With many students today participating in extracurricular activities, jobs, clubs, and responsibilities at home, it is common to find an area that is lacking studying. Teachers have identified that poor study skills are often to blame. On the other hand, students have found that many of the textbooks and worksheets forced upon them are either boring or difficult to understand. Whether it is bad habits or complicated materials that prevent you from studying well, this book can help you to improve the effectiveness of your studying. After all, effectiveness is not measured by the length of time spent studying, but by the level of comprehension. In this new book, you will learn how to make a study schedule, how to design an effective study space, how to read for comprehension, how to get organised, how to find your learning style, how to listen better in class, how to use reference sources, how to boost your concentration, and how to stay motivated. You will learn effective note taking strategies, where to study, when to study, time management skills, strategies for reading novels and text books, memorisation techniques, and organisational skills. Additionally, you will find out how to stay awake while studying, how to change your current habits, and how to make studying more enjoyable. We will provide you with various studying methods, including flashcards, quizzes, summarising, outlining, answering study guide questions, and the proven SQ3R method, as well as exercises to help improve your skills. Furthermore, the book is full of tips from students just like you, as well as teachers. No two people learn the same way, and no one study method will work for everyone. While this book introduces you to different study methods, the aim is to improve your learning, your understanding, and, ultimately, your grades.

Includes CD-Rom There are many 'Do-it-Yourself' manuals for students and young people experiencing study skills problems. However, if this group of young people could study these books then they would already have the skills necessary! In order to use a self help manual the student needs internal motivation, the ability to self-instruct from text and the ability to put the learned strategy into place... but these are the same attributes that these students find difficult. In this book, Pat Guy provides a series of lesson plans making up a taught study skills course for secondary schools, sixth forms, FE colleges and Pupil Referral Units. She shows the reader how to teach, through self assessment, practice and confidence-building techniques, the techniques and self management required to achieve independent study skills. All the activities and worksheets, including revision and exam tips for the students, are easily printable from the accompanying CD-rom. The sessions can be delivered by teachers, tutors, Learning Mentors, or anyone whose aim is to improve attendance and achievement in older students. Pat Guy has taught for over twenty years in LEA and secondary schools in Outer London, Northamptonshire, Birmingham and Bedfordshire as a class teacher, subject teacher, SEN support, SENCO and advisory teacher.
