Fuel Injection In more
elaborate terms, Kjet is a
Continuous Injection
System (commonly called
CIS), where unlike later L-
Jetronic or "standard"
Electronic Fuel Injection,
the injectors do not pulse
open and closed; once the
system pressure is high
enough they all inject a
constant spray of fuel, in
all cylinders at once,
which is varied in volume
by the system depending
on various factors. Bosch

Jetronic Fuel Injection
System
K-Jetronic is a

mechanically and hydraulically operated fuel injection pump, introduced by BOSCH GmbH in the year 1973. The K-Jetronic pump requires no form of drive and one of its features is that it can meter the fuel as a function of the intake air quantity. The letter 'K' stands for continuous in German. How Car Parts Work: K-Jetronic Fuel Injection System It is probably the first fuel injection system that was used by a number of motor manufacturers and on the whole, is pretty

reliable. It is quite a basic, mechanical system, as opposed to the more technical electronic engine management systems available now, and as such, is open to wear, corrosion and sticking of components and requires a certain amount of adjusting and cleaning to keep it working in the way Mr. Bosch intended. Bosch K Jetronic - Mechanical Fuel Injection Troubleshooter Mechanical fuel injection, 'K' stands for German: "Kontinuierlich", meaning

continuous. Commonly called 'Continuous Injection System (CIS)' in the USA. K-Jetronic is different from pulsed injection systems in that the fuel flows continuously from all injectors, while the fuel pump pressurises the fuel up to approximately 5 bar (73.5 psi). The volume of air taken in by the engine is measured to determine the amount of fuel to inject. Jetronic - Wikipedia Approximately up until 1994 mechanical fuel injection systems have been installed on

certain Mercedes, Audi, Volkswagen, Ford etc. car models – starting with Bosch K-Jetronic, and after that – Bosch KE-Jetronic. These fuel injection systems were considered to be really reliable and trustworthy. Basically, such conclusion can be made based on a large number of cars that had such injection systems installed by the manufacturers during that time.
