Get prepared for the upcoming school year and get organized with this notepad. A great place to record the main important information of your class, lecture or meeting and to create a to-do list. PICK THIS PRODUCT NOW! Perfect for girls or boys, this notebook can also be used as a diary. Features: ample room for notes on lined journal pages. Product description: 6 x 9; 120 pages of college ruled paper, uniquely designed matte cover. We have lots of great notebooks, sheet music, planners and journals, so be sure to check out our other listings by clicking on the "Author Name" link just below the title of this tracker. Ideas on how to use this journal: back to school shopping; high school student gift; middle school student present; teacher supplies for university and college; pupils who like sketching and doodling.

*Treaty Series / Recueil Des Traités* Oxford University Press, USA

SAP is the world's leading provider of ERP software and services, with worldwide revenue in 2004 of \$9.7 billion and a 57 percent market share among major business application providers; it is

one of the world's largest software companies overall ERP is a flexible, open technology platform that helps businesses run more efficiently (and profitably) by providing integrated management of key operations and supply chains Written for IT professionals who find it hard to get through SAP's complex documentation, our book demonstrates how ERP can cut costs, provides a clear overview of how the ESA (enterprise service architecture) model affects ERP, and shows how to implement the new ERP in the real world Topics covered include reducing the cost of an existing IT backbone, using the new ERP to address a company's "pain points" and challenges, and proving the value of ERP through ROI (return on investment) and TCO (total cost of ownership) studies

### **Regional Disparities in India** Brepols Pub

This important two-volume collection draws together the most significant and instructive articles relating to comparative law methodology and offers vast and comprehensive coverage of practices, principles, methods and sources in comparative legal research. The first volume deals with preliminary considerations such as the aims of research and the questions one should ask, as well as how to select objects for comparison and formulate a

research plan. The second volume focuses on the comparative research of regulation, description, and explanation, along with discussion on functionalism, quantitative approaches, translation issues, legal transplants and global challenges. Together with an original introduction by the editors that frames the articles and helps the reader to navigate them successfully, this collection offers a balanced body of seminal research which will benefit legal scholars, students, and all who are undertaking, or seeking to evaluate, comparative legal research.

*A Blueprint for Maximizing Stakeholder Value* Springer

Expounding on the results of the author's work with the US Army Research Office, DARPA, the Office of Naval Research, and various defense industry contractors, *Governing Lethal Behavior in Autonomous Robots* explores how to produce an "artificial conscience" in a new class of robots, humane-oids, which are robots that can potentially perform more ethically than humans in the battlefield. The author examines the philosophical basis, motivation, theory, and design recommendations for the implementation of an ethical control and reasoning system in autonomous robot systems, taking into account the Laws of War and Rules of Engagement. The book presents robot architectural design recommendations for Post facto suppression of unethical behavior, Behavioral design that incorporates ethical constraints from the onset, The use of affective functions as an adaptive component in the event of unethical action, and A mechanism that identifies and advises operators regarding their ultimate responsibility for the deployment of autonomous systems. It also examines why soldiers fail in battle regarding ethical decisions; discusses the opinions of the public, researchers, policymakers, and military personnel on the use of lethality by autonomous systems; provides examples that illustrate autonomous systems' ethical use of force; and includes relevant Laws of War. Helping ensure that warfare is conducted justly with the advent of autonomous robots, this book shows that the first steps toward creating robots that not only conform to international law but outperform human soldiers in their ethical capacity are within reach in the future. It supplies the motivation, philosophy, formalisms, representational requirements, architectural design criteria, recommendations, and test scenarios to design and construct an autonomous robotic system capable of ethically using lethal force. Ron Arkin was quoted in a November 2010 New York Times article about robots in the military.

*mySAP ERP For Dummies* BRILL

This is a case study of the Cult of the Sebastoi that was established in the city of Ephesus by the province of Asia during the late first century CE. It served as a prototypical manifestation of socio-religious developments during the late first and early second centuries in the Eastern Mediterranean.

