ARMSTRONG EATON

Handbook of Culture and Migration CRC Press

This volume provides an ample overview of state-of-the-art understanding of the multi-dimensional phenomenon of migration, in the characterisation of migration drivers, in environmental and agro-economic case studies and modelling issues as well as socio-political analyses. The analysis is geared to the consequences of climatic change, and the effects on soil, water and extreme weather that will drive populations to migrate.

Afterland CRC Press

The Indian Ocean was global long before the Atlantic, and today the countries bordering the Bay of Bengal—India, Bangladesh, Burma, Sri Lanka, Thailand, and Malaysia—are home to one in four people on Earth. Crossing the Bay of Bengal places this region at the heart of world history for the first time. Integrating human and environmental history, and mining a wealth of sources, Sunil Amrith gives a revelatory and stirring new account of the Bay and those who have inhabited it. For centuries the Bay of Bengal served as a maritime highway between India and China, and then as a battleground for European empires, all while being shaped by the monsoons and by human migration. Imperial powers in the nineteenth century, abetted by the force of capital and the power of steam, reconfigured the Bay in their quest for coffee, rice, and rubber. Millions of Indian migrants crossed the sea, bound by debt or spurred by drought, and filled with ambition. Booming port cities like Singapore and Penang became the most culturally diverse societies of their time. By the 1930s, however, economic, political, and environmental pressures began to erode the Bay's centuries-old patterns of interconnection. Today, rising waters leave the Bay of Bengal's shores especially vulnerable to climate change, at the same time that its location makes it central to struggles over Asia's future. Amrith's evocative and compelling narrative of the region's pasts offers insights critical to understanding and confronting the many challenges facing Asia in the decades ahead.

Marine Fisheries Review Univ of California Press

Capturing the important place and power role that culture plays in the decision-making process of migration, this Handbook looks at human movement outside of a vacuum; taking into account the impact of family relationships, access to resources, and security and insecurity at both the points of origin and destination.

Migration, Risk Management and Climate Change: Evidence and Policy Responses Verso Books

The last twenty years have seen a rapid increase in scholarly activity and publications dedicated to environmental migration

and displacement, and the field has now reached a point in terms of profile, complexity, and sheer volume of reporting that a general review and assessment of existing knowledge and future research priorities is warranted. So far, such a product does not exist. The Routledge Handbook of Environmental Displacement and Migration provides a state-of-the-science review of research on how environmental variability and change influence current and future global migration patterns and, in some instances, trigger large-scale population displacements. Drawing together contributions from leading researchers in the field, this compendium will become a go-to guide for established and newly interested scholars, for government and policymaking entities, and for students and their instructors. It explains theoretical, conceptual, and empirical developments that have been made in recent years; describes their origins and connections to broader topics including migration research, development studies, and international public policy and law; and highlights emerging areas where new and/or additional research and reflection are warranted. The structure and the nature of the book allow the reader to quickly find a concise review relevant to conducting research or developing policy on particular topics, and to obtain a broad, reliable survey of what is presently known about the subject.

American Exodus Oxford University Press, USA

In *Islands of Sovereignty*, anthropologist and legal scholar Jeffrey S. Kahn offers a new interpretation of the transformation of US borders during the late twentieth century and its implications for our understanding of the nation-state as a legal and political form. Kahn takes us on a voyage into the immigration tribunals of South Florida, the Coast Guard vessels patrolling the northern Caribbean, and the camps of Guantánamo Bay—once the world's largest US-operated migrant detention facility—to explore how litigation concerning the fate of Haitian asylum seekers gave birth to a novel paradigm of offshore oceanic migration policing. Combining ethnography—in Haiti, at Guantánamo, and alongside US migration patrols in the Caribbean—with in-depth archival research, Kahn expounds a nuanced theory of liberal empire's dynamic tensions and its racialized geographies of securitization. An innovative historical anthropology of the modern legal imagination, *Islands of Sovereignty* forces us to reconsider the significance of the rise of the current US immigration border and its relation to broader shifts in the legal infrastructure of contemporary nation-states across the globe.

