Newman Bundle, Sociology: Exploring the Architecture of Everyday Life, Brief Edition + Chirico, Sociological Research Exercises for the Global A Pine Forge Press

This new Brief Sixth Edition of David Newman's text is the streamlined version of Sociology: Exploring the Architecture of Everyday Life with the same goal: to be a textbook that, in the author's words, "reads like a real book." Newman shows to see the "unfamiliar in the familiar"—to step back and see organization and predictability in their take-for-granted personal experiences. Newman uses the metaphors of "architecture" and "construction," to help students understand that society is not something that exists "out there," independently of themselves; it is a human creation that is planned, maintained, or altered by individuals. Instead of surveying every subfield in sociology, this

text focuses on the structural features of society, the social construction of self and identity, and social inequality in the context of social institutions. The new edition includes examples and analysis of contemporary events and trends, including: The changes in our national politics brought about by the 2016 presidential election Increasing societal attention paid to fatal encounters between police and unarmed people of color or incidents of sexual harassment and assault School shootings and the debates over gun ownership The continued dramatic growth of communication technology, particularly social networking sites

In *Sociology: Exploring the Architecture of Everyday Life*, David Newman shows students how to see the "unfamiliar in the familiar"—to step back and see organization and predictability in their personal experiences. Through his approachable writing style and lively personal anecdotes, the author has maintained his goal from the first edition: to write a textbook that "reads like a real book." Many adopters of this book are fans of Peter Berger's classic works, which helped introduce the idea of "social constructionism" to sociology. Newman uses the metaphors of "architecture" and "construction," to help students understand that society is not something that exists "out there," independently of themselves; it is a human creation that is planned, maintained, or altered by individuals. Using vivid prose, current examples, and recent data, the Thirteenth Edition presents a unique and thought-provoking overview of how society is constructed and experienced. Instead of surveying every subfield in sociology, the more streamlined coverage (14 chapters) focuses on the individual and society, the construction of self and society, and social inequality in the context of social structures. Included with this title: The password-protected Instructor Resource Site (formally known as SAGE Edge) offers access to all text-specific resources, including a test bank and editable, chapter-specific PowerPoint® slides.
