These Standard Prequalification Documents serve as a guide for those wanting to prequalify to bid on large contracts for projects financed by the World Bank. Qualifying as a bidder is separate from the bid evaluation process. Before invitations to bid on large or especially complex works projects are issued, a process of

prequalification is required to select competent bidders. This document helps bidders through the prequalification process. To simplify presentation by applicants for prequalification, standard forms have been prepared for the submission of relevant information. Guidance notes and examples are provided for the implementing agency making the evaluation. Annexes give information about prequalification that are likely to be of interest to potential bidders on World Bank projects. NOTE: This replaces Standard Prequalification Document: Procurement of Works (September 1999), Stock no. 14601 (ISBN 0-8213-4601-6). *Headquarters Directory* Arihant Publications India limited This manual is aimed at helping medical record workers in the development and management of medical records services of health care facilities in developing countries in an effective and efficient manner. It has not been designed as an introductory text to medical record management, but rather as an aid to medical record officers (MROs) and medical record clerks by describing appropriate systems for Medical Records Departments in developing countries. It covers manual procedures and may be used as an adjunct to computerized systems. It does not provide all of the options for medical record management, but it does provide one option in each area for the management of medical records in developing countries. A list the textbooks that provide detailed information on medical record management is also provided.

About the Book : - One of the great icons of our time, Khushwant

Singh, 95, is a man of contradictions. An agnostic who's well-versed in the holy scriptures; a vocal champion of free speech who supported the Emergency; a dirty old man who sees the world in a grain of sand and beauty in a wild flower. Born in 1915 in pre-Partition Punjab, Khushwant Singh has been witness to almost all the major events in modern Indian history and has known most of the figures who have shaped it. In a career spanning over six decades as writer, editor and journalist, his views have been provocative and controversial, but they have also been profound, deeply perceptive and always compelling. Khushwant Singh has never been less than honest. In *Absolute Khushwant*, India's grand old man of letters tells us about his life, his loves and his work. He writes on happiness, faith and honesty. And, for the first time, about his successes and failures, his strengths and weaknesses, his highs and lows. He tells us what makes him tick and the secret of his longevity; he confesses his deepest fears and what he holds dear. He writes about sex, marriage, worship and death; the people he's admired and detested.

Corneal transplantation is a widely practised surgical procedure. Lamellar techniques are favoured replacing penetrating keratoplasty (PK). Endothelial keratoplasty (EK) has been adapted as an alternative in the treatment of corneal endothelial disorders whereby Descemet's membrane and the endothelium are replaced. Pre-Descemet's endothelial keratoplasty (PDEK) is the latest surgical technique for corneal transplantation. This book is a step by step guide to PDEK for practising ophthalmologists. Divided into five sections, the text begins with the basics explaining corneal anatomy, pre-operative assessment, general techniques in keratoplasty, and the principles of PDEK. The following chapters discuss surgical techniques, special situations, and complications and results. The text covers numerous clinical scenarios and concludes with a section on miscellaneous topics such as OCT guided PDEK, eye bank preparation, and cosmetic

iris implant complications. The text is further enhanced by surgical photographs and includes an interactive DVD ROM demonstrating PDEK techniques. The ACL or anterior cruciate ligament is the most important ligament in the knee. When it is completely torn, it can lead to instability or buckling of the knee. There are several options to choose from when selecting a graft for ACL reconstruction such as using autografts including patellar tendon, hamstring tendon, and quadriceps tendon, and allografts (also known as donor tissue or cadaver tissue). Artificial ligaments are also discussed since they are still used in Europe and Asia. This book summarizes the pros and cons of each graft option in detail.