*Translating Strategy into Action* Financial Times Management Uses the cosmetics company The Body Shop as an example of management that considers the company's effects on such stakeholders as its employees, clients, the surrounding community, regulators, and the media

**Twice Neokoros** Bna Books

L'objectif de cette recherche est d'analyser la décision fiscale au Maroc en tenant compte des procédures formelles et informelles suivies par les acteurs susceptibles d'intervenir. L'auteur démontre que le schéma classique linéaire de la décision ne correspond qu'imparfaitement à la réalité dans la mesure où il ne tient pas compte des incertitudes, des contradictions et de la diversité des facteurs caractérisant toute logique de choix lorsque sont mis en présence des acteurs ayant à défendre leurs propres intérêts et stratégies. La présente étude identifie et analyse dès lors la place et les rôles respectifs des institutions politiques (Gouvernement, Parlement, Partis), de l'administration

fiscale, des institutions internationales (Fonds Monétaire International, Banque Mondiale) et des groupes de pression participant à la création du droit fiscal. Tous agissent, interagissent et poursuivent des objectifs parfois divergents, selon des rationalités différentes, voire contradictoires, en fonction des contraintes de leur environnement. En consacrant sa thèse, qui est à l'origine de cet ouvrage, au processus de décision fiscale au Maroc, l'auteur apporte un éclairage nouveau sur les conditions de création du droit au Maroc, notamment le droit fiscal.

**L'impôt général sur le revenu** John Wiley & Sons

An increasing population faces the growing demand for agricultural products and accurate global climate models that account for individual plant morphologies to predict favorable human habitat. Both demands are rooted in an improved understanding of the mechanistic origins of plant development. Such understanding requires geometric and topological descriptors to characterize the phenotype of plants and its link to genotypes. However, the current plant phenotyping framework relies on simple length and diameter measurements, which fail to capture the exquisite architecture of plants. The Research Topic "Morphological Plant Modeling: Unleashing Geometric and Topological Potential within the Plant Sciences" is the result of a workshop held at National Institute for Mathematical and Biological Synthesis (NIMBioS) in Knoxville, Tennessee. From 2.-4. September 2015 over 40 scientists from mathematics, computer science, engineering, physics and biology came together to set new frontiers in combining plant phenotyping with recent results from shape theory at the interface of geometry and topology. In doing so, the Research Topic synthesizes the views from multiple disciplines to reveal the potential of new mathematical concepts to analyze and quantify the relationship between morphological plant features. As such, the Research Topic bundles examples of new mathematical techniques including persistent homology, graph-theory, and shape statistics to tackle questions in crop breeding, developmental biology, and vegetation modeling. The challenge to model plant morphology under field conditions is a central theme of the included papers to address the problems of climate change and food security, that require the integration of plant biology and mathematics from geometry and topology research applied to imaging and simulation techniques. The introductory white paper written by the workshop participants identifies future directions in research, education and policy making to integrate biological and mathematical approaches and to strengthen research at the interface of both disciplines.

*Law in the Roman Provinces* BRILL

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

This comprehensive resource makes it easy to check specific language -- and know if, where, and how your clients' intellectual property is protected. You get the full text of the world's major agreements on patent, trademark, copyright, and industrial design, including: -- primary source materials -- summaries of

background and provisions -- treaty membership and dates of adherence -- plus a topic index and bibliography

**Analyse de la décision fiscale au Maroc** Analyse de la décision fiscale au Maroc

A Companion to the Roman Empire provides readers with a guide both to Roman imperial history and to the field of Roman studies, taking account of the most recent discoveries. This Companion brings together thirty original essays guiding readers through Roman imperial history and the field of Roman studies. Shows that Roman imperial history is a compelling and vibrant subject. Includes significant new contributions to various areas of Roman imperial history. Covers the social, intellectual, economic and cultural history of the Roman Empire. Contains an extensive bibliography.