Interstate Migration Walter de Gruyter GmbH & Co KG

This engaging analysis of the refugee crisis explores how borders are formed, policed—and used to inflict violence on the poor. “In an era of terrorism, global inequality, and rising political tension over migration, Jones argues that tight border controls make the

world worse, not better.” —Boston Globe Forty thousand people have died trying to cross between countries in the past decade, and yet international borders only continue to harden. The United Kingdom has voted to leave the European Union; the United States elected a president who campaigned on building a wall; while elsewhere, the popularity of right-wing antimigrant nationalist political parties is surging. Reece Jones argues that the West has helped bring about the deaths of countless migrants, as states attempt to contain populations and limit access to resources and opportunities. “We may live in an era of globalization,” he writes, “but much of the world is increasingly focused on limiting the free movement of people.” In *Violent Borders*, Jones crosses the migrant trails of the world, documenting the billions of dollars spent on border security projects and the dire consequences for countless millions. While the poor are restricted by the lottery of birth to slum dwellings in the ailing decolonized world, the wealthy travel without constraint, exploiting pools of cheap labor and lax environmental regulations. With the growth of borders and resource enclosures, the deaths of migrants in search of a better life are intimately connected to climate change, environmental degradation, and the growth of global wealth inequality.

Crossing the Bay of Bengal Routledge

“A necessary book for anyone truly interested in what we take from the sea to eat, and how, and why.” —Sam Sifton, *The New York Times* Book Review Acclaimed author of *American Catch* and *The Omega Principle* and life-long fisherman, Paul Greenberg takes us on a journey, examining the four fish that dominate our menus: salmon, sea bass, cod, and tuna. Investigating the forces that get fish to our dinner tables, Greenberg reveals our damaged relationship with the ocean and its inhabitants. Just three decades ago, nearly everything we ate from the sea was wild. Today, rampant overfishing and an unprecedented biotech revolution have brought us to a point where wild and farmed fish occupy equal parts of a complex marketplace. *Four Fish* offers a way for us to move toward a future in which healthy and sustainable seafood is the rule rather than the exception.

Coastal Contaminant Migration Monitoring Technology Review Springer

“An extraordinary novel... as beautiful and as wrenching as anything I've ever read” Emily St. John Mandel “An adventure of a wilder sort” *Vogue* US A dark past. An impossible journey. The will to survive. How far you would you go for love? Franny Stone is determined to go to the end of the earth, following the last of the Arctic terns on what may be their final migration to Antarctica. As animal populations plummet and commercial fishing faces prohibition, Franny talks her way onto one of the few remaining boats heading south. But as she and the eccentric crew travel

further from shore and safety, the dark secrets of Franny's life begin to unspool. A daughter's yearning search for her mother. An impulsive, passionate marriage. A shocking crime. Haunted by love and violence, Franny must confront what she is really running towards - and from. *The Last Migration* is a wild, gripping and deeply moving novel from a brilliant young writer. From the west coast of Ireland to Australia and remote Greenland, through crashing Atlantic swells to the bottom of the world, this is an ode to the wild places and creatures now threatened, and an epic story of the possibility of hope against all odds. "Gripping, tender and beautifully done. This novel is as intimate as it is urgent-you emerge thrilled and dazed, but also galvanized to save the planet" Anna Funder "This keening lament of an adventure is compelling" Observer "Compulsive stuff, driven at a cracking pace by the power of the elements and the fierce will of its single-minded narrator" Daily Mail

