2021 Choice Outstanding Academic Title With mass migration changing the configuration of societies worldwide, we can look to the Caribbean to reflect on the long-standing, entangled relations between countries and areas as uneven in size and influence as the United States, Cuba, Hispaniola, Puerto Rico, and Jamaica. More so than other world regions, the Caribbean has been characterized as an always already colonial region. It has long been a key area for empires warring over influence spheres in the new world, and where migration waves from Africa, Europe, and Asia accompanied every political transformation over the last five centuries. In Caribbean Migrations, an interdisciplinary group of humanities and social science scholars study migration from a long-term perspective, analyzing the Caribbean's "unincorporated subjects" from a legal, historical, and cultural standpoint, and exploring how despite often fractured public spheres, Caribbean intellectuals, artists, filmmakers, and writers have been resourceful at showcasing migration as the hallmark of our modern age.

Advances in Research in Karst Media SUNY Press

This large-format, high-quality volume offers 120 pages of words and pictures that capture the best of Garden Walk Buffalo, the largest and one of the oldest garden walks in the nation. More than 225 beautiful photographs capture highlights of all 260+ gardens on the Walk, while sidebars on the architecture and history of these exceptional Buffalo neighborhoods explain their unique ambiance. New and fascinating aspects of Garden Walk are illuminated, including behind-the-scenes stories of how the gardeners prepare for the annual weekend deluge of thousands of visitors. The book includes interviews with 27 gardeners, as well as photos of more than 80 additional gardens. There is a photo section for the gardens of Frederick Law Olmsted's Delaware Park, a spread on community gardens, a list of selected plants grown in Western New York (Zone 5), a history of Garden Walk Buffalo and its impact on local urban gardens and how it helps rejuvenate city streets, and even a brief bit on how to start your own garden walk.

Sustainable Industrial Design and Waste Management was inspired by the need to have a text that enveloped awareness and solutions to the ongoing issues and concerns of waste generated from industry. The development of science and technology has increased human capacity to extract resources from nature and it is only recently that industries are being held accountable for the detrimental effects the waste they produce has on the environment. Increased governmental research, regulation and corporate accountability are digging up issues pertaining to pollution control and waste treatment and environmental protection. The traditional approach for clinical waste, agricultural waste, industrial waste, and municipal waste are depleting our natural resources. The main objective of this book is to conserve the natural resources by approaching 100 % full utilization of all types of wastes by cradle - to - cradle concepts, using Industrial Ecology methodology documented with case studies. Sustainable development and environmental protection cannot be achieved without establishing the concept of industrial ecology. The main tools necessary for establishing Industrial Ecology and sustainable development will be covered in the book. The concept of "industrial ecology will help the industrial system to be managed and operated more or less like a natural ecosystem hence causing as less damage as possible to the surrounding environment. Numerous case studies allow the reader to adapt concepts according to personal interest/field Reveals innovative technologies for the conservation of natural resources The only book which provides an integrated approach for sustainable development including tools, methodology, and indicators for sustainable development

Although pain is widely recognized by clinicians and researchers as an experience, pain is always felt in a patient-specific way rather than experienced for what it objectively is, making perceived meaning important in the study of pain. The book contributors explain why meaning is important in the way that pain is felt and promote the integration of quantitative and qualitative methods to study meanings of pain. For the first time in a book, the study of the meanings of pain is given the attention it deserves. All pain research and medicine inevitably have to negotiate how pain is perceived, how meanings of pain can be described within the fabric of a person's life and neurophysiology, what factors mediate them, how they interact and change over time, and how the relationship between patient, researcher, and clinician might be understood in terms of meaning. Though meanings of pain are not intensively studied in contemporary pain research or thoroughly described as part of clinical assessment, no pain researcher or clinician can avoid asking questions about how pain is perceived or the types of data and scientific methods relevant in discovering the answers.

