Introductory Medical-Surgical Nursing General Nursing - Medical and Surgical Textbook
 PLEASE PROVIDE COURSE INFORMATION This convenient and easy-to-read reference is designed for those responsible for care planning of common medical conditions and surgical procedures. The third edition includes 92 nursing care plans incorporating new conditions and extensive revisions as well as information on care planning in the home. This book is presented by systems, and each care plan consists of six divisions of information: Title, Definition, Nursing Diagnoses, Expected Outcomes, Interventions (assess, monitor, describe, record, administer, perform/provide, teach patient/family) and Rationale.

Nursing Care Plans Elsevier Health Sciences

Get the solid foundation you need to pass the NCLEX-PN® exam and succeed in practice! deWit's Medical-Surgical Nursing: Concepts and Practice, 4th Edition builds on the fundamentals of nursing

with complete coverage of adult medical-surgical conditions, including roles, settings, health care trends, and all body systems and their disorders. It provides special attention to care of older adults, those with chronic illnesses, and residents in long-term care settings. Written by nursing educator Holly Stromberg, deWit's Medical-Surgical Nursing makes exam prep easier with NCLEX-PN® review questions, and reflects national LPN/LVN standards with an emphasis on evidence-based practice and patient safety. Safety alerts emphasize safety precautions to protect patients, family, health care providers, and the public from accidents, spread of disease, and medication-related accidents. Older Adult Care Points address the unique care issues of gerontologic nursing, and describe assessment and interventions for long-term care patients. Nursing care plans show plans of care based on patient history, including patient goals and outcomes, with critical thinking questions allowing you to assess your understanding of nursing care concepts. Assignment Considerations cover task delegation from the RN to the LPN/LVN and from the LPN/LVN to unlicensed assistive personnel, as allowed by each state's nurse practice act. Get Ready for the NCLEX® Examination! section at the end of each chapter covers key points and includes review

questions to help you prepare for class tests and the NCLEX-PN examination. Focused Assessment boxes show how to collect patient data, including history, physical, and psychosocial assessment. Home Care Considerations focus on adapting medical-surgical nursing care to the home environment after discharge. Cultural Considerations promote understanding of various ethnic groups and sensitivity to differing beliefs and practices. Communication boxes help in developing therapeutic communication skills in realistic patient care situations. Patient Teaching boxes provide instructions and guidelines for educating patients on post-hospital care. Legal and Ethical Considerations describe legal issues and ethical dilemmas that may face the practicing nurse. Think Critically encourages you to synthesize information and apply concepts to practice. Nutrition Considerations emphasize the role nutrition plays in disease and nursing care. Medication tables provide quick access to dosages and side effects of commonly used medications. Key terms include phonetic pronunciations and text page references, making learning easier with terms listed at the beginning of each chapter, appearing in blue at first mention or where defined in the text, and defined in the glossary.

Adult Health Nursing - E-Book Elsevier Health Sciences

The bestselling nursing care planning book on the market, *Nursing Care Plans: Diagnoses, Interventions, and Outcomes*, 8th Edition covers the most common medical-surgical nursing diagnoses and clinical problems seen in adults. It includes 217 care plans, each reflecting the latest evidence and best practice guidelines. NEW to this edition are 13 new care plans and two new chapters including care plans that address health promotion and risk factor management along with basic nursing concepts that apply to multiple body systems. Written by expert nursing educators Meg Gulanick and Judith Myers, this reference functions as two books in one, with 147 disorder-specific and health management nursing care plans and 70 nursing diagnosis care plans to use as starting points in creating individualized care plans. 217 care plans --- more than in any other nursing care planning book. 70 nursing diagnosis care plans include the most common/important NANDA-I nursing diagnoses, providing the building blocks for you to create your own individualized care plans for your own patients. 147 disorders and health promotion care plans cover virtually every common medical-surgical condition, organized by body system. Prioritized care planning guidance organizes care plans from actual to risk diagnoses, from general to specific interventions, and from independent to collaborative interventions. Nursing diagnosis care plans format includes a definition and explanation of the diagnosis, related factors, defining characteristics, expected outcomes, related NOC outcomes and NIC interventions, ongoing assessment, therapeutic interventions, and education/continuity of care. Disorders care plans format includes synonyms for the disorder (for easier cross referencing), an explanation of the diagnosis, common related factors, defining characteristics, expected outcomes, NOC outcomes and NIC interventions, ongoing assessment, and therapeutic interventions. Icons differentiate independent and collaborative nursing interventions. Student resources on the Evolve companion website include 36 of the book's care plans - 5 nursing diagnosis care plans and 31 disorders care plans. Three NEW nursing diagnosis care plans include Risk for Electrolyte Imbalance, Risk for Unstable Blood Glucose Level, and Risk for Bleeding. Six NEW health promotion/risk factor management care plans include Readiness for Engaging in a Regular Physical Activity Program, Readiness for Enhanced Nutrition, Readiness for Enhanced Sleep, Readiness for Smoking Cessation, Readiness for Managing Stress, and Readiness for Weight Management. Four NEW disorders care plans include Surgical Experience: Preoperative and Postoperative Care, Atrial Fibrillation, Bariatric Surgery, and Gastroenteritis. NEW Health Promotion and Risk Factor Management Care Plans chapter emphasizes the importance of preventive care and teaching for self-management. NEW Basic Nursing Concepts Care Plans chapter focuses on concepts that apply to disorders found in multiple body systems. UPDATED care plans ensure consistency with the latest U.S. National Patient Safety Goals and other evidence-based national treatment guidelines. The latest NANDA-I taxonomy keeps you current with 2012-2014 NANDA-I nursing diagnoses, related factors, and defining characteristics. Enhanced rationales include explanations for nursing interventions to help you better understand what the nurse does and why.

