readers develop a
complete, accurate
psychological self-portrait
and show them how to
achieve success in life.

The Changing Face of

Afro-Caribbean Cultural Identity

Pearson Educación

What is it about the top
tech product companies
such as Amazon, Apple,
Google, Netflix and Tesla
that enables their record
of consistent innovation?
Most people think it's
because these companies
are somehow able to find
and attract a level of
talent that makes this
innovation possible. But
the real advantage these
companies have is not so

much who they hire, but
rather how they enable
their people to work
together to solve hard
problems and create
extraordinary products. As
legendary Silicon Valley
coach--and coach to the
founders of several of
today's leading tech
companies--Bill Campbell
said, "Leadership is about
recognizing that there's a
greatness in everyone,
and your job is to create
an environment where
that greatness can

emerge.” The goal of EMPOWERED is to provide you, as a leader of product management, product design, or engineering, with everything you’ll need to create just such an environment. As partners at The Silicon Valley Product Group, Marty Cagan and Chris Jones have long worked to reveal the best practices of the most consistently innovative companies in the world. A natural companion to the bestseller INSPIRED, EMPOWERED tackles

head-on the reason why most companies fail to truly leverage the potential of their people to innovate: product leadership. The book covers: what it means to be an empowered product team, and how this is different from the “feature teams” used by most companies to build technology products recruiting and coaching the members of product teams, first to competence, and then to reach their potential creating an inspiring product vision along with

an insights-driven product strategy translating that strategy into action by empowering teams with specific objectives—problems to solve—rather than features to build redefining the relationship of the product teams to the rest of the company detailing the changes necessary to effectively and successfully transform your organization to truly empowered product teams EMPOWERED puts decades of lessons learned from the best

leaders of the top technology companies in your hand as a guide. It shows you how to become the leader your team and company needs to not only survive but thrive. Prabhat Prakashan

Neuro-robotics is one of the most multidisciplinary fields of the last decades, fusing information and knowledge from neuroscience, engineering and computer science. This book focuses on the results from the strategic alliance between Neuroscience and Robotics that help the

scientific community to better understand the brain as well as design robotic devices and algorithms for interfacing humans and robots. The first part of the book introduces the idea of neuro-robotics, by presenting state-of-the-art bio-inspired devices. The second part of the book focuses on human-machine interfaces for performance augmentation, which can be seen as augmentation of abilities of healthy subjects or assistance in case of the mobility

impaired. The third part of the book focuses on the inverse problem, i.e. how we can use robotic devices that physically interact with the human body, in order (a) to understand human motor control and (b) to provide therapy to neurologically impaired people or people with disabilities.

Esophageal Squamous Cell Carcinoma Grand Central Publishing

Despite the common perception that medicine is becoming specialty driven, there are many reasons for primary care

providers to offer women's health procedures in an office setting. Women feel more comfortable having procedures done by providers whom they already know and trust. Continuity of care is still valued by patients, who trust their primary care providers to work with them as collaborators in the decision-making process. Women have found that their options for care have become limited, not by their own decision, but by the lack of training of their provider. In rural

areas, the barriers of time, expense, and travel often prevent many women from obtaining necessary care; yet many of the procedures that these women are requesting are relatively easy to learn. Positive experiences are shared by women who then refer friends and family by word of mouth. This book has been designed to assist not only the clinician performing the procedures covered, but also the office staff with setting up the equipment tray prior to performing

the procedure and with preparing office documents and coding information needed to complete the procedure. Most procedures covered can be done with a minimum investment in equipment and require minimal training.

Why Humanae Vitae Was Right Introduction to RoboticsMechanics and Control

Bien des comportements reliés à l'usage d'Internet sont contraires à l'éthique. Pensons par exemple à la diffusion de contenus illicites ou

offensants, au piratage ou à la violation de données personnelles, au non-respect des droits d'auteur ou encore à la propagande haineuse. L'éthique pourrait se définir comme l'ensemble des valeurs fondamentales à partir desquelles les êtres humains se positionnent et interagissent les uns par rapport aux autres dans le souci du respect mutuel, de la garantie de la dignité humaine et du bien commun. Pour tenter de désigner l'éthique sur Internet, des termes

