Safe Sanctuaries
Springer

Respected missions thinker Robertson McQuilkin answers the question, "How is it, with so many unreached peoples, there are so few Christians going?" **White Rose History, Volume I [Academic Version]** CRC Press Like White Rose History Volume I (Regular Edition, ISBN 0-9710541-4-2), this book tells the complete story of how the students who came to be known as the White Rose decided to resist Hitler and the crimes of the Nazi Party. Unlike most extant literature, does not focus solely on Hans and Sophie Scholl, but widens the scope to include ALL who sacrificed their lives for this cause. Differs from regular edition because of footnotes and

additional information not suitable for younger readers (the target age of the regular edition). **Herald and Presbyter** Oxford University Press Owensby has written this book to help Christians take part more confidently and effectively in the dialogue on ethics and economics. Economics for Propbets is an introduction to the subject (it assumes no previous exposure to economics studies or jargon) that takes a helpful three-step approach. It explains some of the basic concepts of our economic system, explores how these concepts function in the real world, and critiques both the concepts and their practical working out

from a biblical-theological-ethical perspective. Book jacket.

The Christian Advocate

The Western Christian Advocate The Living Church Continent The Westminster Queer Clergy A History of Gay and Lesbian Ministry in American Protestantism This ten year anniversary edition of the bestselling Safe Sanctuaries series brings together in one volume the transformative and foundational information found in the Melton's previous two volumes. Safe Sanctuaries remains the only resource of its kind that offers the tools necessary to train leaders of the church to keep the children and youth safe. This

volume is updated to include information on the growing concern around the internet and predators as well as a new section on vulnerable adults. *The Living Church* Universal-Publishers This book is one out of 8 IAEG XII Congress volumes, and deals with the preservation of cultural heritage. In 1972, the World Heritage Convention linked in a single framework the concepts of nature conservation and the preservation of cultural sites. Since then, engineering geology is enlarging its contributions to national and international projects on this topic and is extending its interests to key issues like: safeguarding of monuments and sites

from geotechnical perspectives; advanced monitoring; investigations on cultural landscapes; development of geo-databases for cultural heritage classification; studies on the interactions between humankind, natural landscape evolution and cultural heritage; analysis of weathering and deterioration of rock properties of monuments; risk analysis of sites affected by natural hazards and many others. With the contributions in this book, engineering geologists, conservation scientists and further experts from other natural, social and economic sciences, as well as representatives of international organizations and

national and local administrative authorities exchange their ideas and practices on culture heritage preservation by presenting both local case studies and multidisciplinary international projects. The Engineering Geology for Society and Territory volumes of the IAEG XII Congress held in Torino from September 15-19, 2014, analyze the dynamic role of engineering geology in our changing world and build on the four main themes of the congress: Environment, processes, issues and approaches. The congress topics and subject areas of the 8 IAEG XII Congress volumes are: Climate Change and Engineering Geology. Landslide Processes.

River Basins, Reservoir Sedimentation and Water Resources. Marine and Coastal Processes. Urban Geology, Sustainable Planning and Landscape Exploitation. Applied Geology for Major Engineering Projects. Education, Professional Ethics and Public Recognition of Engineering Geology. Preservation of Cultural Heritage. *Religion, Politics and the Stage in the Dutch Republic* Abingdon Press

Issues in Chemical Engineering and other Chemistry Specialties: 2011 Edition is a ScholarlyEditions™ eBook that delivers timely, authoritative, and comprehensive information about Chemical Engineering and other Chemistry

Specialties. The editors have built Issues in Chemical Engineering and other Chemistry Specialties: 2011 Edition on the vast information databases of ScholarlyNews.™ You can expect the information about Chemical Engineering and other Chemistry Specialties in this eBook to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Issues in Chemical Engineering and other Chemistry Specialties: 2011 Edition has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and

all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>.

The Great Omission
Wm. B. Eerdmans Publishing
Queer Clergy: A History of Gay and Lesbian Ministry in American Protestantism chronicles the unique history of the way many protestant denominations have opened their pulpits to gay clergy and dealt with the issue of gay ordination. Queer Clergy provides an important historical reference for

continuing dialogue but also celebrates the journey to acceptance. Religious Telescope
Upper Room
Before Vatican II, marriage was often considered, or at least popularly expressed, as a union of bodies; that is to say, marriage was an exclusive contract by which a man and a woman mutually handed over their bodies for the purpose of acts which led to the procreation of children. Matrimonial jurisprudence was primarily focused on this marital contract. With the advent of Vatican II and its emphasis on the personalist notion of marriage, a new age dawned whereby canonists, especially auditors of the Roman Rota, were henceforth