Textbook of Basic Nursing Rodgers, Thomson Delmar Learni

Master the LPN/LVN's role and responsibilities in medical-surgical nursing! With coverage organized by body systems, *Adult Health Nursing*, 9th Edition provides an essential guide to nursing care for patients with common disorders. Through use of the nursing process, you will develop clinical judgment skills to assess patient needs, develop nursing care plans, and plan effective nursing interventions. Case studies provide practice with critical thinking and clinical judgment, and new Next Generation NCLEX®-format questions help you apply theory to practice. Written by nursing educators Kim Cooper and Kelly Gosnell, this text also helps you prepare for success on the NCLEX-PN® examination. Step-by-step instructions for skills show clearly defined nursing actions along with the rationales for each. Overview of Anatomy and Physiology begins each body systems chapter, and the Introduction to Anatomy and Physiology chapter provides a clear, basic understanding of the A&P that LPN/LVNs need to know. The nursing process is applied to the discussion of disorders, and is summarized at the end of each chapter. Nursing care plans use a case-study format to emphasize patient goals and outcomes, and include critical thinking questions at the end of each care plan. Evidence-Based Practice boxes provide synopses of research articles that apply to nursing, along with nursing implications for the LPN/LVN. Safety Alert! boxes cover issues related to safe patient care in a variety of settings. Coordinated Care boxes promote comprehensive patient care with other members of the health care team, focusing on prioritization, assignment, supervision, collaboration, delegation, and leadership topics. Lifespan Considerations boxes provide age-specific information for the care of the patient. Older

Adult Considerations boxes provide age-specific information for the care of the aging population, which is often the primary focus of the LPN/LVN nurse. Communication boxes illustrate communication strategies through real-life examples of nurse-patient dialogue. Patient Teaching boxes focus on three-way communication among the nurse, patient, and family members, and include topics such as hospital discharge instructions. Health Promotion Considerations boxes highlight information on wellness and disease prevention, including infection control, diet, and pregnancy. Home Health Considerations boxes discuss issues facing patients and their caregivers in the home setting. Medication tables provide quick access to action, dosage, precautions, and nursing considerations for commonly used drugs. Get Ready for the NCLEX® Examination sections provide key points, review questions, and critical thinking activities to reinforce learning.

For Adults in Acute, Extended and Home Care Settings Elsevier Health Sciences
Delmar's Medical-Surgical Nursing Care Plans will help you develop specific and effective nursing care plans for your adult patients with the most commonly presented disorders. Each care plan includes information to guide you in creating comprehensive individualized nursing care plans based on solid scientific understanding of the condition and how it affects each of the patient's body systems. Care plans solicit specific patient data and prompt you to individualize the interventions while evaluating the patient's response. Delmar is a part of Cengage Learning.

Health Information Technology - E-Book Pearson Higher Education AU

Published in partnership with American Pediatric Surgical Nurses Association (APSNA), *Nursing Care of the Pediatric Surgical Patient*, Third Edition is the must-have resource for all healthcare providers involved in the care of the general pediatric surgical patient. Representing the educational mission of APSNA to improve the nursing care of pediatric surgical patients, this textbook includes information on pre- and post-operative care, minimally invasive surgery, innovative therapies, surgically treated congenital anomalies, pediatric solid tumors, and care of tubes, drains, wounds, and ostomies. This text teaches readers how to be technologically savvy, clinically competent, and able to tend to emotional and psychosocial needs of the child and family. Completely updated and revised, this new edition includes an expanded focus on topics such as organ transplantation, pain, bowel management, and fluid and electrolytes.

