All I Eat Is Medicine Oxford University Press
 Bringing together the experience, perspective and expertise of Paul Farmer, Jim Yong Kim, and Arthur Kleinman, *Reimagining Global Health* provides an original, compelling introduction to the field of global health. Drawn from a Harvard course developed by their student Matthew Basilio, this work provides an accessible and engaging framework for the study of global health. Insisting on an approach that is historically deep and geographically broad, the authors underline the importance of a transdisciplinary approach, and offer a highly readable distillation of several historical and ethnographic perspectives of contemporary global health problems. The case studies presented throughout *Reimagining Global Health* bring together ethnographic, theoretical, and historical perspectives into a wholly new and exciting investigation of global health. The interdisciplinary approach outlined in this text should prove useful not only in schools of public health, nursing, and medicine, but also in undergraduate and graduate classes in anthropology, sociology,

political economy, and history, among others.

Violence in War and Peace Duke University Press

All I Eat Is Medicine charts the lives of individuals and the operation of institutions in the thick of the AIDS epidemic in Mozambique during the global scale-up of treatment for HIV/AIDS at the turn of the twenty-first century. Even as the AIDS treatment scale-up saved lives, it perpetuated the exploitation and exclusion that was implicated in the propagation of the epidemic in the first place. This book calls attention to the global social commitments and responsibilities that a truly therapeutic global health requires.

The Making of a Teenage Service Class University of Chicago Press

Thoroughly revised and fully updated, *An Introduction to Sociology* gives concise yet comprehensive coverage of all the topics specified by the GCSE examining boards. The second edition was described by the AQA's Chief Examiner for GCSE Sociology as establishing 'the standard for textbooks at this level' - this new edition builds on the book's existing achievements. New material is found throughout the book, including substantive new sections on gender, identity, citizenship, education, new

social movements, poverty and the welfare state, religion, the mass media, work and leisure, and population. The book has been carefully designed to support and extend students' learning. Each chapter begins with a summary of the key issues to be covered, and goes on to highlight important terms, which are then explained in a clear glossary. Summaries at the end of each chapter, a lively range of new activities and discussion points, the use of websites, as well as helpful suggestions for coursework, all add to the book's value as a learning and teaching resource. Student-friendly cartoons, tables, diagrams, and photographs - and the re-designed internal lay-out - also enliven the text, making sociology seem exciting and relevant to students of all interests and abilities. The new edition of this highly successful textbook will prove invaluable to anyone taking an introductory sociology course, especially at GCSE and related levels. Students taking AS and A-level - as well as Access, nursing, and health and social care courses - will also find the book provides an easy and fun introduction to studying sociology.

What is the role of the ambulance in the American city? The prevailing narrative provides a rather simple answer: saving and transporting the critically ill and injured. This is not an incorrect description, but it is incomplete. Drawing on field observations, medical records, and his own experience as a novice emergency medical technician, sociologist Josh Seim reimagines paramedicine as a frontline institution for governing urban suffering. Bandage, Sort, and Hustle argues that the ambulance is part of a fragmented regime that is focused more on neutralizing hardships (which are disproportionately carried by poor people and people of color) than on eradicating the root causes of agony. Whether by compressing lifeless chests on the streets or by transporting the publicly intoxicated into the hospital, ambulance crews tend to handle suffering bodies near the bottom of the polarized metropolis. Seim illustrates how this work puts crews in recurrent, and sometimes tense, contact with the emergency department nurses and police officers who share their clientele. These street-level relations, however, cannot be understood without considering the bureaucratic and capitalistic forces that control and coordinate ambulance labor from above. Beyond the ambulance, this book motivates a labor-centric model for understanding the frontline governance of down-and-out populations.

The Trobrianders of Papua New Guinea Univ of California Press

"How are spiritual power and self-transformation cultivated in street ministries? In *Addicted to Christ*, Helena Hansen provides an in-depth analysis of Pentecostal ministries in Puerto Rico that were founded and managed by self-identified 'ex-addicts.' Richly ethnographic, the book melds Hansen's dual expertise in public anthropology and psychology. Through her interviewees' stories, she examines key elements of the Pentecostal system: mysticism, ascetic practice, and the idea other-worldliness. She then shares the strategies of Pentecostal ministries, which, according to street ministries, are the core elements of spiritual victory over addiction: transformation techniques to build spiritual strength and authority through pain and discipline; cultivation of alternative masculinities based on male converts' reclamation of domestic space; and radical rupture from a post-industrial 'culture of disposability.' By contrasting the ministries'

logic of addiction with that of biomedicine, Hansen rethinks roads to recovery while discovering unexpected convergences with biomedicine, revealing the true sway of street corner ministries"-- Provided by publisher.

