Our Strange New Land Flatiron Books
Nothing's scarier than a world where you can't be yourself. The second and final book in this high-stakes, fast-paced sci-fi series from New York Times bestselling author RACHEL VINCENT. Dahlia 16's life is a lie. The city of Lakeview isn't a utopia that raises individuals for the greater good; it is a clone farm that mass-produces servants for the elite. And because Dahlia breaks the rules, her

sisters--the 4,999 girls who share her face--are destroyed. She and Trigger 17, the soldier who risked his life for hers, go on the run, escaping into the wild outside the city walls. But it turns out Dahlia has one remaining identical, one who shouldn't even exist. Waverly Whitmore is teenage royalty, a media sensation with millions of fans who broadcasts her every move--including every detail of her wedding planning, leading up to the day she marries Hennessy Chapman. Waverly lives a perfect life built on the labors of clones like Dahlia. She has no idea that she too is a clone . . . until she comes face to face

with Dahlia. One deadly secret. Two genetic sisters. And a world that isn't big enough for both of them. "Thrilling and dangerous, with an ending that will leave you gasping!" --SUZANNE YOUNG, New York Times bestselling author of the series THE PROGRAM on book 1, Brave New Girl

The Courage Consort Princeton University Press

From the ordinary to the extraordinary, here are ten all-new fan-created stories embraced by the vision of Star Trek®! When Gene Roddenberry first created this landmark television series fifty years ago, he also tapped a wellspring of human

imagination. Viewers were immediately transformed, and over the decades turned the very definition of "fan" on its ear. However, when what was on the screen was simply not enough, fans started writing their own stories... In celebration of the 50th anniversary of Star Trek, here are the electrifying results of the 2016 Strange New Worlds writing contest—the best fan-created stories by new writers such as: Derek Tyler Attico, Neil Bryant, Chris Chaplin, John Coffren, Nancy Debretson, Kelli Fitzpatrick, Roger McCoy, Kristen McQuinn, Gary Pischerchio & Frank Tagader, and Michael Turner. By the fans, and for the fans. Boldly going where no one has gone before.

NEIL GAIMAN: 'Glorious. A story that will be found and enjoyed and dreamed about for years to come' A celebration of friendship, courage and imagination inspired by Alice in Wonderland, The Chronicles of Narnia and The Wizard of Oz.

_____ It all starts on the morning the letter D disappears from the language. First, it vanishes from her parents' conversation at breakfast, then

from the road signs outside. Soon the local dentist and the neighbour's Dalmatian are missing, and even the Donkey Derby has been called off. Though she doesn't know why, Dhikilo is summoned to the home of her old history teacher Professor Dodderfield and his faithful Labrador, Nelly Robinson. And this is where our story really begins. Set between England and the wintry land of Liminus, a world enslaved by the monstrous Gamp and populated by fearsome, enchanting creatures, D (Tale of Two Worlds) is a mesmerising tale of friendship and bravery in an uncertain world. Told with simple beauty and warmth, its celebration of moral courage and freethinking is a powerful reminder of our human capacity for strength, hope and justice. 'Dhikilo is a splendid heroine for our time: She stands for kindness, honesty and humanity' DIANE SETTERFIELD 'Young adult readers will love it, but Faber's brio and bubbly ingenuity will delight adult readers too.' Daily Mail

Dolly Dolphin and the Strange New Something Penguin

A New York Times Editors' Choice From one of the most exciting voices in

contemporary Chinese literature, an uncanny and playful novel that blurs the line between human and beast... In the fictional Chinese city of Yong'an, an amateur cryptozoologist is commissioned to uncover the stories of its fabled beasts. These creatures live alongside humans in near-inconspicuousness—save their greenish skin, serrated earlobes, and strange birthmarks. Aided by her elusive former professor and his enigmatic assistant, our narrator sets off to document each beast, and is slowly drawn deeper into a mystery that threatens her very sense of self. Part detective story, part metaphysical enquiry, *Strange Beasts of China* engages existential questions of identity, humanity, love and morality with whimsy and stylistic verve.

