Assessing the General Theory of Crime Oxford University Press  
First published in 1979, this volume introduces a cultural factor to theories of consumption. The World of Goods goes beyond standard economic analyses, which rely on theories of individual psychology. Douglas studies how consumers use goods to fulfil their intentions in regard to one another. The World of Goods insists that goods are wanted for social purposes, for sharing and giving, more than for the private enjoyment that is the pivot of utilitarian explanations. This book offers a completely original way of thinking about consumption as a series of rituals.

An Introduction to Criminological Theory Routledge  
Theorizing Criminal Justice uses eight theoretical lenses to explore the criminal justice apparatus. They contribute to a foundation for a discourse to expand our thinking about criminal justice and to enhance the value of our practice---providing a deeper understanding of complex issues exposes the confusion and contradictions inherent in this intricate topic. Twenty articles (of which five are new to this edition) by noted professionals in the field present distinct perspectives for academic policy advisors, policy makers, the media, criminal justice personnel, and theoreticians about the nature of the criminal justice system. What theories direct the behaviors of the police, the courts, and corrections administrators? Which goals are paramount: retribution, treatment, safety, social control, efficiency? What

value choices guide theories? The authors include comprehensive discussions to stimulate creative thinking, as well as pedagogical materials such as a summary for each article, key terms found in each orientation, and thought-provoking questions that connect each orientation to relevant topics in today's criminal justice apparatus.

Theories of the Policy Process provides a forum for the experts in the most established and widely used theoretical frameworks in policy process research to present the basic propositions, empirical evidence, latest updates, and the promising future research opportunities of each framework. This well-regarded volume covers such enduring classics as Multiple Streams (Zahariadis et al.), Punctuated Equilibrium (Jones et al.), Advocacy Coalition Framework (Jenkins-Smith et al.), Institutional Analysis and Development Framework (Schlager and Cox), and Policy Diffusion (Berry and Berry), as well as two newer theories—Policy Feedback (Mettler and SoRelle) and Narrative Policy Framework (McBeth et al.). The fourth edition now includes a discussion of global and comparative perspectives in each theoretical chapter and a brand-new chapter that explores how these theories have been adapted for, and employed in, non-American and non-Western contexts. An expanded introduction and revised conclusion fully examines and contextualizes the history, trajectories and functions of public policy research. Since its first publication in 1999, Theories of the Policy Process has been, and remains, the quintessential gateway to the field of policy process research for students, scholars and practitioners.

*Sexual Politics* SAGE Publications

This concise textbook introduces students to multidisciplinary theories about why people commit crime. Winfree and Abadinsky strive to make the study of crime and justice as clear, concise, current, and consumable as possible. Tracing the evolution of theories and their influence on research today, the authors provide a solid foundation for students to understand the role theory plays in criminal justice practices. The first nine chapters explore various types of theories, providing the historical context and the basic assumptions each theory makes about human behavior, the causal arguments, and what criminologists have

learned from testing the theories. The theory as originally proposed may have gone through a metamorphosis. Change is an important—and exciting—aspect of crime theory. Ideas that attempt to describe, explain, predict, and possibly control a specific behavior sometimes remain as originally conceived and sometimes evolve to something quite different. The final chapter explores the ways the various theories influence criminal justice policy, focusing on law enforcement. To help readers assimilate and synthesize the essentials of criminological theory, each chapter contains learning objectives, boxed material to stimulate critical thinking, bulleted summary points, key terms, and critical review questions. There are marginal notes throughout the text to highlight concepts, as well as a comprehensive glossary for easy review of important terms.

Joined by co-editors Theresa Severance and Alan Bruce, Joseph Jacoby continues to provide classic scholarly works on criminology in their original form, allowing readers to share in the discovery and unfolding of powerful ideas in the authors' own words. These writings from over the past two centuries represent the most influential approaches to, explanations of, and social responses to crime. The Fourth Edition offers seventy-five selections, thirteen of which are new to this edition. Included in this comprehensive volume are both authors whose work is widely recognized as significant in itself, and authors whose work substantially influenced the thinking of subsequent scholars. This inclusive collection is organized into three sections, each of which opens with a brief editorial introduction to provide context. Section I, *The Classic Descriptions of Crime*, contains writings whose primary contribution is descriptive, although they also offer important theoretical insights. These works illuminate with great clarity certain aspects of the phenomenon of crime. Section II, *Theories of Causation of Crime*, covers over two centuries of theorizing about the causes of crime. Most of these writings are specifically about crime, although some emphasize larger social issues that have direct implications for criminology. Section III, *The Social Response to Crime*, includes writings that variously describe, theorize about, or advocate specific social responses to crime. Some of the best works on the criminal justice process as it operates internally and as it functions in its social setting are