nouveaux apparaissent telles la néthique qui fait référence aux règles de conduite à caractère moral, la nétiquette qui correspond aux règles de politesse, de bienséance et de savoir-vivre, ou encore la cyberéthique, terme moins attesté, qui recouvre sensiblement le même sens. L'objet du livre est d'offrir un ensemble de réflexions et de résultats de recherches portant sur des problématiques liées au questionnement éthique et à Internet. L'identité virtuelle n'est-

elle qu'un concept ou correspond-elle véritablement à une déprise d'avec le réel? L'information devenue numérique transforme-t-elle son traitement dans les médias traditionnels au point de répondre aux seuls enjeux de la logique marchande? La gestion des organisations et des entreprises à l'heure d'Internet ne soulève-t-elle pas de nouveaux défis éthiques pour la communication organisationnelle? Voilà quelques-unes des questions auxquelles le

présent ouvrage tente de répondre. L'ouvrage est constitué de onze chapitres regroupés en trois grandes sections : 1) Enjeux éthiques d'Internet (cyberconsommateur, gratuités, porosité des frontières du privé et du public, crise du sens), 2) Internet et l'éthique organisationnelle et sociale (concurrence et éthique organisationnelle, éthique des cyberorganisations, TIC et inégalités sociales), 3) Éthiques, cyberjournalisme et conflits (éthique et

déontologie du cyberjournalisme, éthique de l'information identitaire dans les conflits). Treize auteurs ont contribué à cet ouvrage qui réunit des points de vue diversifiés autour d'une problématique générale : celle des enjeux éthiques contemporains soulevés par Internet, ses usages et ses incidences individuelles et collectives. Socio-Life Science and the COVID-19 Outbreak Springer
This book covers a wide

range of topics in oral surgery with detailed, step-by-step analysis of surgical techniques, with many examples. Various aspects of surgical techniques are analyzed. These include the instruments and materials used in oral surgery, types of flaps and suturing techniques, radiographic techniques, complications and treatment, and odontogenic infections. Also covered is the latest scientific information concerning preventive and therapeutic use of

antibiotics in dentistry. The abundant photographic material, together with figures which are of excellent quality, make this book a must in every dental library.

Lobela Ignatius Press

This book serves as a comprehensive reference for the basic principles of caring for older adults, directly corresponding to the key competencies for medical student and residents. These competencies are covered in 10 sections, each with chapters that target the

skills and knowledge necessary for achieving competency. Each of the 45 chapters follow a consistent format for ease of use, beginning with an introduction to the associated competency and concluding with the most salient points for mastery. Chapters also includes brief cases to provide context to the clinical reasoning behind the competency, strengthening the core understanding necessary to physicians of the future. Written by expert educators and clinicians in

geriatric medicine, Geriatric Practice is key resource for students in geriatric medicine, family and internal medicine, specialties, hospice and nursing home training, and all clinicians studying to work with aging patients.

Esophageal cancer causes
an estimated 386,000
deaths worldwide and is
the sixth most common

cause of death for men. The background characteristics of esophageal cancer treatment are markedly different between Asian and Western countries, however. In tumor histology, squamous cell carcinoma associated with smoking and alcohol consumption is overwhelmingly prevalent in Asia, whereas adenocarcinoma associated with Barrett's metaplasia is markedly prevalent in the West. In Asia, especially in Japan, the key persons who play

important roles in the management of esophageal cancer patients are surgeons; in the West those roles are filled by medical and radiation oncologists as well as surgeons. The philosophy of surgeons regarding cancer surgery varies from locoregional to local tumor control, particularly in focusing on lymph node dissection. Physicians' approach to surgical adjuvant therapy differs, therefore, between Asia and the West. Considering these East-West differences in

esophageal cancer treatment, the currently available results of Western evidence should not be considered directly applicable to esophageal cancer in Asia. In this book, the authors discuss the knowledge base in Japan in terms of treatment of esophageal squamous cell carcinoma. Since this volume contains a wide spectrum of current information and addresses topics surrounding the treatment of patients with esophageal squamous cell carcinoma, it is highly

relevant to Asian physicians and researchers as well as to their counterparts in the West.

