This book examines the emerging and shifting issues in the field of gay tourism,

how these relate to significant societal and technological changes and the implications of these changes for theory, policy and practice. It addresses the political and sociocultural discourses evident within gay tourism consumption and explores the conceptualisations of gay tourism within the contexts of tourist profiles and identities. While gay travel

research has been dominated by Western perspectives and traditions, this book incorporates voices from non-Western perspectives and cultures. The volume investigates the value of gay tourism that facilitates our engagement with tourism experiences, leisure opportunities and pleasure. It will be a useful resource for students, lecturers and researchers in

tourism, human geography, cultural studies and sociology.

Since its very beginning, archaeology has in many senses always related to a much wider constituency than just

archaeologists. This relationship between archaeology and the public has often been overlooked and constantly changes. Public archaeology, as a field of research and practice, has been developing since the 1970s in English-speaking countries, particularly in the United States, Britain, and Australia, and is today beginning to spread to other parts of the world. Global expansion of public archaeology comes with the recognition of the need for a careful understanding of local contexts, particularly the culture and socio-political climate. This volume critically examines the current theories and practices of public archaeology through relevant case studies from different regions throughout the world, including: Japan, China, South Korea, New Caledonia, South Africa, Senegal, Jordan, Italy, Peru, Canada, the United Kingdom, the United States, and Australia. These case studies are examined from a wide variety of theoretical contexts, to provide a thorough and comprehensive guide to the state of public archaeology today, as well as implications for its future. As the theory and practice of public archaeology continues to change and grow,

archaeology's relationship with the broader community needs to be critically and openly examined. The contributions in this wide-ranging work are a key source of information for anyone practicing or studying archaeology in a public context. Mandarin Chinese has become

indispensable for crosslinguistic comparison and syntactic theorizing. It is nevertheless still difficult to obtain comprehensive answers to research questions, because Chinese is often presented as an "exotic" language defying the analytical tools standardly used for other languages. This book sets out to demystify Chinese. It places controversial issues in the context of current syntactic theories and offers precise analyses based on a large array of representative data. Although the focus is on Modern Mandarin, earlier stages of Chinese are occasionally referred to in order to highlight striking continuities in its history. VO order is one such constant factor, thus invalidating the idea that Chinese went through a major word order change from OV to VO and back to OV. Another claim often made for Chinese as an isolating language, viz. the existence of an impoverished inventory of parts of speech, is likewise refuted. Other long debated issues addressed here include the relevance of the dichotomy topic vs subject prominence and the role of Chinese as a recurring exception to crosscategorical harmonies posited in typological studies.

The General Practice Jigsaw provides comprehensive and up-to-date information on the future of education training and professional development in general practice and primary care. It is an anthology of work produced by many of the leading figures in general practice across the United Kingdom. General practice now faces challenges that could be seen as threatening the way it traditionally operates but can also be seen as presenting opportunities. This book provides inspiration and guidance to its readers and fuel for the challenges ahead. It shares knowledge and best practice on education teaching and professional development drawing on examples from local regional and national projects. It is essential reading for general practitioners involved in education and training for everyone who needs to know how revalidation and professional development will influence them and for all members of primary health care teams who want to be involved in shaping the primary care organisations of the future.

Democracy brings together diverse communities of education research in an innovative way to develop a nuanced understanding of the relationship between education and democracy. This book synthesises a range of theoretical, conceptual, and empirical approaches to address the complex challenges faced by young people and societies in the 21st century. Each chapter provides accounts of local democratic encounters in education, while engaging with global debates and issues, such as de-democratisation and growing social, economic, and educational inequality. This book presents new ways of thinking about democracy, local-global enactments of democracy through teaching and learning, and future thinking for a new era of democracy. This book will be relevant for educators, researchers, and policymakers who are interested in educational sociology, critical pedagogy, and democratic education.

Since the 1970s the issue of intimate partner violence (IPV) has been explained through the patriarchal desire of men to control and dominate women, but this gendered perspective limits both our understanding of IPV and its treatment. *Intimate Partner Violence: New Perspectives in Research and Practice* is the first book of its kind to present a detailed and rigorous critique of current domestic violence research and practice within the same volume. In this challenging new text, with contributions from the UK, the US, and Canada, the subject is assessed from a more holistic position. It provides a critical analysis of the issue of domestic violence including issues that are often not part of the mainstream discussion. Each of the chapters tackles a different area of research or practice, from a critical review of contemporary topics in domestic violence research, including a critical review of men's use of violence in

relationships, a consideration of male victims, IPV within the LGBTQ+ community, perceptions of perpetrators and victims, and IPV within adolescent populations. The second half of the book examines challenges and opportunities for professionals working in the field and includes an analysis of an evidence informed perpetrator programme, the challenges faced working with male victims, and a discussion of the impact of domestic violence on children. Culminating with a series of evidence-based recommendations to bridge the divide between academic and practitioner stakeholders and to inform future working practices, this is an essential resource for students and practitioners alike.

New Perspectives in Forensic Human Skeletal Identification provides a comprehensive and up-to-date perspective on human identification methods in forensic anthropology. Divided into four distinct sections, the chapters will reflect recent advances in human skeletal identification, including statistical and

morphometric methods for assessing the biological profile (sex, age, ancestry, stature), biochemical methods of identification (DNA analysis, stable isotope analysis, bomb curve analysis), and use of comparative radiography. The final section of this book highlights advances in human identification techniques that are being applied to international populations and disaster victims. The contributing authors represent established experts in forensic anthropology and closely related fields. *New Perspectives in Forensic Human Skeletal Identification* will be an essential resource for researchers, practitioners, and advanced students interested in state-of-the-art methods for human identification. A comprehensive and up-to-date volume on human identification methods in forensic anthropology Focuses on recent advances such as statistical and morphometric methods for assessing the biological profile, biochemical methods of identification and use of comparative radiography Includes an entire section on human identification techniques being applied to international populations and disaster victims