Four Fish Duke University Press

In recent years the borders of Europe have been perceived as being besieged by a staggering refugee and migration crisis. The contributors to *The Borders of "Europe"* see this crisis less as an incursion into Europe by external conflicts than as the result of migrants exercising their freedom of movement. Addressing the new technologies and technical forms European states use to curb, control, and constrain what contributors to the volume call the autonomy of migration, this book shows how the continent's amorphous borders present a premier site for the enactment and disputation of the very idea of Europe. They also outline how from Istanbul to London, Sweden to Mali, and Tunisia to Latvia, migrants are finding ways to subvert visa policies and asylum procedures while negotiating increasingly militarized and surveilled borders. Situating the migration crisis within a global frame and attending to migrant and refugee supporters as well as those who stoke nativist fears, this timely volume demonstrates how the enforcement of Europe's borders is an important element of the worldwide regulation of human mobility. Contributors: Ruben Andersson, Nicholas De Genova, Dace Dzenovska, Evelina Gambino, Glenda Garelli, Charles Heller, Clara Lecadet, Souad Osseiran, Lorenzo Pezzani, Fiorenza Picozza, Stephan Scheel, Maurice Stierl, Laia Soto Bermant, Martina Tazzioli

Interstate Migration: Lincoln hearings, Sept. 16-17, 1940
New Directions Publishing

This edited volume explores the circumstances under which vulnerable communities can better adapt to climate and environmental change, and focuses in particular on the centrality of migration as a resilience and adaptation strategy for communities at risk. The book features important case studies where migration is being used as a risk management strategy in the Pacific, Sub-Saharan Africa, Latin America, and Europe. Its comparative analysis reveals common patterns in enhancing local resilience through migration across diverse regional, socio-economic, cultural, and political contexts. This book is a contribution to the global discussion about the future of migration policy, especially as climate and environmental change is expected to grow as one of the most pressing challenges of our time.

Violent Borders Springer

This book provides an authoritative analysis of the impact of climate change on migration.

The American Monthly Review of Reviews Springer Science & Business Media

Gregory reaches into the migrants' lives to reveal both their economic trials and their impact on California's culture and society. He traces the development of an 'Okie subculture' which is now an essential element of California's cultural landscape.

Environmental Change and its Implications for Population

Migration Cambridge University Press

In this groundbreaking ethnography, Ruben Andersson, a gifted

anthropologist and journalist, travels along the clandestine migration trail from Senegal and Mali to the Spanish North African enclaves of Ceuta and Melilla. Through the voices of his informants, Andersson explores, viscerally and emphatically, how Europe's increasingly powerful border regime meets and interacts with its target—the clandestine migrant. This vivid, rich work examines the subterranean migration flow from Africa to Europe, and shifts the focus from the "illegal immigrants" themselves to the vast industry built around their movements. This fascinating and accessible book is a must-read for anyone interested in the politics of international migration and the changing texture of global culture.

The Migrants Bloomsbury Publishing

This book provides a comprehensive study of border control: from data analysis and information warfare, frameworks for command and control, and game-theoretic risk management, up to the (optimal) deployment of law enforcement missions. Innovative about this book is that it approaches the subject from several angles, aiming to connect theory and practice of law enforcement missions with risk management and/or quantitative modelling. Some chapters focus on legal challenges and information warfare, while others provide quantitative modelling of military asset deployment in the area of interest, or show the benefits of cooperative wireless sensor networks for border control. A case study of the Dutch Border Security Team supplements the theory. The publication is ideally suited for reference use by students, academicians, researchers and professionals in the field of border control and related areas. H. Monsuur is Professor of Military Operations Research, J.M. Jansen is Associate Professor of Operational ICT, and F.J. Marchal is Lecturer of International/Military Law at the Faculty of Military Sciences of the Netherlands Defence Academy in Den Helder, The Netherlands.

The American Review of Reviews Random House

This is the first book to provide a detailed treatment of the field of larval ecology. The 13 chapters use state-of-the-art reviews and critiques of nearly all of the major topics in this diverse and rapidly growing field. Topics include: patterns of larval diversity, reproductive energetics, spawning ecology, life history theory, larval feeding and nutrition, larval mortality, behavior and locomotion, larval transport, dispersal, population genetics, recruitment dynamics and larval evolution. Written by the leading new scientists in the field, chapters define the current state of larval ecology and outline the important questions for future research.