Nightmarch Univ of California Press

In the Americas, debates around issues of citizen's public safety--from debates that erupt after highly publicized events, such as the shootings of Jordan Davis and Trayvon Martin, to those that recurrently dominate the airwaves in Latin America--are dominated by members of the middle and upper-middle classes. However, a cursory count of the victims of urban violence in the Americas reveals that the people suffering the most from violence live, and die, at the lowest of the socio-symbolic order, at the margins of urban societies. The inhabitants of the urban margins are hardly ever heard in discussions about public safety. They live in danger but the discourse about violence and risk belongs to, is manufactured and manipulated by, others--others who are prone to view violence at the urban margins as evidence of a cultural, or racial, defect, rather than question violence's relationship to economic and political marginalization. As a result, the experience of interpersonal violence among the urban poor becomes something unspeakable, and the everyday fear and trauma lived in relegated territories is constantly muted and denied. This edited volume seeks to counteract this pernicious tendency by putting under the ethnographic microscope--and making public--the way in which violence is lived and acted upon in the urban peripheries. It features cutting-edge ethnographic research on the role of violence in the lives of the urban poor in South, Central, and North America, and sheds light on the suffering that violence produces and perpetuates, as well as the individual and collective responses that violence generates, among those living at the urban margins of the Americas.

Revised and updated, the 2nd Edition of *Living Language: An Introduction to Linguistic Anthropology* presents an accessible introduction to the study of language in real-life social contexts around the world through the contemporary theory and practice of linguistic anthropology. Presents a highly accessible introduction to the study of language in real-life social contexts around the world Combines classic studies on language and cutting-edge contemporary scholarship and assumes no prior knowledge in linguistics or anthropology Features a series of updates and revisions for this new edition, including an all-new chapter on forms of nonverbal language Provides a unifying synthesis of current research and considers future directions for the field

Kenyan Khat University of California Press

On April 26, 1986, Unit Four of the Chernobyl nuclear reactor exploded in then Soviet Ukraine. More than 3.5 million people in Ukraine alone, not to mention many citizens of surrounding countries, are still suffering the effects. *Life Exposed* is the first book to comprehensively examine the vexed political, scientific, and social circumstances that followed the disaster. Tracing the story from an initial lack of disclosure to post-Soviet democratizing attempts to compensate sufferers, Adriana Petryna uses anthropological tools to take us into a world whose social realities are far more immediate and stark than those described by policymakers and scientists. She asks: What happens to politics when state officials fail to inform their fellow citizens of real threats to life? What are the moral and political consequences of remedies available in the wake of technological disasters? Through extensive research in state institutions, clinics, laboratories, and with affected families and workers of the so-called Zone, Petryna illustrates how the event and its aftermath have not only shaped the course of an independent

nation but have made health a negotiated realm of entitlement. She tracks the emergence of a "biological citizenship" in which assaults on health become the coinage through which sufferers stake claims for biomedical resources, social equity, and human rights. *Life Exposed* provides an anthropological framework for understanding the politics of emergent democracies, the nature of citizenship claims, and everyday forms of survival as they are interwoven with the profound changes that accompanied the collapse of the Soviet Union.

Narcotics Anonymous 6th Edition Softcover Univ of California Press

An *Anthropology of Biomedicine* is an exciting new introduction to biomedicine and its global implications. Focusing on the ways in which the application of biomedical technologies bring about radical changes to societies at large, cultural anthropologist Margaret Lock and her co-author physician and medical anthropologist Vinh-Kim Nguyen develop and integrate the thesis that the human body in health and illness is the elusive product of nature and culture that refuses to be pinned down. Introduces biomedicine from an anthropological perspective, exploring the entanglement of material bodies with history, environment, culture, and politics Develops and integrates an original theory: that the human body in health and illness is not an ontological given but a moveable, malleable entity Makes extensive use of historical and contemporary ethnographic materials around the globe to illustrate the importance of this methodological approach Integrates key new research data with more classical material, covering the management of epidemics, famines, fertility and birth, by military doctors from colonial times on Uses numerous case studies to illustrate concepts such as the global commodification of human bodies and body parts, modern forms of population, and the extension of biomedical technologies into domestic and intimate domains Winner of the 2010 Prose Award for Archaeology and Anthropology

Bad Cambridge University Press

Fresh Fruit, Broken Bodies provides an intimate examination of the everyday lives, suffering, and resistance of Mexican migrants in our contemporary food system. Seth Holmes, an anthropologist and MD in the mold of Paul Farmer and Didier Fassin, shows how market forces, anti-immigrant sentiment, and racism undermine health and health care. Holmes was invited to trek with his companions clandestinely through the desert into Arizona and was jailed with them before they were deported. He lived with Indigenous families in the mountains of Oaxaca and in farm labor camps in the United States, planted and harvested corn, picked strawberries, and accompanied sick workers to clinics and hospitals. This "embodied anthropology" deepens our theoretical understanding of the ways in which social inequities come to be perceived as normal and natural in society and in health care. In a substantive new epilogue, Holmes and Indigenous Oaxacan scholar Jorge Ramirez-Lopez provide a current examination of the challenges facing farmworkers and the lives and resistance of the protagonists featured in the book.

