Conditional constructions have long fascinated linguists, grammarians and philosophers. In this pioneering new study, Barbara Dancygier and Eve Sweetser offer a new descriptive framework for the study of conditionality, broadening the range of richly described conditional constructions. They explore theoretical issues such as the mental-space-building processes underlying conditional thinking and the form-meaning relationship involved in expressing conditionality. Using a broad range of attested English conditional constructions, the book examines inter-constructural relationships. Within the framework of Mental Spaces Theory, shared parameters of meaning are shown to be relevant to conditional constructions generally, as well as related temporal and causal constructions. This significant contribution to the field will be welcomed by a wide range of researchers in theoretical and cognitive linguistics.

Oswaal ISC Question Bank Class 12 English Paper-1 Language Book Chapterwise & Topicwise (Reduce Syllabus) (For 2022 Exam) Gramedia Pustaka Utama

The focus on communication in TBLT often comes at the expense of form. In this book, the task-based approach is enhanced and coupled with insights into (cognitive) grammar, an approach which sees grammar as meaningful. The book shows how grammar teaching can be

integrated into a communicative lesson in a non-explicit way, i.e., "by the backdoor". The learners are involved in situations that they may also encounter outside their classrooms and they are given communicative tasks they are to work on and solve, usually with a partner or in small groups. What teachers need to invest for preparing such lessons is their own creativity, as they have to come up with communicative situations which guide the learners into using a specific grammatical structure. The book first discusses the didactic and the linguistic theories involved and then translates these theoretical perspectives into actual teaching practice, focusing on the following grammatical phenomena: tense, aspect, modality, conditionals, passive voice, prepositions, phrasal verbs, verb complementation, pronouns and articles.

In The Future Conditional, Eric S. Henry brings twelve-years of expertise and research to offer a nuanced discussion of the globalization of the English language and the widespread effects it has had on

Shenyang, the capital and largest city of China's northeast Liaoning Province. Adopting an ethnographic and linguistic perspective, Henry considers the personal connotations that English, has for Chinese people, beyond its role in the education system. Through research on how English is spoken, taught, and studied in China, Henry considers what the language itself means to Chinese speakers. How and why, he asks, has English become so deeply fascinating in contemporary China, simultaneously existing as a source of desire and anxiety? The answer, he suggests, is that English-speaking Chinese consider themselves distinctly separate from those who do not speak the language, the result of a cultural assumption that speaking English makes a person modern. Seeing language as a study that goes beyond the classroom, The Future Conditional assesses the emerging viewpoint that, for many citizens, speaking English in China has become a cultural need—and, more immediately, a realization of one's future.