[The Strange Case of Donald J. Trump](#) Basic Books (AZ)

The original uncut edition of *STRANGER IN A STRANGE LAND* by Hugo Award winner Robert A Heinlein - one of the most beloved, celebrated science-fiction novels of all time. Epic, ambitious and entertaining, *STRANGER IN A STRANGE LAND* caused controversy and uproar when it was first published and is still

topical and challenging today. Twenty-five years ago, the first manned mission to Mars was lost, and all hands presumed dead. But someone survived... Born on the doomed spaceship and raised by the Martians who saved his life, Valentine Michael Smith has never seen a human being until the day a second expedition to Mars discovers him. Upon his return to Earth, a young nurse named Jill Boardman sneaks into Smith's hospital room and shares a glass of water with him, a simple act for her but a sacred ritual on Mars. Now, connected by an incredible bond, Smith, Jill and a writer named Jubal must fight to protect a right we all take for granted: the right to love.

A Human Behavior & Evolution Society Must-Read
Popular Evolution Book of 2020
A bold, epic account of how the co-evolution of psychology and culture created the peculiar Western mind that has profoundly shaped the modern world. Perhaps you are WEIRD: raised in a society that is Western, Educated, Industrialized,

Rich, and Democratic. If so, you're rather psychologically peculiar. Unlike much of the world today, and most people who have ever lived, WEIRD people are highly individualistic, self-obsessed, control-oriented, nonconformist, and analytical. They focus on themselves—their attributes, accomplishments, and aspirations—over their relationships and social roles. How did WEIRD populations become so psychologically distinct? What role did these psychological differences play in the industrial revolution and the global expansion of Europe during the last few centuries? In *The WEIRDest People in the World*, Joseph Henrich draws on cutting-edge research in anthropology, psychology, economics, and evolutionary biology to explore these questions and more. He illuminates the origins and evolution of family structures, marriage, and religion, and the profound impact these cultural transformations had on human psychology. Mapping these shifts through ancient history and late antiquity, Henrich reveals that the most fundamental institutions of kinship and marriage changed dramatically under pressure from the Roman Catholic Church. It was these

changes that gave rise to the WEIRD psychology that would coevolve with impersonal markets, occupational specialization, and free competition—laying the foundation for the modern world. Provocative and engaging in both its broad scope and its surprising details, *The WEIRDest People in the World* explores how culture, institutions, and psychology shape one another, and explains what this means for both our most personal sense of who we are as individuals and also the large-scale social, political, and economic forces that drive human history. Includes black-and-white illustrations.

Michel Faber's short stories are markedly diverse—the voice of each is so distinct that the book reads like an anthology of different writers. But Faber's radically inventive style fastens all fifteen stories into a compelling collection deserving of the high praise it garnered in the United Kingdom. One surreal story, "Fish," projects a futuristic world populated with fish swimming in the air. As sharks hover in abandoned corners and human zealots of the Church of the Armageddon loose

their fanaticism on the innocent, it's a mother's full-time job to protect her young daughter. The title story, "Some Rain Must Fall," tells of a substitute schoolteacher called on in a crisis, and as she encourages her pupils to express their feelings, we learn the source of the class's trouble: a devastating act that resonates with contemporary America. As Garth Morris wrote in the *Mail on Sunday* (London), "these are well-crafted pieces of quiet forlorn intensity in a very real world."

How can you say goodbye to the love of your life? In *Undying* Michel Faber honours the memory of his wife, who died after a six-year battle with cancer. Bright, tragic and candid, these poems are an exceptional chronicle of what it means to find the love of your life. And what it is like to have to say goodbye. All I can do, in what remains of my brief time, is mention, to whoever cares to listen, that a woman once existed, who was kind and beautiful and brave, and I will not forget how the world was altered, beyond recognition, when we met.