Home Health Nursing Care Plans Jones & Bartlett Publishers

Build the nursing knowledge and skills you need to care for patients of all ages! Combining two leading LPN/LVN textbooks into one volume, *Foundations and Adult Health Nursing*, 9th Edition covers the fundamental skills and medical-surgical content essential to providing quality care for patients across the lifespan, including pediatric, maternity, adult, and older adult patients. Case studies provide practice with critical thinking and clinical judgment, and new Next Generation NCLEX®-format questions help you apply theory to practice. Written by nursing educators Kim Cooper and Kelly Gosnell, this text also helps you prepare for success on the NCLEX-PN® examination.

Using TLC Medical Center, a Simulated Patient Information System Elsevier Health Sciences

Introducing a plan for success with the only nursing care planning reference book for all core clinical areas! Swearingen's All-In-One Nursing Care Planning Resource, 5th Edition, features over 100 care plans including medical-surgical, maternity/OB, pediatrics, and psychiatric-mental health to help you care for patients in any setting. This new edition is the first in the market to include a unique, interprofessional, "patient problem" focus that teaches students how to speak to patients in conversational terms rather than in nursing-specific language. New non-medical-surgical care plans and updated content throughout reflect the latest evidence-based treatment guidelines for national and international clinical practice. Plus, with its clear approach, easy-to-use format, and straightforward rationales, you can use this one book throughout their entire nursing curriculum! Bolded and highlighted Safety Icons corresponds to the safety competency of the Quality and Safety Education for Nurses (QSEN) initiative for easier recognition. Care plans for all four major clinical areas include medical-surgical, OB/maternity, pediatric, and psychiatric-mental health nursing care plans. A consistent format for each care plan enables you to perform faster searches, with headings for Overview/Pathophysiology, Health Care Setting, Assessment, Diagnostic Tests, Patient Problems, Desired Outcomes, Interventions with Rationales, and Patient-Family Teaching and Discharge Planning. Prioritized patient problems are listed in order of importance and physiologic patient needs. Detailed rationales for each nursing intervention help you apply concepts to specific patient situations in clinical practice. Full-color design makes the book more user friendly and includes color-coded tabs and improved cross-referencing and navigation aids for

faster information retrieval. NEW! UNIQUE! Interprofessional "patient problems" focus familiarizes you with how to speak to patients and other medical colleagues in the consistent interprofessional language of "patient problems," rather than the nursing-specific language of nursing diagnosis. NEW! Care plans helps you to support the lesbian, gay, bisexual, transgender, queer/questioning, or intersex patient. NEW! Updated content throughout reflects the latest evidence-based treatment guidelines and national and international clinical practice guidelines.

An Evidence-Based Guide Mosby

The leading medical-surgical text for LPN/LVN students, *Linton's Introduction to Medical-Surgical Nursing*, 6th Edition offers just the right level of information to equip today's students to effectively care for adults and older adults. Covering both medical-surgical and psychiatric mental health conditions and disorders, this comprehensive text addresses the LPN/LVN's role in a variety of care settings, including acute care and long-term care, with a special emphasis on assignment and supervision responsibilities. It also emphasizes culturally competent care and holistic nursing, while thoroughly covering all relevant NCLEX-PN test plan content No other resource offers the breadth of topics at a level that is so perfectly tailored to the LPN/LVN student. Foundational units on basic concepts related to the health care system, care settings, the nursing process, leadership, nutrition, the older adult, growth and nutrition, legal/ethical considerations, evidence-based nursing care, and many more essential topics, avoid repetition later in the text and create a foundation to build your understanding of disorders by body system. Safety alerts are highlighted throughout the text with a Safety Considerations icon. A separate unit on psychiatric mental health nursing covers psychosocial responses to illness, psychiatric disorders, and substance abuse - eliminating the need for a separate psychiatric mental health nursing text. Content related to the NCLEX-PN test plan is emphasized throughout the text, including health promotion, nutrition, legal/ethical issues, HIPAA, and prevention of medication/medical errors. Separate chapters on common, high-profile disorders (including hypertension, diabetes, and shock), provide an in-depth understanding for patient care. Focus on assignment and supervision helps you assign tasks to nurse assistants, patient care techs, and unlicensed assistive personnel, and makes sure they understand the difference between delegation, management, supervision, and assignment of tasks on the health care team. UNIQUE! In-depth pharmacology coverage includes: the Pharmacology Tutorial covering drug classifications, how drugs work, and nursing responsibilities; Pharmacology Capsules boxes providing medication information, precautions for use, interactions, and side/adverse effects; and Pharmacology and Medications tables including classification, use/action, side/adverse effects, and nursing interventions. A separate unit on gerontologic nursing provides comprehensive coverage of the care of the older adult and related disorders. No other LPN/LVN med-surg text offers as much coverage of this primary patient group. Diagnostic Tests and Procedures tables offer quick reference to MRI, CT, Doppler flow, lumbar puncture tests for neurologic disorders, and much more. Health Promotion Considerations boxes highlight timely wellness and disease prevention topics. Patient Teaching Plans provide bulleted lists of nursing instructions for patients, stressing the role and responsibility of the LPN/LVN to reinforce patient education. Nutrition Considerations boxes are spotlighted at appropriate points throughout the text to emphasize the role that nutrition plays in disease and nursing care. Nursing care plans reinforce the nursing process and focus on critical thinking. Cultural Considerations boxes discuss the importance of providing culturally-competent care related to various clinical situations. Put on Your Thinking Cap boxes allow you to pause and consider the practical implications of what you have just read. Get Ready for the NCLEX-PN Examination! sections at the end of chapters include key points, review questions, and case studies that address the various NCLEX Client Needs categories. NEW! Continued emphasis on evidence-based practice and the most current research findings include specific examples of how scientific evidence can justify and support patient care. NEW! Updated nursing diagnoses all reflect the most current NANDA listings for NCLEX compliance.

