The evaluation of reproductive, maternal, newborn, and child health (RMNCH) by the Disease Control Priorities, Third Edition (DCP3) focuses on maternal conditions, childhood illness, and malnutrition. Specifically, the chapters address acute illness and undernutrition in children, principally under age 5. It also covers maternal mortality, morbidity, stillbirth, and influences to

pregnancy and pre-pregnancy. Volume 3 focuses on developments since the publication of DCP2 and will also include the transition to older childhood, in particular, the overlap and commonality with the child development volume. The DCP3 evaluation of these conditions produced three key findings: 1. There is significant difficulty in measuring the burden of key conditions such as unintended pregnancy, unsafe abortion, nonsexually transmitted infections, infertility, and violence against women. 2. Investments in the continuum of care can have significant returns for improved and equitable access, health, poverty, and health systems. 3. There is a large difference in how RMNCH conditions affect different income groups; investments in RMNCH can lessen the disparity in terms of both health and financial risk.

Mr Dorrit's satisfaction in remembering that it had not been necessary for him to announce himself to Clennam and Co., or to make an allusion to his having had any knowledge of the intrusive person of that name, had been damped over-night, while it was still fresh, by a debate that arose within him whether or no he should take the Marshalsea in his way back, and look at

the old gate. He had decided not to do so; and had astonished the coachman by being very fierce with him for proposing to go over London Bridge and recross the river by Waterloo Bridge—a course which would have taken him almost within sight of his old quarters. Still, for all that, the question had raised a conflict in his breast; and, for some odd reason or no reason, he was vaguely dissatisfied. Even at the Merdle dinner-table next day, he was so out of sorts about it that he continued at intervals to turn it over and over, in a manner frightfully inconsistent with the good society surrounding him. It made him hot to think what the Chief Butler's opinion of him would have been, if that illustrious personage could have plumbed with that heavy eye of his the stream of his meditations.

Preserving the Promise: Improving the Culture of Biotech
Investment critically examines why most biotech startups fail, as they emerge from universities into an ecosystem that inhibits

rather than encourages innovation. This "Valley of Death" squanders our public investments in medical research and with them, the promise of longer and healthier lives. The authors explicate the Translation Gap faced by early stage biotech companies, the result of problematic technology transfer and investment practices, and provide specific prescriptions for improving translation of important discoveries into safe and effective therapies. In *Preserving the Promise*, Dessain and Fishman build on their collective experience as company founders, healthcare investor (Fishman) and physician/scientist (Dessain). The book offers a forward-looking, critical analysis of "conventional wisdom" that encumbers commercialization practices. It exposes the self-defeating habits of drug development in the Valley of Death, that waste money and extinguish innovative technologies through distorted financial incentives. Explains why translation of biotech discovery into medicine succeeds so infrequently that it's been dubbed the Valley of Death Uncovers specific decision-making strategies that more effectively align incentives, improving clinical and financial outcomes for investors, inventor/entrepreneurs, and patients Examines the critical, early stages of commercialization, where technology transfer offices and Angels act as gatekeepers to development, and where tension between short-term financial and long-term clinical aspirations sinks important technologies Deconstructs the forces driving biotech, recasts them in a proven conceptual framework, and offers practical guidance for making the system better
