*A Magazine of
Africa for
Africa*
Cambridge
University
Press
A long
established
text that aims
to meet the
needs of
students
studying
building
measurement
in the early
years of
quantity
surveying and
building
degree
courses. It
contains a
careful
selection of 28
worked

examples
embracing all
the principal
building
elements and
including
alternative
constructional
methods to
illustrate a
range of
approaches.
Questionnaire
s from the
National
Health
Interview
Survey,

Macmillan
International
Higher
Education
South Africa
has made
huge gains in
ensuring
universal
enrolment for
children at
school, and in
restructuring

and
recapitalising
the FET
college sector.
However,
some three
million young
people are not
in education,
employment
or training and
the country
faces serious
challenges in
providing its
youth with the
pathways and
support they
need to
transition
successfully
into a
differentiated
system of
post-school
education and
training.
Across nine
evidence-
based
chapters, 17
authors offer a

succinct overview of the different facets of post-school provision in South Africa. These include an analysis of the impact of the national qualifications system on occupational training, the impact of youth unemployment, the capacity of the post-school system to absorb larger numbers of young people, the relationship between universities and FET colleges, the need for more

strategic public and private investment in skills development, and a youth perspective on education and training policy. The authors have a number of recommendations for improving the alignment between schooling, further education and training, and university education - interventions that could shape the future of our youth. *Water-supply and Irrigation Papers of the*

United States Geological Survey Streamline Surveys Inc. The Kit is for students in undergraduate and graduate classes in the social and health sciences and for individuals in the public and private sectors who are responsible for conducting and using surveys. *The Publishers Weekly Academic Press* The Wiley-Interscience Paperback Series consists of selected

books that have been made more accessible to consumers in an effort to increase global appeal and general circulation. With these new unabridged softcover volumes, Wiley hopes to extend the lives of these works by making them available to future generations of statisticians, mathematicians, and scientists. "Survey Errors and Survey Costs is a well-written, well-

presented, and highly readable text that should be on every error-conscious statistician's bookshelf. Any courses that cover the theory and design of surveys should certainly have Survey Errors and Survey Costs on their reading lists." -Phil Edwards MEL, Aston University Science Park, UK Review in The Statistician, Vol. 40, No. 3, 1991 "This volume is an extremely valuable

contribution to survey methodology. It has many virtues: First, it provides a framework in which survey errors can be segregated by sources. Second, Groves has skillfully synthesized existing knowledge, bringing together in an easily accessible form empirical knowledge from a variety of sources. Third, he has managed to integrate into a common framework the contributions of several

disciplines. For example, the work of psychometricians and cognitive psychologists is made relevant to the research of econometricians as well as the field experience of sociologists. Finally, but not least, Groves has managed to present all this in a style that is accessible to a wide variety of readers ranging from survey specialists to policymakers." -Peter H. Rossi University of

Massachusetts at Amherst Review in Journal of Official Statistics, January 1991
Criminal Statistics, England and Wales SAGE Handbook of Aging and the Social Sciences, Ninth Edition, provides a comprehensive synthesis of the latest research findings in the science of aging. The complexities of population dynamics, cohort succession and policy changes modify the

world and its inhabitants in ways that must be vigilantly monitored. Completely revised, this edition not only includes the foundational, classic themes of aging research, but also a rich array of emerging topics and perspectives that advance the field in exciting ways. New topics include families, immigration, social factors and cognition, caregiving, neighborhoods and built

environments, natural disasters, religion and health, and sexual behavior, among others. This book will serve as a useful resource and an inspiration to those searching for ways to contribute to the aging enterprise. Includes aging topics at both the micro- and macro-level. Addresses the intersection of individual and aggregate factors. Covers a spectrum of disciplines, including demography,

economics, epidemiology, gerontology, political science, psychology, social work, sociology and statistics. Brings together the work of almost fifty leading scholars to provide a deeper understanding of aging. **How to Ask Survey Questions** National Ctr for Health Statistics Engaging and informative, this book provides students and researchers with a pragmatic,

new perspective on the process of collecting survey data. By proposing a post-positivist, interviewee-centred approach, it improves the quality and impact of survey data by emphasising the interaction between interviewer and interviewee. Extending the conventional methodology with contributions from linguistics, anthropology, cognitive studies and

ethnomethodology, Gobo and Mauceri analyse the answering process in structured interviews built around questionnaires . The following key areas are explored in detail: An historical overview of survey research The process of preparing the survey and designing data collection The methods of detecting bias and improving data quality The strategies for combining quantitative and qualitative approaches

The survey within global and local contexts Incorporating the work of experts in interpersonal and intercultural relations, this book offers readers an intriguing critical perspective on survey research.