General Nursing - Medical and Surgical Textbook Elsevier Health Sciences

Now in its updated Fourth Edition, this best-selling handbook is the most comprehensive pocket-sized guide to medical-surgical nursing. More than 300 disorders and treatments are covered in alphabetical order in a consistent quick-reference format, with icons, sidebars, alerts, illustrations, and tables to highlight key points. This edition covers bioterrorism-related disorders and new treatments such as enhanced external counterpulsation therapy and cardiac resynchronization therapy. A new icon highlights gender differences. Laboratory test results now include SI values. A new appendix on emergency preparedness is included.

Guidelines for Individualizing Client Care Across the Life Span Pearson South Africa

This 11th Edition of Timby and Smith's popular text equips LPN/LVN students with the practical knowledge and skills necessary to provide safe and effective nursing care to today's medical-surgical clients. Now enhanced with new research, techniques, and clinical competencies, exciting new concept maps that help students focus and think critically about their clients, a new art program featuring hundreds of illustrations and photographs, new evidence-based practice boxes, and new NCLEX-PN questions, the 11th edition prepares students to manage nursing care of clients in today's changing healthcare environments and eases the transition from classroom to clinical practice.

Concepts & Practice F.A. Davis

A reference to help nursing students and practising nurses select a nursing diagnosis and write plans of care with ease and confidence. The book provides care plans for every NANDA diagnosis and provides a quick access index of appropriate nursing diagnoses for over 1200 clinical entities. *Brunner & Suddarth's Textbook of Medical-surgical Nursing* Lippincott Williams & Wilkins Revised for nursing students, educators, and practicing nurses, this complete reference contains almost 100 comprehensive clinical care plans for adult patients in medical-surgical units. New to this edition are care plans for acute alcohol withdrawal, hypertensive crisis, Parkinson's disease, sickle cell disease, transplantation, and end of life.

deWit's Medical-Surgical Nursing E-Book Elsevier Health Sciences

This comprehensive reference helps in creating care plans for clients in the medical-surgical, extended care, or home care environments. Covering over 60 individual disorders, these detailed care plans feature a definition/discussion of the disorder, outcome/discharge criteria, nursing and collaborative diagnoses, and more. It can be used as a resource to assist students and practicing nurses in planning individualized care for medical-surgical clients.

Medical-Surgical, Pediatric, Maternity, and Psychiatric-Mental Health Saunders

The book packages all aspects of the pediatric surgical nurse's job into one comprehensive reference, including pre- and post-operative care, minimally invasive surgery, innovative therapies, fetal surgery, pediatric solid organ transplantation, and more. It offers up-to-date information on pediatric surgical nursing and includes many critical pathways and research topics. It is a must-have resource for all healthcare providers involved in the care of the general pediatric surgical patient.