The Challenge of Megalopolis Routledge

Analyse de la décision fiscale au Maroc Eddif

**Governing Lethal Behavior in Autonomous Robots** Spink Books

This edited book is based on the papers accepted for presentation during the 2nd Springer Conference of the Arabian Journal of Geosciences (CAJG-2), Tunisia, in 2019. Major subjects treated in the book include geomorphology, sedimentology, and geochemistry. The book presents an updated unique view in conjugating field studies and modeling to better quantify the process-product binomial unusual in geosciences. In the geomorphology section, 24 papers deal with topics related to fault slip and incision rates, soil science, landslides and debris flows, coastal processes, and geoarchaeology, and geoheritage. Under the sedimentology section, 34 papers including stratigraphy, and environmental, tectonic, and diagenetic processes, together with evolutionary, biostratigraphic, and paleo-environmental significance of paleontology are presented. Additionally, this section also contains papers on marine geosciences, from molecular proxies related to climate to geophysical surveys. Last but not least, the third section on geochemistry is composed of 26 papers that are focused on sedimentary geochemistry and mineralogical characterization, magmatic and metamorphic processes and products, and the origin and exploration of mineral deposits. This book resumes the current situation related to the abovementioned topics mainly in the Mediterranean realm. The volume book is of interest to all researchers, practitioners, and students in the fields of geomorphology, sedimentology, and geochemistry, as well as those engaged in environmental geosciences, soil science, stratigraphy and paleontology, geoarchaeology and geoheritage, marine geosciences, petrology, metallogenesis, and mineral deposits.

**Recent Research on Geomorphology, Sedimentology, Marine Geosciences and Geochemistry** Prabhat Prakashan

What is the place of Jews in medieval Christian societies? In the nineteenth and early twentieth centuries, this question was largely confined to Jewish scholars, and the academic debates were inseparable from the upheavals of the lives of contemporary European Jews.

Controlling Corruption Eddif

This volume considers experimental and theoretical dielectric studies of the structure and dynamics of complex systems. Complex systems constitute an almost universal class of materials including associated liquids, polymers, biomolecules,

colloids, porous materials, doped ferroelectric crystals, nanomaterials, etc. These systems are characterized by a new "mesoscopic" length scale, intermediate between molecular and macroscopic. The mesoscopic structures of complex systems typically arise from fluctuations or competing interactions and exhibit a rich variety of static and dynamic behaviour. This growing field is interdisciplinary; it complements solid state and statistical physics, and overlaps considerably with chemistry, chemical engineering, materials science, and biology. A common theme in complex systems is that while such materials are disordered on the molecular scale and homogeneous on the macroscopic scale, they usually possess a certain degree of order on an intermediate, or mesoscopic, scale due to the delicate balance of interaction and thermal effects. In the present Volume it is shown how the dielectric spectroscopy studies of complex systems can be applied to determine both their structures and dynamics.

**The Stakeholder Corporation** CRC Press

Dr CHV Sutherland was for many years Keeper of the Heberden Coin Room in the Ashmolean Museum, with a special interest in the Julio-Claudian emperors and their coinage from 31 BC to AD 69. From 1939 he was co-editor and part-author of Roman Imperial Coinage, successively, with Harold Mattingly and EA Sydenham, and with RAG Carson, devoting years to the fundamental revision and rewriting of Mattingly and Sydenham's original Volume I (1923) of the series, published in 1984. (NP) Sutherland's revised Volume I has been out of print now for some years, but his study of the Julio-Claudian coinage, being the formative period of the long imperial series, is made newly available by Spink in this handsome reprint.

A Companion to the Roman Empire John Wiley & Sons

The study of the Roman Empire has changed dramatically in the last century, with significant emphasis now placed on understanding the experiences of subject populations, rather than a sole focus on the Roman imperial elites. Local experiences, and interactions between periphery and centre, are an intrinsic component in our understanding of the empire's function over and against the earlier, top-down model. But where does law fit into this new, decentralized picture of empire? This volume brings together internationally renowned scholars from both legal and historical backgrounds to study the operation of law in each region of the Roman Empire, from Britain to Egypt, from the first century BCE to the end of the third century CE. Regional specificities are explored in detail alongside the emergence of common themes and activities in a series of case studies that together reveal a new and wide-ranging picture of law in the Roman Empire, balancing the practicalities of regional variation with the ideological constructs of law and empire.

**Managing Fiscal Decentralization** Frontiers Media SA

The growth of interest in fiscal decentralization has meant that there has been something of a rush to enshrine this in policy - The World Bank has reported that about seventy countries see this as a major part of their development strategy. This book critically examines the case for decentralization. This collection of contributions comes from a worldwide team of experts, including Albert Breton, Piero Giarda and Anwar Shah.
