Traces the unlikely friendship of a wealthy Afghan youth and a servant's son in a tale that spans the final days of Afghanistan's monarchy through the atrocities of the present day.

Complicated Complicity is about the forms taken, motives and spectrum of actions of European collaboration with the Nazis. State authorities, local military organizations and individual players in different countries and areas including France, Scandinavia, Lithuania, Poland, Ukraine, Romania, Hungary, Slovakia, Greece, Italy, Portugal and the countries of the former Yugoslavia are discussed in the context of the history of World War II, the history of occupation and everyday life and as an essential influencing factor in the Holocaust. New forms of right-wing populism, nationalism and growing intolerance of Jewish fellow citizens and minorities have made such historically sensitive studies considerably more difficult in many countries today. In this time of increasing historical revisionism in Europe,

such elucidating discourse is particularly relevant.

Loch is seeking revenge. It would help if she wasn't in jail. The plan: to steal a priceless elven manuscript that once belonged to her family, but now is in the hands of the most powerful man in the Republic. To do so Loch--former soldier, former prisoner, current fugitive--must assemble a crack team of magical misfits that includes a cynical illusionist, a shapeshifting unicorn, a repentant death priestess, a talking magical warhammer, and a lad with seemingly no skills to help her break into the floating fortress of Heaven's Spire and the vault that holds her family's treasure--all while eluding the unrelenting pursuit of Justicar Pyvic, whose only mission is to see the law upheld. What could possibly go wrong? The Palace Job is a funny, action-packed, high-fantasy heist caper in the tradition of Scott Lynch's Gentleman Bastards series, from debut author Patrick Weekes.

Miss Emma Harlow hasn't earned the reputation as a hoyden for nothing, so when the Duke of Trent discovers her in his conservatory stealing one of his orchids, he's isn't surprised- charmed, delighted and puzzled, yes, but not surprised. It is Emma who is amazed. She has naturally concluded that the man reading in the conservatory must be the country cousin (who else in London would actually read?) and is quite vexed to discover that he is the Duke of Trent himself- imagine, stealing the duke's prize *Rhyncholaelia digbyana* under his very nose! But her vexation doesn't last long. For Emma is a practical young lady with a mission: to end her dear sister Lavinia's engagement to the villainous (and dreadfully dull!) Sir Waldo Windbourne, and she thinks that the famous libertine is just the man for the job. If he would only seduce her sister away from Sir Waldo.... Well, not seduce exactly, but flirt mercilessly and engage her interest. Perhaps then Lavinia would jilt the baron. The Duke of Trent is resistant, of course. Despite his reputation, he does not toy with

the affections of innocents. And besides, it's not her sister he longs to seduce.

### **The Widening Stain** 1001 Things

A magisterial history of the artists and writers who left Weimar when the Nazis came to power. In 1933 thousands of intellectuals, artists, writers, militants and other opponents of the Nazi regime fled Germany. They were, in the words of Heinrich Mann, "the best of Germany," refusing to remain citizens in this new state that legalized terror and brutality. Exiled across the world, they continued the fight against Nazism in prose, poetry, painting, architecture, film and theater. Weimar in Exile follows these lives, from the rise of national socialism to their return to a ruined homeland, retracing their stories, struggles, setbacks and rare victories. The dignity in exile of Walter Benjamin, Ernst Bloch,

Bertolt Brecht, Alfred Döblin, Hanns Eisler, Heinrich Mann, Thomas Mann, Anna Seghers, Ernst Toller, Stefan Zweig and many others provides a counterpoint to the story of Germany under the Nazis. *The Oxford Dictionary of Literary Terms* Dark Horse Comics An official tie-in to the hit video game Mass Effect: Andromeda, written by award-winning and New York Times bestselling author Catherynne M. Valente The Quarian ark Keelah Si'yah sails toward the Andromeda galaxy, carrying 20,000 colonists from sundry races including the drell, the elcor, and the batarians. Thirty years from their destination, a routine check reveals drell lying dead in their pods, and a deadly pathogen on board. Soon, the disease is jumping species, and it quickly becomes clear that this is no accident. It's murder, and the perpetrator is still on board. The ship's systems rapidly degrade, and panic spreads among the colonists, for the virus yields a terrible swelling of the brain that causes madness, hallucinations, and dreadful violence. If the ship's crew can't restore their technology and find a cure, the Keelah Si'yah will never make it to the Nexus.

In Mordin On Time, Nick Mordin sets out his method for answering the most fundamental question facing punters in any race, namely: which is the fastest horse? He was timing the sections of races with a stop watch, estimating wind strength and direction, adjusting for movements of running rails, using projected times and calculating average times years before the best-selling American books on speed rating were published. This new edition incorporates much new material, including standard times for all Irish racecourses (plus the major French ones). Mordin On Time enables the reader to construct their own speed ratings wherever they live.

#### Against the Crowd Harper Collins

The criminal law on serious traffic offenses presents legislators with numerous controversial issues. One such issue is when severe consequences are matched with low moral culpability. How should the law deal with a driver who kills someone because she failed to see the person when looking? Another controversial issue concerns highly culpable behavior that remains without serious consequences. How should the law cope with a driver who nearly kills someone when overtaking recklessly? The traffic context generates many hard cases that call the outermost

boundaries of general doctrinal concepts like intent, negligence, or causation into question. This book contains an international collection of essays on criminal liability for serious traffic offenses. With a focus on England/Wales, the Netherlands, France, Germany, and Spain, the book reveals that there are enormous differences in both drafting and interpretation of serious traffic offenses. Additionally, it elaborates on the role of culpability and harm in sentencing, traffic-psychological insights relevant to accident causation, and the concept of conditional intent in relation to extremely dangerous traffic behavior. (Series: Governance & Recht - Vol. 11) [Subject: Criminal Law, Traffic Law, Comparative Law]

**The Harlow Hoyden** CRC Press

This book combines an overview of validity theory, trends in validation practices and a review of standards and guidelines in several international jurisdictions with research synthesis of the validity evidence in different research areas. An overview of theory is both useful and timely, in view of the increased use of tests and measures for decision-making, ranking and policy purposes in large-scale testing, assessment and social indicators and quality of life research. Research synthesis is needed to help us assemble, critically appraise and integrate the overwhelming volume of research on validity in different contexts. Rather than examining whether any given measure is "valid", the focus is on a critical appraisal of the kinds of validity evidence reported in the published research literature. The five sources of validity evidence discussed are: content-related, response processes, internal structure, associations with other variables and consequences. The 15 syntheses included here, represent a broad sampling of psychosocial, health, medical and educational research settings, giving us an extensive evidential basis to build upon earlier studies. The book concludes with a meta-synthesis of the 15 syntheses and a discussion of the current thinking of validation practices by leading experts in the field.
