**The Phoenicians** Rizzoli International Publications

This volume offers a compAndium of the best ideas, analyses, and practices relating to the undergraduate curriculum as described by leading figures in the field. It contains both conceptual and practical information on effective practices, research, management, and assessment. In thirty-four original chapters, top practitioners and scholars detail a range of philosophies, frameworks, program designs, instructional strategies, and assessment methods being used to strengthen and transform the curriculum. They examine both the current state of knowledge and teaching in the disciplines and the forces that will reshape the curriculum in the coming years. The Handbook of Undergraduate Curriculum will prove valuable both to practitioners—as an operating manual or desk reference—and to faculty as a primary text for graduate courses on the curriculum. In addition, the book will be a useful tool for those serving on a general education curriculum committee or conducting a departmental review of a major program, as well as having

numerous other practical applications for anyone with responsibility for or interest in the curriculum.

**Migration for Employment Bilateral Agreements at a Crossroads** Jossey-Bass

The publication presents an overview of foreign labour recruitment practices in OECD member countries. It discusses challenges to the negotiation of labour recruitment agreements and the prospects for potential co-operation on migration.

*Human Trafficking and Forced Labour Exploitation* ILO

The first kings of the Achaemenid Persian empire, Cyrus the Great and Darius, sought to devise for their capital cities new styles in monumental architecture and sculpture to express their imperial status and mastery of the known world. With no local tradition to guide designers, a homogeneous style was created from the example of the many new subjects - Ionian Greeks, Lydians, Mesopotamians, and Egyptians. This book traces these sources and explores the way that traditional Achaemenid motifs, if not styles, also permeated the empire. The Achaemenid Persian experiment was unique in antiquity, and it was successful for as long as the empire lasted. Even after Alexander the Great brought about its

downfall, it continued to influence the arts from Greece to India. This is a record of the brilliant flowering of an artificial yet unified construct, unmatched in the art of the Old World. Future of the Humanities OECD Publishing

This guide proposes a multi-faceted approach to combating and preventing human trafficking, by including a broad range of useful legal frameworks as well as institutional actors. It offers lawmakers and law enforcement authorities (both police and labour inspectors) with practical aid to understand and implement international standards on human trafficking and to take action accordingly, in particular from the viewpoint of forced labour and child labour. The broad spectrum of sanctions - criminal, administrative and civil - are highlighted and the guide demonstrates the importance of immigration and labour law, especially with regard to the identification, protection and rehabilitation of victims as well as the monitoring of recruiters

and other auxiliaries.

**73 Dipole and Long-wire Antennas**  
BRILL

This book locates the humanities in six general fields of study: religion and philosophy, art and music, and literature and history. It offers suggestions for interdisciplinary work around topics such as punishment, and death and dying.

*Handbook of the Undergraduate Curriculum* Routledge

"The ancient Phoenician civilization is still shrouded in mystery. Scholars question when the Phoenicians became powerful, where they came from, and how they came to be such brilliant navigators and merchants that they colonized much of the Mediterranean rim. This detailed study of the Phoenicians is filled with important essays and illustrations that trace the rise and fall, the art and customs, the trade and exploration, and the rich legacy of this fascinating culture." -- Publisher's description.