to view marriage as a union of persons. "Person" is more than a "body"; rather, a person is an individual consisting of wants, needs, desires, impulses, hopes and dreams, whose life experience has been shaped by the milieu "cultural, familial, religious" from which he or she comes. "Union" is not only simply understood as a "contract", but also is now once again recognized as a "covenant", a concept which, at least in the Latin Church, was prevalent until the 12th century. One of the canons of the 1983 CIC, although almost identical in wording to its predecessor in the 1917 CIC, but which now must be understood and interpreted in light of

the teachings of Vatican II, is canon 1096 which pertains to the effect of ignorance on matrimonial consent. Given the current appreciation of marriage founded in the teachings of Vatican II, especially in *Gaudium et spes*, reiterated by Popes Paul VI and John Paul II and described in the Catechism of the Catholic Church, complicated by today's western society's stress on individualism and permeated by a divorce mentality, what is the impact of this canon on matrimonial consent? How can its meaning, once understood as being wider than merely the sexual act itself, be better utilized by those in tribunal ministry? This is the major thrust of the present work.

The research of the history and development of the concept of ignorance in canonical writings, how its understanding broadened especially after Vatican II and our conclusions on how to apply its richness to marriage nullity led us to expand the use of this canon: how it can aid in the development of pre-marital preparation programs which would not only possibly help prevent couples from being ignorant of the essence of marriage but also help them to appreciate this richness more deeply in their own lives so that marriage truly can become, as we read in canon 1055, "a partnership of the whole of life which is ordered by its nature to the good of the

spouses and the procreation and education of offspring". It is our sincere hope that this study, with its extensive footnotes and up-to-date bibliography will not only be of benefit to all who read it but also will serve as a spring board for further discussion and use of this canon as a ground for nullity and other pastoral uses.

The Westminster The Pilgrim Press New ser., v. 3-8 (1855-1860) include the 16th-21st annual reports of the British and Foreign Anti-slavery Society; v. 9-11 (1861-1863) include the 22nd-24th annual reports.

The Second
International Congress
on Science and
Technology for the
Conservation of
Cultural Heritage was
held in Seville, Spain,
June 24-27, 2014,
under the umbrella of
the TechnoHeritage
network.

TechnoHeritage is an
initiative funded by the
Spanish Ministry of
Economy and

Competitivity
dedicated to the
creation of a network
which integrates CSIC
and University groups,
private companies and
end users such as
foundations, museums
or institutions. The
network's purpose is to
foster the creation of
transdisciplinary (and
not only
multidisciplinary)
initiatives focused on
the study of all assets,
movable or immovable,
that make up Cultural
Heritage. The congress
was dedicated to six
topics, namely (1)
Environmental
assessment and
monitoring (pollution,
climate change,
natural events, etc.) of
Cultural Heritage; (2)
New products and
materials for
conservation and
maintenance of
Cultural Heritage; (3)

Agents and mechanisms of deterioration of Cultural Heritage (physical, chemical, biological), including deterioration of modern materials used in Contemporary Art and information storage; (4) Development of new instruments, non invasive technologies and innovative solutions for analysis, protection and conservation of Cultural Heritage; (5) Security technologies, remote sensing and G.I.S. for the protection and management of Cultural Heritage; and (6) Significance, social value and policies for the conservation of Cultural Heritage. This volume publishes a total of seventy-two contributions which reflect some of the

most recent responses to the challenge of cultural assets conservation and the application of different scientific approaches to the common goal of the conservation of Cultural Heritage.

The Literature of the Arminian Controversy highlights the importance of the Arminian Controversy (1609-1619) for the understanding of the literary and intellectual culture of the Dutch Golden Age. Taking into account a wide array of sources, ranging from theological and juridical treatises, to pamphlets, plays and and libel poetry, it offers not only a deeper contextualisation of

some of the most canonical works of the period, such as the works of Dirck Volckertz, Coornhert, Hugo Grotius and Joost van den Vondel, but also invites the reader to rethink the way we view the relation between literature and theology in early modern culture. The book argues how the controversy over divine predestination acted as a catalyst for literary and cultural change, tracing the impact of disputed ideas on grace and will, religious toleration and the rights of the civil magistrate in satirical literature, poetry and plays. Conversely, it reads the theological and political works as literature, by examining the rhetoric and tropes of religious

controversy. Analysing the way in which literature shapes the political and religious imaginary, it allows us to look beyond the history of doctrine, or the history of political rights, to include the emotive and imaginative power of such narrative, myth and metaphor.
