 ...Migrating from Hibernate 3 to 4 with Spring integration ...Spring 4 Hibernate 4 integration changes. Now let's change our application to

use Hibernate 4 instead of Hibernate 3. For this migration, we need to make only following configuration changes. Change the hibernate version to 4.3.5.Final in the pom.xml file, as shown in comments above. Spring Hibernate Integration Example Tutorial - JournalDevJava Spring Configuration for Hibernate 3. Setting up Hibernate 3 with Spring and Java config is straightforward: import

java.util.Properties; import javax.sql.DataSource; import org.apache.tomcat.dbcp.dbcp.BasicDataSource; Hibernate 3 with Spring | BaeldungExample of Hibernate and spring integration. In this example, we are going to integrate the hibernate application with spring. Let's see the directory structure of spring and hibernate example. 1) create the table in the database. In this example, we are using

the Oracle as the database, but you may use any database. Hibernate and Spring Integration Example Tutorial - javatpointHibernate 4 tutorial with complete code examples, including basic usage, xml and annotation based configuration, all association mappings, transaction management, criteria, Query, HQL, Spring Integration etc. Hibernate 4 Tutorial -

WebSystiquel will show how to integrate Spring 3, JSF 2 and Hibernate 3 in the following example. You may also read JSF 2, Spring 4, Hibernate 4 and MavenSpring 3, JSF 2 and Hibernate 3 integration example - Roy ...Note that you may have to upgrade specific third-party dependencies to a recent enough version (e.g. Hibernate 3.6+, Quartz 1.8+, Jackson 1.8+, Tiles 2.2+), but other than

that, you should be able to get all the benefits of the Spring 4 line with hopefully very little effort. Migrating from Spring Framework 3.2 to 4.0.1For using Hibernate 5 with Spring, little has changed since Hibernate 4: we have to use LocalSessionFactoryBean from the package org.springframework.orm.hibernate5 instead of org.springframework.orm.hibernate4.. Like with Hibernate 4 before, we

have to define beans for LocalSessionFactoryBean, DataSource, and PlatformTransactionManager, as well as some Hibernate-specific properties. Bootstrapping Hibernate 5 with Spring | BaeldungThis is all we needed to configure to include Hibernate and H2 for our example. We can check the configuration was successful on the logs when we start up the Spring Boot application:
