In a contemporary setting of increasing social division and marginalisation, *Policing Hate Crime* interrogates the complexities of prejudice motivated crime and effective policing practices. Hate crime has become a barometer for contemporary police relations with vulnerable and marginalised communities.

But how do police effectively lead conversations with such communities about problems arising from prejudice? Contemporary police are expected to be active agents in the pursuit of social justice and human rights by stamping out prejudice and group-based animosity. At the same time, police have been criticised in over-policing targeted communities as potential perpetrators, as well as under-policing these same communities as victims of crime. Despite this history, the demand for impartial law enforcement requires police to change their engagement with targeted communities and kindle trust as priorities in strengthening their response to hate crime. Drawing upon a research partnership between police and academics, this book entwines current law enforcement responses with key debates on the meaning of hate crime to explore

the potential for misunderstandings of hate crime between police and communities, and illuminates ways to overcome communication difficulties. This book will be important reading for students taking courses in hate crime, as well as victimology, policing, and crime and community.

 The book of Job is an epic poetic work of the highest order, unmatched in the world's literature for its depth of feeling and emotion, sensitivity toward human suffering, magnificence of language, and narrative and poetic artistry. At the same time, it is one of the most perplexing books in the Bible. Dr. Jerry Gladson, a seasoned minister and professor of religion, not only presents a comprehensive interpretation of the biblical text, but also confronts religion's greatest dilemma: Why do innocent

people suffer? While highlighting the problem of evil as presented in the classic book of Job, he thoroughly explains each passage and offers a thorough introduction to Job and its ancient Near Eastern context that demonstrates the astounding relevance of Job for contemporary readers. Through it all, Dr. Gladson's commentary proves that even in today's modern world, Job still speaks to the needs of the suffering. Touched by the Hand of God shares an enlightening, spiritual study of Job—one of the Bible's great books of wisdom.

In modern literary studies intertextuality is at the centre of interest. Although the relationship between texts has always been an important aspect of Old Testament studies, especially in literary criticism, the scale of comparison has broadened, including for example the interrelationships between the First, Second and Third Isaiah, or the whole Book of the Twelve. These relatively new approaches raise a number of methodical questions which were addressed at the Tenth Joint Meeting of the British Society for Old Testament Study and the Dutch 'Oudtestamentisch Werkgezelschap', held at Oxford, 22nd to 25th July 1997. Did the ancient authors have a well-defined concept of a book? How did they relate to the literary work of their predecessors and contemporaries? Can we trace the theological motifs behind their use of other literary compositions? What does an ancient version reveal about the way it interpreted its source text? One of the problems confronting biblical scholars in this kind of research is the lack of controllable models. Therefore it is useful to study the work of the Ugaritic chief priest Ilimilku whose three major literary compositions provide us with a unique possibility to monitor intertextual relationships in the work of one and the same ancient author. Ugaritic and other ancient Near Eastern parallels help us to understand how the Priestly writer re-interpreted the Yahwistic account of the creation of mankind. Apparently intertextuality in Israel is a phenomenon which cannot properly be understood without taking other literature from the ancient world into account.

Pre-crime aims to pre-empt 'would-be-criminals' and predict future crime. Although the term is borrowed from

science fiction, the drive to predict and pre-empt crime is a present-day reality. This book critically explores this major twenty-first century development in crime and justice. This first in-depth study of pre-crime defines and describes different types of pre-crime and compares it to traditional post-crime and crime risk approaches. It analyses the rationales that underpin pre-crime as a response to threats, particularly terrorism, and shows how it is spreading to other areas. It also underlines the historical continuities that prefigure the emergence of pre-crime, as well as exploring the new technologies and forms of surveillance that claim the ability to predict crime and identify future criminals. Through the use of examples and case studies it provides insights into how pre-crime generates the crimes it purports to counter, providing compelling evidence of the problems that arise when we act as if we know the future and aim to control it through punishing, disrupting or incapacitating those we predict might commit future crimes. Drawing on literature from criminology, law, international relations, security and globalization studies, this book sets out a coherent framework for the continued study of pre-crime and addresses key issues such as terminology, its links to past practises, its likely future trajectories and its impact on security, crime and justice. It is essential reading for academics and students in security studies, criminology, counter-terrorism, surveillance, policing and law, as well as practitioners and professionals in these fields.

relentless Allied bombs, Ariella is careful, but Berlin is a very dangerous place to be, and somebody knows she survived. This book proposes to read the birth stories of Aqhatu, Kirta and Samuel from the perspective of incubation type-scene. Drawing on Nagler's definition of a type-scene, it employs the idea of family resemblance as a principle of identification of type-scenes.

This book deals with the so-called Blessing of Jacob" (Genesis 49) in all its aspects, discussing philological, literary and historical problems. After an introductory chapter a thoroughly discussed translation of Genesis 49 and an analysis of its

poetical structure are presented, followed by the discussion of the genre-definition "tribal saying" (Stammesspruch), and a synchronic and diachronic analysis of Genesis 49 in its literary context (Gen. 47:29-49:33). The remarkable results of this analysis are finally discussed in relation to Israel's history. It is suggested that only part of the "Blessing" functioned within the (originally much shorter) deathbed account (Gen. 47:29-49:33*), reflecting the historical situation of the time of origin. Afterwards it was thoroughly worked up into its present shape to meet the conditions of later political development."