Pan-Africanism

Bloomsbury Publishing
The understanding of the nature of reality is the insight upon which the Buddha was able to achieve his own enlightenment. This vision of the sublime is the source of all that is enigmatic and paradoxical about Buddhism. In *Verses from the Center*, Stephen Batchelor explores the history of

this concept and provides readers with translations of the most important poems ever written on the subject, the poems of 2nd century philosopher Nagarjuna.

Ordinary People,
Extraordinary Products
Lippincott Williams & Wilkins

This textbook describes the biomechanics of bone, cartilage, tendons and ligaments. It is rigorous in its approach to the mechanical properties of the skeleton yet it does not neglect the biological properties of skeletal

tissue or require mathematics beyond calculus. Time is taken to introduce basic mechanical and biological concepts, and the approaches used for some of the engineering analyses are purposefully limited. The book is an effective bridge between engineering, veterinary, biological and medical disciplines and will be welcomed by students and researchers in biomechanics, orthopedics, physical anthropology, zoology and veterinary science. This

book also: Maximizes reader insights into the mechanical properties of bone, fatigue and fracture resistance of bone and mechanical adaptability of the skeleton Illustrates synovial joint mechanics and mechanical properties of ligaments and tendons in an easy-to-understand way Provides exercises at the end of each chapter
Lifetypes John Wiley & Sons
 Bel-Ami Guy De Maupassant - The story chronicles journalist Georges Duroy's corrupt

rise to power from a poor ex-NCO to one of the most successful men in Paris, most of which he achieves by manipulating a series of powerful, intelligent, and wealthy mistresses.
Bel-Ami Springer Publishing Company
 For the 25th anniversary year of the historic document *Humanae Vitae*(1968), Janet Smith has gathered together twenty-one outstanding essays and articles by well-respected thinkers to provide the demonstration that Pope Paul VI was not simply

correct, but prophetic. While this document is still widely neglected and misunderstood, the Church continues to proclaim that contraception is a moral evil and that the view of man, sexuality, and marriage that leads to the use of the Pill is not one that is compatible with human dignity, sexual responsibility and spousal love. Many are unaware that there have been energetic and persuasive worth defenses of this teaching. The general reader, as well as the

ethicist and moral theologian, will find much here to stimulate his thinking on this issue.

Contributors include William May, Paul Quay, Elizabeth Anscombe, Dietrich von Hildebrand, Carlo Caffara, Cormac Burke, Ralph McInerny, John Kippley, John Finnis and Janet Smith.

The Sand Child Amer Society for Microbiology A seasonal meander through the wilds of Scotland. 'If Clanlands was a gentle road trip through Scotland, this almanac is a top down,

pedal to the metal up and down odyssey through the many byways of a Scottish year. An invitation to anyone who picks up the book to join us on a crazy camper van exploration over 12 glorious, whisky fuelled months. Mountains, battles, famous (and infamous) Scots, the alarming competitiveness of Men in Kilts, clans, feuds, flora, fauna, with a healthy sprinkling of embarrassing personal reminiscences thrown in. Much is explored, all is shared. It is a camper van

cornucopia of all things Alba'. From First Footing to Samhain, Fringe Festival follies to whisky lore, Sam & Graham guide readers through a year of Scottish legends, traditions, historical and contemporary events, sharing personal stories and tips as only these two chalk-and-cheese friends can. As entertaining as it is practical, The Clanlands Almanac is a light-hearted education in Scottish history and culture, told through the eyes of two passionate Scotsmen. The perfect escapist guide,

The Clanlands Almanac is intended as a starting point for your own Scottish discoveries. The ASCRS Manual of Colon and Rectal Surgery Wipf and Stock Publishers
 RESUME : Après " l'étrange vision des anges", voici le second roman de Virginie Noel, médium, canalisé par ses guides spirituels, Dieu des Monalges, Jésus, et la Vierge Marie. La question de la libération des karmas est expliquée, comment se libérer enfin des karmas, notamment ceux des bourreaux, des victimes. Pourquoi et