American Monthly Review of Reviews Texas A&M University Press

A close look at one season in one key site that reveals the amazing science and magic of spring bird migration, and the perils of human encroachment. Every spring, billions of birds sweep north, driven by ancient instincts to return to their breeding grounds. This vast parade often goes unnoticed, except in a few places where these small travelers concentrate in large numbers. One such place is along Lake Erie in northwestern Ohio. There, the peak of spring migration is so spectacular that it attracts bird watchers from around the globe, culminating in one of the world's biggest birding festivals. Millions of winged migrants pass through the region, some traveling thousands of miles, performing epic feats of endurance and navigating with stunning accuracy. Now climate change threatens to disrupt patterns of migration and the delicate balance between birds, seasons, and habitats. But wind farms—popular as green energy sources—can be disastrous for birds if built in the wrong places. This is a fascinating and urgent study of the complex issues that affect bird migration.

Social Change and Internal Migration Springer

New York Times Notable Book 2018; Foreign Affairs Best Book of

2018; Lois Roth Award Winner An unforgettable German bestseller about the European refugee crisis: "Erpenbeck will get under your skin" (Washington Post Book World) *Go, Went, Gone* is the masterful new novel by the acclaimed German writer Jenny Erpenbeck, "one of the most significant German-language novelists of her generation" (The Millions). The novel tells the tale of Richard, a retired classics professor who lives in Berlin. His wife has died, and he lives a routine existence until one day he spies some African refugees staging a hunger strike in Alexanderplatz. Curiosity turns to compassion and an inner transformation, as he visits their shelter, interviews them, and becomes embroiled in their harrowing fates. *Go, Went, Gone* is a scathing indictment of Western policy toward the European refugee crisis, but also a touching portrait of a man who finds he has more in common with the Africans than he realizes. Exquisitely translated by Susan Bernofsky, *Go, Went, Gone* addresses one of the most pivotal issues of our time, facing it head-on in a voice that is both nostalgic and frightening.

Migration and Climate Change Edward Elgar Publishing

V. 43-44, 50 include the proceedings of the convention of the International seamen's union of America, 31st-33rd (1929-1936) *Routledge Handbook of Environmental Displacement and Migration* HarperCollins

The 2016 winner of the Walt Whitman Award of the Academy of American Poets, selected by Carolyn Forché When I make the crossing, you must not be taken no matter what the current gives. When we reach the camp, there will be thousands like us. If I make it onto the plane, you must follow me to the roads and waiting pastures of America. We will not ride the water today on the shoulders of buffalo as we used to many years ago, nor will we forage for the sweetest mangoes. I am refugee. You are too. Cry, but do not weep. —from "Transmigration" *Afterland* is a powerful, essential collection of poetry that recounts with devastating detail the Hmong exodus from Laos and the fate of thousands of refugees seeking asylum. Mai Der Vang is telling the story of her own family, and by doing so, she also provides an essential history of the Hmong culture's ongoing resilience in exile. Many of these poems are written in the voices of those fleeing unbearable violence after U.S. forces recruited Hmong fighters in Laos in the Secret War against communism, only to abandon them after that war went awry. That history is little known or understood, but the three hundred thousand Hmong now living in the United States are living proof of its aftermath. With poems of extraordinary force and grace, *Afterland* holds an original place in American poetry and lands with a sense of humanity saved, of outrage, of a deep tradition broken by war and ocean but still intact, remembered, and lived.

NL ARMS Netherlands Annual Review of Military Studies 2018 Penguin

Geoinformatics for Marine and Coastal Management provides a timely and valuable assessment of the current state of the art geoinformatics tools and methods for the management of marine systems. This book focuses on the cutting-edge coverage of a wide spectrum of activities and topics such as GIS-based application of drainage basin analysis, contribution of ontology to marine management, geoinformatics in relation to fisheries management, hydrography, indigenous knowledge systems, and marine law enforcement. The authors present a comprehensive overview of the field of Geoinformatic Applications in Marine Management covering key issues and debates with specific case studies illustrating real-world applications of the GIS technology. This "box of tools" serves as a long-term resource for coastal zone managers, professionals, practitioners, and students alike on the management of oceans and the coastal fringe, promoting the approach of allowing sustainable and integrated use of oceans to maximize opportunities while keeping risks and hazards to a minimum.
