Francis Story's interest in cases of rebirth memories finally led him to assist Dr. Ian Stevenson in tracing, investigating, and studying such cases in Sri Lanka, Thailand, and India. The present book contains Story's essays on the theme of rebirth as well as case studies that he undertook in collaboration with Professor Stevenson, the foremost American investigator of reported rebirth memories. These case studies, which make fascinating reading, lend strong evidential support to the hypothesis of rebirth and thus help to illuminate the ultimate questions concerning human destiny after death.

The Soul reviews and summarises key literature and research that has been conducted in relation to the soul, the development

of the soul, and the journey of the soul through its various cycles. It explains the relationship between the soul and the human body, the occupancy of the human body, how the soul develops and advances spiritually, soul transfer on death, what happens to the soul on death, what the soul does after death of the body, and the soul's 'home', a non-physical world it resides in. It also references the coming changes on Earth and how these changes may affect the soul's development. This book has all the key information about the soul in one place and is an easy-to-read reference guide.

Scattered throughout many kabbalistic and Hasidic texts are numerous teaching stories with reincarnation as their central theme. In order to make the classical stories understandable to the modern reader, each tale has been expanded to include clear explanations of cultural and religious details. Both classical and contemporary tales are included here, from sources as widely varied as kabbalistic texts, folklore anthologies, and discussion on the Internet. Of special interest are several new tales collected by the author himself, which have never before appeared in print.

Has your child lived before? In this fascinating, controversial, and groundbreaking book, Carol Bowman reveals overwhelming evidence of past life memories in children. Not only are such experiences real, they are far more common than most people realize. Bowman's extraordinary investigation was sparked when her young son, Chase, described his own past-life death on a Civil War battlefield--an account so accurate it was authenticated by an expert historian. Even more astonishing, Chase's chronic eczema and phobia of loud noises completely disappeared after he had the memory. Inspired by Chase's dramatic healing, Bowman compiled dozens of cases and wrote this comprehensive study to explain how very young children remember their past lives, spontaneously and naturally. In *Children's Past Lives*, she tells how to distinguish between a true past life memory and a fantasy, offers practical advice to parents on how to respond to a past life memory, and shows how to foster the spiritual and healing benefits of these experiences. Perhaps the most moving, convincing, and best-documented evidence yet for life after death, *Children's Past Lives* will stand alongside the classics of Betty J. Eadie, Raymond Moody, and Brian Weiss in its power to comfort, uplift, and transform our thinking about life after death.

For centuries the prevailing western worldview has been built upon the materialistic, mechanical model of Isaac Newton - a clockwork Universe composed of separate particles of matter interacting according to precise physical laws and existing within objective dimensions of space and time. This model has long succeeded in describing many facets of our multi-faceted reality, but increasingly since the revelations of Einstein and the paradigm-crushing implications of quantum physics, Newton's world is quietly fading from view and being replaced by a more spiritual science. Topics covered include: Quantum Physics, Consciousness, The Holographic Universe, Morphic Fields, The Human Energy Body, Psychoneuroimmunology, Chi, Chakras, Meridians, Acupuncture, Auras, Telepathy, Psychokinesis, Remote Viewing, Precognition, Out of Body Experiences, Near Death Experiences, Entheogens, Death, Ghosts, Reincarnation, God, Tao, Brahma, Void, Infinite Consciousness, and Oneness

Looking back at her lengthy career just four years before her death, modernist painter Nell Blaine said, "Art is central to my life. Not being able to make or see art would be a major deprivation." The Virginia native's creative path began early, and, during the course of her life, she overcame significant barriers in her quest to make and even see art, including serious vision problems, polio, and paralysis. And then there was her gender. In 1957 Blaine was hailed by *Life* magazine as someone to watch, profiled alongside four other emerging painters whom the journalist praised "not as notable women artists but as notable artists who happen to be women." In *Central to Their Lives*, twenty-six noted art historians offer scholarly insight into the achievements of female artists working in and inspired by the American South. Spanning the decades between the late 1890s and early 1960s, this volume examines the complex challenges these artists faced in a traditionally conservative region during a period in which women's social, cultural, and political roles were being redefined and reinterpreted. The presentation—and its companion exhibition—features artists from all of the Southern states, including Dusti Bongé, Anne Goldthwaite, Anna Hyatt Huntington, Ida Kohlmeyer, Lois Mailou Jones, Alma Thomas, and Helen Turner. These essays examine how the variables of historical gender norms, educational barriers, race, regionalism, sisterhood, suffrage, and modernism mitigated and motivated these women who were seeking expression on canvas or in clay. Whether working from studio space, in spare rooms at home, or on the world stage, these artists made remarkable contributions to the art world while fostering future generations of artists through instruction, incorporating new aesthetics into the fine arts, and challenging the status quo. Sylvia Yount, the Lawrence A. Fleischman Curator in Charge of the American Wing at the Metropolitan Museum of Art, provides a foreword to the volume.

This book goes through the WHOLE of life in stages, but it begins not at birth, or even conception, but in the planning stage, in what is known by Tibetans as the Bardo - the inter-life stage - when important decisions are made re ones chief purpose(s) in the forthcoming life, the main lessons that need to be learnt, the karmic debts to be paid, and the main cast of characters. (Some

people choose a happy life living with a soul mate, while others realise that they will learn more, overcome more important challenges and complete more of their karma by living a life on their own or one with more pain and difficulty.) And the book ends not at death, but rather shows how death is not the end, describing some fictional post-death scenarios. It includes numerous true case histories, many of which demonstrate the impact of previous lives on a persons present life, and each chapter is followed by useful self-help exercises. Above all it shows how there is a good reason for everything that happens in life.

Life in the Spirit World Trafford

For thousands of years our view of the afterlife has been handed down to us by a variety of prophets and gurus. But in the last few decades thousands of ordinary people have been taken back into their 'life between lives' in the light realms. Their consistent reports form one of the most profound sources of spiritual wisdom ever available to humanity. And now two researchers have decided to push this source to its limits... It is important enough that we should understand what happens to us between lives in the light realms: how we receive energy healing to lighten our vibrations; how we review our lives without judgment from higher beings; and how we choose and plan our next lives along with close soul mates, in order to face the lessons and experiences that will most allow us to grow. But what if we could use the interlife experience to answer a host of more universal questions of spiritual, historical and philosophical importance? About everything from unusual soul behavior and soul development, through humanity's past and future, to the true nature of reality and time? What if multiple regression subjects came up with consistent answers? And what if they displayed wisdom so profound as to be way beyond any normal human capacity?

Creating the Value of Life Garden City, N.Y. : Doubleday
Deep in lost history, did high civilizations and advanced knowledge thrive? The ancient Vedic literatures of India describe a worldwide civilization that flourished at a time when modern historians insist that humans like us existed simply as hunter-gatherers. This Vedic civilization, centered in India, employed technologies based on a scientific understanding of the physical elements and forces we know today, as well as more subtle conscious elements. Devamrita Swami, who has spent a lifetime in his own search for Vedic India, takes us on a journey of intellectual discovery through the history of the remarkable Vedic civilization and its knowledge, locked in the ancient literatures of India. His wit and wisdom combine to make our search for Vedic India not only illuminating but entertaining. He tells us not only the truths of Vedic India, but how they are again coming to be. Searching for Vedic India thus takes us not only into the past, but into the future.