Nursing Care Plans Springer

Providing a solid foundation in medical-surgical nursing, Susan deWit's *Medical-Surgical Nursing: Concepts and Practice*, 3rd Edition ensures you have the information you need to pass the NCLEX-PN® Examination and succeed in practice. Part of the popular LPN/LVN Threads series, this

uniquely understandable, concise text builds on the fundamentals of nursing, covering roles, settings, and health care trends; all body systems and their disorders; emergency and disaster management; and mental health nursing. With updated content, chapter objectives, and review questions, this new edition relates national LPN/LVN standards to practice with its integration of QSEN competencies, hypertension, diabetes, and hypoglycemia. Concept Maps in the disorders chapters help you visualize difficult material, and illustrate how a disorder's multiple symptoms, treatments, and side effects relate to each other. Get Ready for the NCLEX® Examination! section includes Key Points that summarize chapter objectives, additional resources for further study, review questions for the NCLEX® Examination, and critical thinking questions. Nursing Care Plans with critical thinking questions provide a clinical scenario and demonstrate application of the nursing process with updated NANDA-I nursing diagnoses to individual patient problems. Anatomy and physiology content in each body system overview chapter provides basic information for understanding the body system and its disorders, and appears along with Focused Assessment boxes highlighting the key tasks of data collection for each body system. Assignment Considerations, discussed in Chapter 1 and highlighted in feature boxes, address situations in which the RN delegates tasks to the LPN/LVN, or the LPN/LVN assigns tasks to nurse assistants, per the individual state nurse practice act. Gerontologic nursing presented throughout in the context of specific disorders with Elder Care Points boxes that address the unique medical-surgical care issues that affect older adults. Safety Alert boxes call out specific dangers to patients and teach you to identify and implement safe clinical care. Evidence-based Practice icons highlight current references to research in nursing and medical practice. Patient Teaching boxes provide step-by-step instructions and guidelines for post-hospital care — and prepare you to educate patients on their health condition and recovery. Health Promotion boxes address wellness and disease prevention strategies that you can provide in patient teaching.

All-in-One Nursing Care Planning Resource - E-Book BoD – Books on Demand

While managed care has reduced the length of hospital stays for pediatric as well as older patients, nurses still mercifully recognize the unique needs of children undergoing surgery. Following chapters on psychological preparation of the patient and their parents and other special considerations, s

Medical-surgical Nursing Care Planning Guides Mosby Incorporated

This is the Second Edition of the popular Canadian adaptation of Brunner and Suddarth's *Textbook of Medical-Surgical Nursing*, by Day, Paul, and Williams. Woven throughout the content is new and updated material that reflects key practice differences in Canada, ranging from the healthcare system, to cultural considerations, epidemiology, pharmacology, Web resources, and more.

Nursing Diagnosis and Intervention Elsevier Health Sciences

Unlike any other care plan book on the market, this resource contains selected care plans for pediatric, maternity, and psychiatric nursing in addition to medical-surgical nursing care plans for adult care. This is the only care planning resource that allows you to use one book throughout your nursing curriculum. Color-coded medical-surgical, maternity, pediatric, and psychiatric sections help you quickly find each content area while giving the book a full-color look and feel. Clinical experts update each subject area to ensure the most current, accurate, and clinically relevant content available. Each care plan employs a consistent format of Overview/Pathophysiology, Health Care Setting, Assessment, Diagnostic Tests, Nursing Diagnoses, Desired Outcomes, Interventions with Rationales, and Patient-Family Teaching and Discharge Planning. An open and attractive two-color design facilitates quick and easy retrieval of information. Nursing interventions and rationales are listed in a clear two-column format to make the information more accessible. Related NIC intervention and NOC outcome labels are listed for each nursing diagnosis. The Patient-Family Teaching and Discharge Planning section highlights key patient education topics and list resources for further information. Health Care Setting is specified for each care plan, since different conditions are treated in various settings such as hospital, primary care, long-term care facility, community, and home care. Outcome criteria with specific timelines enable nurses to set realistic goals for nursing outcomes and provide quality, cost-effective care. Detailed rationales for each nursing intervention help you to apply concepts to clinical practice. Includes the most recent NANDA Taxonomy II nursing diagnoses. Separate care plans on Pain and Palliative and End-of-Life Care focus on palliative care for patients with terminal illnesses, as well as relief of acute and chronic pain. A new "Overview/Pathophysiology" heading helps you easily locate this key content. Nursing diagnoses listed in order of importance/physiologic need helps you learn about prioritization. All content has been thoroughly updated to cover the latest clinical developments, including the most recent JNC7 hypertension guidelines, the latest breast cancer screening and treatment information, revised cholesterol parameters, new drug therapies, and much more. Patient teaching content and abbreviations have been thoroughly revised to reflect the latest JCAHO guidelines. Expanded and clarified rationales help you understand each intervention more clearly.
