A Novel Simon and Schuster

In the mid-1930s, two Irish Americans travel to the Albanian highlands with an early model of a marvelous invention, the tape recorder. Their mission? To discover how Homer could have composed works as brilliant and as long as *The Iliad* and *The Odyssey* without ever putting pen to paper. The answer, they believe, can be found only in Albania, the last remaining habitat of the oral epic. But immediately upon their arrival, the scholars' seemingly arcane research excites suspicion and puts them at the center of ethnic strife in the Balkans. Mistaken for foreign spies, they are placed under surveillance and are dogged by gossip and intrigue. It isn't until a fierce-eyed monk from the Serbian side of the mountains makes his appearance that the scholars glimpse the full political import of their search for the key to the Homeric question.

The Fall of the Stone City Cengage Learning

Egypt in the twenty-sixth century BC. The young pharaoh Cheops wants to forgo the construction of a pyramid in his honor, but his court sages hasten to persuade him otherwise. The pyramid, they tell him, is not a tomb but a paradox, designed to appease the masses by oppressing them. It is a symbol of nothing, a useless and infinite project designed to waste the country's wealth and keep security and prosperity, ever the fonts of sedition, constantly at bay. And so the greatest pyramid in the world has ever seen begins to rise. Rumors multiply. A secret police is formed.

Conspiracies—real and imagined—swirl around the rising edifice. The most drastic purges follow. By the time the first stone is laid, Cheops's subjects are terrified enough to yield to his most murderous whims. Each time one of the massive stones is hoisted into place, dozens of men are crushed, and there are tens of thousands of stones. . . .

Light and Skin Interactions Simon and Schuster

A YA romantic comedy about a movie geek & the dream girl he refuses to fall in love with. Sam Kinnison is a geek, and he's totally fine with that. He has his horror movies, his nerdy friends, World of Warcraft – and until Princess Leia turns up in his bedroom, worry about girls he won't. Then Camilla Carter arrives on the scene. She's beautiful, friendly and completely irrelevant to his plan. Sam is determined to ignore her, except that Camilla has a plan of her own – and he seems to be a part of it! Sam believes that everything he needs to know he can learn from the movies. But perhaps he's been watching the wrong ones. Life in Outer Space is Melissa Keil's brilliantly sweet and funny YA debut. It's also the first book to be signed up through the Ampersand Project, Hardie Grant Egmont's initiative for emerging YA writers.

Torture to Her Soul Canongate Books

"THE CODE OF LEKE DUKAGJINI is a great cultural treasure, comparable to the chapters of *The Old Testament*." "It provides deep insights into the ancient society of the Albanians, their somber dignity & their magnificent sense of honor."--David Binder, *The New York Times*. "This legal system was

established & passed on to future generations as a common law by Leke Dukagjini, a co-fighter of the legendary Skenderbeg." "The 'Besa' or the 'word of honor' as stated in THE CODE OF LEKE DUKAGJINI which means peace & protection to those whom it is given, has become today an important fighting tool in the political struggle of Kosovo's Albanians against Serb oppression."-- Victor Meier, The Frankfurter Allgemeine Zeitung. "The legal Code of the Albanians known by them for a thousand years, is one of the most original in the history of mankind. Among the basic pillars of this code are the equality of men before the code & the non-abuse of justice." "The entire essence of the legal code of the Albanians is an unparalleled rigorous respect for this basic principle: non-violation of the dignity of a man- his honor, home, & life."--Ismail Kadare, Albanian writer.

This is an elementary introduction to syntactic analysis. Assuming no prior knowledge of the subject whatsoever, it is intended for students who are encountering such analysis for the first time. For those embarking on a longer term study of syntax, this will be a valuable and quickly assimilated foundation course. For students who will need to use syntax as a basic descriptive tool - such as trainee teachers, speech therapists or students of literacy style - the book provides a framework for their analysis and practice in its use. The book begins by looking at the use of generalizations in describing sentence structure and the basis for word categories. It then moves through increasingly more complex constructions giving students plenty of opportunity by way of practical exercises to

understand the basis of each analysis before moving further. The aim of the book is not to explore complex issues of argumentation. Its emphasis is on practical "hands on" analysis.

Light and Skin Interactions immerses you in one of the most fascinating application areas of computer graphics: appearance simulation. The book first illuminates the fundamental biophysical processes that affect skin appearance, and reviews seminal related works aimed at applications in life and health sciences. It then examines four exemplary modeling approaches as well as definitive algorithms that can be used to generate realistic images depicting skin appearance. Despite its wide scope of simulation approaches, the book's content is presented in a concise manner, focusing on relevant practical aspects. What's more, these approaches can be successfully applied to a wide range of additional materials, such as eye tissue, hair, and water. Allows you to understand and predict the qualitative and quantitative behavior of complex natural systems A general background on tissue optics clarifies several confusing conceptual issues, saving you valuable time in the early stages of research Includes complete code and data sources for the BioSpec model

The author suggests that in this era following the postmodern we have entered a new, monist epoch in which aesthetically mediated belief replaces endless irony as the dominant force in culture. The book documents the "new monism" through an examination of popular films and novels such as *American Beauty*, *Life of Pi*, and *Middlesex* as well as in the work of major architects and artists such as Sir Norman Foster, Andreas Gursky, and Vanessa Beecroft. --book cover.
