 All high performance organizations have one thing in common: execution. The men and women who work there sustain performance at seemingly otherworldly levels of precision, accuracy, and consistency. In the fifth and final book of Mark Miller's High Performance series, he uses his trademark business

fable format to show how any organization can cultivate the kind of everyday habits that yield extraordinary results. Miller tells the story of Blake Brown, a CEO who learns how to help his team to consistently excel at execution from a perhaps unlikely source: his son's high school football coach. The story is fictional, but the principles and practices are very real, derived from years of research led by a team from Stanford University. Miller and his team interviewed leaders and employees from numerous world-class organizations, including the Navy SEALs, Starbucks, Apple, Southwest Airlines, the Seattle Seahawks, Mayo Clinic, Cirque du Soleil, and more. The lessons learned were then field-tested with over seventy businesses employing over 7,000 people. Miller gives you proven tools to release the untapped potential in your people, create a strong competitive advantage, and win not just on game day but every day.

America takes 75% of the world's medications and seven out of ten people die of chronic and preventable diseases. The health care system meant to remedy this problem is now the third leading cause of death itself. This exists because we often ignore our health or assume we are healthy until disease hits. Then once disease hits we manage the sickness with drugs and surgeries. That's not health care, that's sick care. This book is the guide to experience real health. If you manage sickness and disease you get sickness and disease, if you build health you get health.
