charles Revson, a founder of Revlon, was quoted as saying, "In the factory, we make cosmetics. In the store, we sell hope." This pioneering entrepreneur, who built an empire on the foundation of nail polish, captured the unvarnished truth about the beauty business in a single metaphor: hope in a jar. Made Up: How the Beauty Industry Manipulates Consumers, Preys on

Women's Insecurities, and Promotes Unattainable Beauty Standards is a thorough examination of innovative, and often controversial, advertising practices used by beauty companies to persuade consumers, mainly women, to buy discretionary goods like cosmetics and scents. These approaches are clearly working: the average American woman will spend around \$300,000 on facial products alone during her lifetime. This revealing book traces the evolution of the global beauty industry, discovers what makes beauty consumers tick, explores the persistence and pervasiveness of the feminine beauty ideal, and investigates the myth-making power of beauty advertising. It also examines stereotypical portrayals of women in beauty ads, looks at celebrity beauty endorsements, and dissects the "looks industry." Made Upuncovers the reality behind an Elysian world of fantasy and romance created by beauty brands that won't tell women the truth about beauty.

This is the first transnational history of IVF and assisted reproduction. It is a key text for scholars and students in social science, history, science and technology studies (STS), cultural studies, and gender and sexuality studies, and a resource for journalists, policymakers, and anyone interested in assisted reproduction. IVF was seen as revolutionary in 1978 when the first two IVF babies were born, in the UK and India. Assisted reproduction has now contributed to the birth of around ten million people. The book traces the work of IVF teams as they developed new techniques and laid the foundations of a multi-billion-dollar industry. It analyses the changing definitions and experience of infertility, the markets for eggs and children through surrogacy, cross-border reproductive treatment, and the impact of regulation. Using interviews with leading IVF figures, archives, media reports, and the latest science, it is a vital addition to the field of reproduction studies. 'This pathbreaking account of the global forces behind the rapid rise of the fertility industry is the first to offer such a truly comprehensive overview of this hugely important topic.' —Sarah Franklin, Chair of Sociology, University of Cambridge 'In this compelling overview of one of the most significant technological and social interventions ever developed, the cultural and scientific imaginaries of assisted reproduction meet the obdurate histories of laboratory experiments, biological materials, and personal quests. It is an indispensable read for anyone interested in IVF and assisted reproduction.' —Andrea Whittaker, Professor of Anthropology, Monash University

When American Jewish men intermarry, goes the common assumption, they and their families are "lost" to the Jewish religion. In this provocative book, Keren R. McGinity shows that it is not necessarily so. She looks at intermarriage and parenthood through the eyes of a post-World War II cohort of Jewish men and discovers what intermarriage has meant to them and their families. She finds that these husbands strive to bring up their children as Jewish without losing their heritage. Marrying Out argues that the "gendered ethnicity" of intermarried Jewish men, growing out of their

religious and cultural background, enables them to raise Jewish children. McGinity's book is a major breakthrough in understanding Jewish men's experiences as husbands and fathers, how Christian women navigate their roles and identities while married to them, and what needs to change for American Jewry to flourish. Marrying Out is a must read for Jewish men and all the women who love them.

Since her late-1990s debut as a member of the R&B trio Destiny's Child, Beyoncé Knowles has

garnered both praise and criticism. While some consider her an icon of female empowerment, others see her as detrimental to feminism and representing a negative image of women of color. Her music has a decidedly pop aesthetic, yet her power-house vocals and lyrics focused on issues like feminine independence, healthy sexuality and post-partum depression give her songs dimension and substance beyond typical pop fare. This collection of new essays presents a detailed study of the music and persona of Beyoncé—arguably the world's biggest pop star. Topics include the body politics of respectability; feminism, empowerment and gender in Beyoncé's lyrics; black female pleasure; and the changing face of celebrity motherhood.
