heartwarming true story of a life-changing friendship between a man and his rescue cat, Nala, as they adventure together on a bike journey around the world -- from the Instagram phenomenon @1bike1world. When 30-year-old Dean Nicholson set off from Scotland to cycle around the world, his aim was to learn as much as he could about our troubled planet. But he hadn't bargained on the lessons he'd learn from his unlikely companion. Three months after leaving home, on a remote road in the mountains between Montenegro and Bosnia, he came across an abandoned kitten. Something about the piercing eyes and plaintive meowing of the bedraggled little cat proved irresistible. He couldn't leave her to her fate, so he put her on his bike and then, with the help of local vets, nursed her back to health. Soon on his travels with the cat he named Nala, they forged an unbreakable bond -- both curious, independent, resilient and adventurous. The video of how they met has had 20 million views and their Instagram has grown to almost 750k followers --

and still counting! Experiencing the kindness of strangers, visiting refugee camps, rescuing animals through Europe and Asia, Dean and Nala have already learned that the unexpected can be pretty amazing. Together with Garry Jenkins, writer with James Bowen of the bestselling *A Street Cat Named Bob*, Dean shares the extraordinary tale of his and Nala's inspiring and heart-warming adventure together.

**Backpacker** Penguin Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better. *Nala's World* Velopress Introductory Statistics is designed for the one-semester, introduction to statistics course and is geared toward students majoring in fields other than math or engineering. This text assumes students have been exposed to intermediate algebra, and it focuses on the applications of statistical knowledge rather than the theory behind it. The foundation of this textbook is

Collaborative Statistics, by Barbara Illowsky and Susan Dean. Additional topics, examples, and ample opportunities for practice have been added to each chapter. The development choices for this textbook were made with the guidance of many faculty members who are deeply involved in teaching this course. These choices led to innovations in art, terminology, and practical applications, all with a goal of increasing relevance and accessibility for students. We strove to make the discipline meaningful, so that students can draw from it a working knowledge that will enrich their future studies and help them make sense of the world around them. Coverage and Scope Chapter 1 Sampling and Data Chapter 2 Descriptive Statistics Chapter 3 Probability Topics Chapter 4 Discrete Random Variables Chapter 5 Continuous Random Variables Chapter 6 The Normal Distribution Chapter 7 The Central Limit Theorem Chapter 8 Confidence Intervals Chapter 9 Hypothesis Testing with One Sample Chapter 10 Hypothesis Testing with Two Samples Chapter 11

Wiley & Sons

The world's bestselling  
master of the medical  
thriller, Robin Cook  
skillfully combines human  
drama and high-tech  
thrills with the latest  
breakthroughs and  
controversies of modern  
medicine. Now, in his  
most daring novel yet, a  
mysterious transmission  
from the bottom of the  
Atlantic Ocean leads a  
crew of oceanographers  
and divers to a  
phenomenon beyond  
scientific understanding -  
a discovery that will  
change everything we  
know about life on Earth...

*How to Change Your Mind*  
HarperCollins

Having failed English,  
eighteen-year-old Steve  
York must generate a  
paper to get credit and  
chooses to write about his  
years in high school,  
during which he  
experienced his first love  
and struggled with family  
relationships.

*A Toolbox For Revolution*  
(Pocket Edition) Simon  
and Schuster

Bicycling advocates  
envision a future in which  
bikes are a widespread

daily form of  
transportation, but this  
reality is still far away.  
Will we ever witness a  
true "bike boom" in cities?  
What can we learn from  
past successes and  
failures to make cycling  
safer, easier, and more  
accessible? In *Bike Boom*,  
journalist Carlton Reid  
uses history to shine a  
spotlight on the present  
and demonstrates how  
bicycling has the potential  
to grow even further, if  
the right measures are  
put in place by the  
politicians and planners of  
today and tomorrow. He  
explores the benefits and  
challenges of cycling, the  
roles of infrastructure and  
advocacy, and what we  
can learn from cities that  
have successfully  
supported and  
encouraged bike booms.  
In this entertaining and  
thought-provoking book,  
Reid sets out to discover  
what we can learn from  
the history of bike  
"booms."