The Insecure American Case Studies in Cultural Anthr

This powerful work of gonzo journalism, predating the widespread acknowledgement of the opioid epidemic as such, immerses the reader in the world of homelessness and drug and alcohol abuse in the contemporary United States. For over a decade Philippe Bourgois and Jeff Schonberg followed a social network of two dozen heroin injectors and crack smokers in the San Francisco drug scene, accompanying them as they scrambled to generate income through burglary, larceny, panhandling, recycling, and day labor. *Righteous Dopefiend* interweaves stunning black-and-white photography with vivid dialogue, oral biography, detailed field notes, and critical theoretical analysis to viscerally illustrate

the life of a drug addict. Its gripping narrative develops a cast of characters around the themes of violence, racism and race relations, sexuality, trauma, embodied suffering, social inequality, and power relations. The result is a dispassionate chronicle of fixes and overdoses; of survival, loss, caring, and hope rooted in the drug abusers' determination to hang on for one more day, through a "moral economy of sharing" that precariously balances mutual solidarity and interpersonal betrayal.

Partner to the Poor John Wiley & Sons

Lyrical evoking the Española Valley and its residents through conversations, encounters, and recollections, *The Pastoral Clinic* is at once a devastating portrait of addiction, a rich ethnography of place, and an eloquent call for a new ethics of care. --amazon.com.

Anton Chekhov is revered as a boldly innovative playwright and short story writer - but he wrote more than just plays and stories. In this book, the author introduces readers to some other sides of Chekhov.

Bandage, Sort, and Hustle Duke University Press

"Dr. Paul Farmer is one of the most extraordinary people I've ever known. *Partner to the Poor* recounts his relentless efforts to eradicate disease, humanize health care, alleviate poverty, and increase opportunity and empowerment in the developing world. It will inspire us all to do our parts."--William J. Clinton "If the world is curious about Paul Farmer, there is a reason for that. No one has done more than he has in bringing modern medicine to the poor across the globe and no one has exceeded him in making us appreciate the diverse barriers that prevent proper medicine from reaching the underdogs of the world. In this wonderful collection of essays, putting together Paul Farmer's writings over more than two decades, we can see how his far-reaching ideas have developed and radically enhanced the understanding of the challenges faced by healthcare in the uneven world in which we live. This is an altogether outstanding book."--Amartya Sen, Nobel Laureate, Economics "To delve into these pages is to join one of the world's great explorers on an epic life journey--to grapple with culture, poverty, disease, health care, ethics, and ultimately our common humanity in the Age of AIDS. Paul Farmer is a pioneer, guide, and inspiration at a time of unprecedented contrasts: between wealth and poverty, power and powerlessness, health and disease, compassion and neglect. His medical expertise, anthropological vision, and unflinching decency have helped to recharge our world with moral purpose."--Jeffrey D. Sachs, Columbia University "Wow! Perfect for teaching. This is more than vintage Farmer. Editor Haun Saussy knows Farmer's work inside out and has assembled and organized 25 classic articles that project the heart of Farmer's brilliant, radical, inspiring, eminently practical and (dare I say) genuinely subversive work."--Philippe Bourgois, author of *Righteous Dopefiend* "If they gave Nobel Prizes for raising moral awareness, Paul Farmer would have won his a long time ago. For several decades now, his work has posed a challenge to anyone who dares say that radically improving the health of the world's poor can't be done. This splendid compilation of the best of his work allows us to follow a restless, creative, compassionate mind in

action, in and out of prisons and barrios and mud huts and hospital wards, from Haiti to Rwanda to Moscow, never taking 'no' for an answer."--Adam Hochschild, author of *Bury the Chains*
 "Paul Farmer is a deep scholar of Haitian society, a formidable medical anthropologist, an implacable theorist of structural violence and health as a human right, and an ethicist for whom the place of social justice in medicine and in the world is an existential need. This book is the platform of interconnected intellectual, academic, and practical engagements upon which the amazing, world-transforming life of Farmer stands."--Arthur Kleinman, author of *What Really Matters: Living a Moral Life amidst Uncertainty and Danger*
 "This collection shows the impressive catalytic effects of original scholarship when combined with action, activism, and a commitment to social justice in health. Paul Farmer and his PIH colleagues have twice

changed World Health Organization policies; they continue to have a lasting impact on the global health movement and on the lives of the poor."--Peter Brown, Emory University

With No Direction Home John Wiley & Sons

THE prison autobiography from the man who never stopped fighting.

Life Exposed Univ of California Press

An anthropologist based in New York City, Finkelstein did two summers of field work among street kids in the East Village, and presents her findings qualitatively, much of it in the voices of the youths themselves. She focuses on what leads kids to the streets and what they experience there. Annotation b2004 Book News, Inc., Portland, OR (booknews.com).