comment se libérer des karmas à l'aube de cette nouvelle ère spirituelle. Des âmes sont enlevées de la Terre des réincarnés, des meurtres sont à enlever des karmas des bourreaux. Dieu dénonce les violences faites aux femmes, et aborde des sujets délicats comme l'euthanasie, la veillée funèbre, l'immaculée conception mais aussi la création de l'humanité, l'origine de l'homme. Après la vision des anges du haut astral, voici une vision du bas astral, appelée dans ce

roman le purgatoire. Dieu des Monalges donne des avertissements aux humains afin de sauver leurs âmes du purgatoire, du bas astral et donne les solutions pour se rédempter et ainsi élever les vibrations des âmes. Le temps de la pleine libération des karmas est arrivé dans l'entrée de la nouvelle ère du Verseau.
Seasonal Stories from Scotland Springer
 Science & Business Media
 A moving fable about luck, persistence, and hope, grounded in the often tragic reality of

modern-day immigration, by the winner of the 2004 Prix Goncourt. Captain Salvatore Piracci has sailed along the Italian coast for the last twenty years, intercepting boats with clandestine African immigrants who have risked everything in the hope of reaching the new Eldorado. But when Piracci is confronted by a woman haunted by the death of her son, killed during an illegal crossing, he is forced to question the validity of his border-patrolling mission. Meanwhile, two brothers

prepare to leave Sudan and make the dangerous passage to Europe. Separated mid-voyage, Suleiman, the youngest, vows to make it to the promised land and find the means to reunite with his ailing elder brother. At a time when debates over immigration and national identity dominate headlines in the United States and Europe, best-selling author Laurent Gaudé offers a unique portrait of the individuals who compromise their dreams and endanger their lives in search of a

better existence.

This informative guide discusses the history, myths, customs, lore, and traditions associated with the eight Pagan holidays. More than merely a listing of activities for each holiday, this examination explains the origins and symbolism of the Sabbats and why they are celebrated. The literary quality of the essays, coupled with the comprehensive knowledge of folklore, has made this book a

perennial favorite.

California. Court of Appeal (2nd Appellate District). Records and Briefs Springer

This book contains a variety of medical case studies from actual patients presenting to the emergency department. It includes not only typical cases that present to the ED but also less common, yet very important cases that one can't afford to miss. Each chapter begins with a case - or set of cases with typical and atypical aspects - of the disease in question. This

is followed by high-value learning points on the condition with introductory/background points, physiology and pathophysiology of the disease, how to make the diagnosis, and finally how to initiate treatment. The cases provide expert discussion with tips and tricks, personal experience with management of each of the cases, and a follow-up description of the outcome of the cases to provide the reader with closure. To supplement each case study, all 67

chapters include a pattern recognition component that identifies the key diagnostic features of the disease discussed. The chapters conclude with a summary of the diagnostic and treatment details of each condition. Using a concise, easy-to-read, bulleted format, the book helps readers to learn, evaluate, adopt new practices, right now (LEARN). *Emergency Medicine Case Studies - LEARNing Rounds: Learn, Evaluate, Adopt, Right Now* is an essential resource for a variety of

emergency medicine clinicians including experienced physicians, residents, physician assistants, nurse practitioners, nurses, and medical students rotating in the emergency department. Finally, this book can be used as a basis for small group discussions, especially in emergency medicine training programs.

The Witches' Sabbats

Springer Science & Business Media

The Changing Face of Afro-Caribbean Cultural Identity: Negrismo and

Négritude looks primarily at Negrismo and Négritude through the eyes of the poetry of Nicolas Guillén, Manuel del Cabral, and Palés Matos as well as Léopold Senghor, Léon-Gontran Damas, and Aimé Césaire. The book shows Caribbean cultural identity as a slippery and fluctuating zone.

A Reader Johns Hopkins University Press
Lobela is the first volume of poetry written by Justo Bolekia Boleka, poet, author, and linguist. In these poems, Boleka

expresses his connection to his native land, Equatorial Guinea, the only nation in Sub-Saharan Africa whose language of colonization is Spanish. Gods, goddesses, adoration of elders, customs, longing for a lost land, and lost way of life are all part of these poetic expressions. Originally in Spanish, replete with songs, expressions, chants, and cadences from his native Bubi language, English readers will now have access to these expressions in this bi-

lingual edition.