An all-new Star Trek  
technical manual of the  
legendary Klingon Bird of  
Prey, presented in the  
world-renowned Haynes  
Manual format! The Bird-  
of-Prey is the classic  
Klingon starship—a tough  
raiding and scouting  
vessel that has served at  
the heart of the Klingon  
Defense Force for more  
than a hundred years. Life  
on board is harsh and  
brutal, with any sign of  
weakness leading to a  
challenge to the death.  
The ship itself is stripped  
back and lean, with  
everything designed for a  
single purpose—war. This  
Haynes Manual traces the  
origins of a Bird-of-Prey  
from the moment it is  
commissioned by one of  
the Great Houses and  
constructed at the  
shipyards of the Klingon  
Naval Academy. It then  
proceeds to examine  
General Martok's famous  
ship the I.K.S. Rotarran in  
unprecedented detail.  
Featuring a stunning  
cutaway drawing and, for  
the first time ever,  
detailed deck plans and  
incredible new computer-  
generated artwork, the  
Haynes Bird-of-Prey  
Manual is a technical tour  
of the ship's systems,

from the bridge and engineering rooms to the disruptors, torpedo launcher, and the all-important cloaking device. In addition, the Manual provides a unique insight into life on board a Klingon ship and the Rotarran's glorious history in the Dominion War. This Haynes Manual is fully authorized by CBS. All the new artwork has been designed by STAR TREK: THE NEXT GENERATION and STAR TREK: VOYAGER's senior illustrator Rick Sternbach, who is the world's leading expert on STAR TREK technology, with CG renders produced by STAR TREK VFX artist Adam 'Mojo' Lebowitz.

B Is for Bicycles Simon and Schuster

Anthropology is the study of all humans in all times in all places. But it is so much more than that. "Anthropology requires strength, valor, and courage," Nancy Scheper-Hughes noted. "Pierre Bourdieu called anthropology a combat sport, an extreme sport as well as a tough and rigorous discipline. ... It teaches students not to be afraid of getting one's hands dirty, to get down in the dirt, and to commit yourself, body and mind. Susan Sontag called

anthropology a "heroic" profession." What is the payoff for this heroic journey? You will find ideas that can carry you across rivers of doubt and over mountains of fear to find the the light and life of places forgotten. Real anthropology cannot be contained in a book. You have to go out and feel the world's jagged edges, wipe its dust from your brow, and at times, leave your blood in its soil. In this unique book, Dr. Michael Wesch shares many of his own adventures of being an anthropologist and what the science of human beings can tell us about the art of being human. This special first draft edition is a loose framework for more and more complete future chapters and writings. It serves as a companion to anth101.com, a free and open resource for instructors of cultural anthropology. This 2018 text is a revision of the "first draft edition" from 2017 and includes 7 new chapters.

**Star Trek: U.S.S. Enterprise Haynes Manual** Simon and Schuster

"Zinn & the Art of Mountain Bike Maintenance" is the world's best-selling book

on mountain bike maintenance and repair. This smartly organized and clearly illustrated guide--now in two colors for easier reference--can make a bike mechanic out of anyone. Lennard Zinn's expert advice makes quick work of mountain bike repair. Newcomers and experienced mechanics alike will benefit from the hundreds of illustrations, the exploded views of how components go together, and Zinn's practical, time-saving tips. Zinn's friendly advice and years of experience make tackling even the most daunting task fun and easy. All the latest high-tech equipment is covered in this new edition, but Zinn does not neglect older bikes. Indeed, no matter what mountain bike you may have in your garage, chances are you'll find it--and the way to fix it--in these pages. "

*One Man, His Rescue Cat, and a Bike Ride around the Globe* Miramax Books  
 "Pollan keeps you turning the pages . . . clear-eyed and assured." —New York Times A #1 New York Times Bestseller, New York Times Book Review 10 Best Books of 2018, and New York Times Notable Book A brilliant and brave investigation into the medical and scientific revolution taking place around psychedelic drugs--and the spellbinding story of his own life-changing psychedelic experiences  
 When Michael Pollan set out to research how LSD and psilocybin (the active ingredient in magic mushrooms) are being used to provide relief to people suffering from difficult-to-treat conditions such as depression, addiction and anxiety, he did not intend to write what is undoubtedly his most personal book. But upon discovering how these remarkable substances are improving the lives not only of the mentally ill but also of healthy people coming to grips with the challenges of everyday life, he decided to explore the

landscape of the mind in the first person as well as the third. Thus began a singular adventure into various altered states of consciousness, along with a dive deep into both the latest brain science and the thriving underground community of psychedelic therapists. Pollan sifts the historical record to separate the truth about these mysterious drugs from the myths that have surrounded them since the 1960s, when a handful of psychedelic evangelists inadvertently catalyzed a powerful backlash against what was then a promising field of research. A unique and elegant blend of science, memoir, travel writing, history, and medicine, *How to Change Your Mind* is a triumph of participatory journalism. By turns dazzling and edifying, it is the gripping account of a journey to an exciting and unexpected new frontier in our understanding of the mind, the self, and our place in the world. The true subject of Pollan's "mental travelogue" is not just psychedelic drugs but also the eternal puzzle of human consciousness and how, in a world that offers us both suffering and joy, we can do our best to be fully present and find

meaning in our lives.