Giampietro Gobo, Ph.D., is Professor of Methodology of Social Research and Evaluation Methods at the Department of Social and Political Studies -

University of Milan. He has published over fifty articles in the areas of qualitative and quantitative methods. His books include Doing Ethnography (Sage 2008) and Qualitative Research Practice (Sage 2004, co-edited with C. Seale, J.F. Gubrium and D. Silverman). He is currently engaged in projects in the area of workplace studies. Sergio Mauceri, Ph.D., is Lecturer in Methodology

<p>of Social Sciences and teaches Quantitative and Qualitative Strategies of Social Research at the Department of Communicatio n and Social Research - University of Rome 'La Sapienza'. He has published several books and articles on data quality in survey research, mixed strategies, ethnic prejudice, multicultural cohabitation, delay in the transition to adulthood,</p>	<p>worker well- being in call centres and homophobia. <i>U.S.</i> <i>Geological</i> <i>Survey</i> <i>Professional</i> <i>Paper</i> SAGE <i>U.S.</i> Geological Survey Water- supply Paper<i>U.S.</i> Geological Survey Professional PaperWest AfricaGeologic al Survey Professional PaperNew TimesGeologic al Survey Water-supply PaperGeologic al Survey Professional PaperGazette Building Quantities ExplainedMac</p>	<p>millan International Higher Education <u>In-person,</u> <u>Mail,</u> <u>Telephone and</u> <u>Web Methods</u> African Minds This book is written in a user-friendly style for persons in business, government and non-profit organizations who want to write and/or execute a survey using either the in- person, mail, telephone or web methods or who want a good grounding in survey research methods</p>

without all the jargon. A short introduction to survey research is provided in Chapter 1. Chapter 2 focuses on ethics using examples from national and international professional associations. Chapter 3 describes how to propose a survey within an organization and provides examples. Chapter 4 focuses on probability sampling methods used in survey research. Chapters 5 to 8 show how to develop and field a survey using the mail, in-person, telephone and the web and provides example question formats, overall questionnaire design and cover letters for each method. Chapters 9 and 10 show one how to do data entry and data analysis (frequencies, crosstabulations and multiple regression). The next to the last chapter shows how to present your results using charts, and the final chapter provides a sample research report. Advanced sources are recommended for those who want to specialize in survey research or subfields of sampling and/or data analysis.

Drum SAGE This volume is part of the definitive edition of letters written by and to Charles Darwin, the most celebrated naturalist of

the nineteenth century. Notes and appendixes put these fascinating and wide-ranging letters in context, making the letters accessible to both scholars and general readers. Darwin depended on correspondence to collect data from all over the world, and to discuss his emerging ideas with scientific colleagues, many of whom he never met in person. The letters are published

chronologically: volume 24 includes letters from 1876, the year in which Darwin published *Cross and Self Fertilisation in the Vegetable Kingdom*, and started writing *Forms of Flowers*. In 1876, Darwin's daughter-in-law, Amy, died shortly after giving birth to a son, Bernard Darwin, an event that devastated the family. The volume includes a supplement of 182 letters from earlier years,

including a newly discovered collection of letters from William Darwin, Darwin's eldest son. U.S. Geological Survey Water-supply Paper Macmillan International Higher Education Designing and Doing Survey Research is an introduction to the processes and methods of planning and conducting survey research in the real world. Taking a mixed method approach

throughout, the book provides step-by-step guidance on:

- Designing your research
- Ethical issues
- Developing your survey questions
- Sampling
- Budgeting, scheduling and managing your time
- Administering your survey
- Preparing for data analysis

With a focus on the impact of new technologies, this book provides a cutting-edge look at how survey research is conducted

today as well as the challenges survey researchers face. Packed full of international examples from various social science disciplines, the book is ideal for students and researchers new to survey research. Available with Perusall—an eBook that makes it easier to prepare for class Perusall is an award-winning eBook platform featuring social annotation tools that

allow students and instructors to collaboratively mark up and discuss their SAGE textbook. Backed by research and supported by technological innovations developed at Harvard University, this process of learning through collaborative annotation keeps your students engaged and makes teaching easier and more effective.