This book provides a comprehensive examination of death, dying, and human remains in museums and heritage sites around the world. Presenting a diverse range of contributions from scholars, practitioners, and artists, the book reminds us that death and the dead body are omnipresent in museum and heritage spaces. Chapters appraise collection practices and their historical context, present global perspectives and potential resolutions, and suggest how death and dying should be presented to the public. Acknowledging that professionals in the galleries, libraries, archives, and museums (GLAM) fields are engaging in vital discussions about repatriation and anti-colonialist narratives, the book includes reflections on a variety of deathscapes that are at the forefront of the debate. Taking a multivocal approach, the handbook provides a foundation for debate as well as a reference for how the dead are treated within the public arena. Most important, perhaps, the book highlights best practices and calls for more ethical frameworks and strategies for collaboration, particularly with descendant communities. The Routledge Handbook of Museums, Heritage, and Death will be useful to all individuals working with, studying, and interested in curation and exhibition at museums and heritage sites around the world. It will be of particular interest to those working in the fields of heritage, museum studies, death studies, archaeology, anthropology, sociology, and history.

Process engineering emerged at the beginning of the 20th Century and has become an essential scientific discipline for the matter and energy processing industries. Its success is incontrovertible, with the exponential increase in techniques and innovations. Rapid advances in new technologies such as artificial intelligence, as well as current societal needs sustainable development, climate change, renewable energy, the environment are developments that must be taken into account in industrial renewal. Process Engineering Renewal 1 the first volume of three focuses on training, demonstrating the need for innovation in order for the field to have a framework that is sustainable, in a highly changeable world.

Once considered disruptive to learning, technology has increasingly become an integrated and valued part of the modern classroom. In particular, mobile technologies provide the ability to encourage evocative student learning through new experiences. Promoting Active Learning through the Integration of Mobile and Ubiquitous Technologies showcases the widely varied ways that technology can be applied to enhance classroom learning. Closely examining and critiquing the best methods in assimilating technologies, this publication is a valuable resource for faculty, teachers, administrators, technology staff, directors of learning centers, and other education technology leaders interested in incorporating new technologies within the classroom for engaging student learning.

Les bibliothèques numériques de la société de l'information et de la connaissance résultent du déploiement continu de technologies de l'information et de la communication (TIC) aujourd'hui devenues matures. Le robuste appareillage technologique disponible permet d'envisager l'instrumentation d'une diversité de pratiques info-documentaires et communicationnelles des acteurs de la société, la scalabilité des connaissances. Cet ouvrage questionne l'environnement info-documentaire et communicationnel articulé aux technologies web. Il propose d'analyser comment les bibliothèques numériques répondent aux besoins informationnels, de montrer comment elles participent de la construction de biens communs informationnels et étendent les questions d'interopérabilité aux espaces sémantique, culturel et épistémique. Il souligne que ces bibliothèques numériques d'une société de l'information et de la connaissance agencent des systèmes ouverts d'organisations des connaissances qui tendent à les rendre cognitivement accessibles et utilisables par une diversité de communautés. Soulignant les modalités de mise en oeuvre de la scalabilité des connaissances, l'ouvrage ouvre sur les perspectives qui en résultent.

Au primaire comme à l'université, l'enseignement n'est sans doute plus aussi linéaire qu'il l'a été traditionnellement. Les stratégies d'enseignement et d'apprentissage varient, notamment avec

l'arrivée de la formation à distance (FAD), et plus particulièrement avec la formation hybride au sens large. Le présent ouvrage rassemble des textes de professeurs, de chargés de cours, de conseillers pédagogiques et d'autres professionnels de l'éducation qui illustrent différentes expérimentations et leurs retombées auprès des étudiants collégiaux et universitaires.

Volume 60 of Reviews in Mineralogy and Geochemistry assesses the current state of knowledge of lunar geoscience, given the data sets provided by missions of the 1990's, and lists remaining key questions as well as new ones for future exploration to address. It documents how a planet or moon other than the world on which we live can be studied and understood in light of integrated suites of specific kinds of information. The Moon is the only body other than Earth for which we have material samples of known geologic context for study. This volume seeks to show how the different kinds of information gained about the Moon relate to each other and also to learn from this experience, thus allowing more efficient planning for the exploration of other worlds.

Owing to their unique state of preservation, mummies provide us with significant historical and

scientific knowledge of humankind's past. This handbook, written by prominent international experts in mummy studies, offers readers a comprehensive guide to new understandings of the field's most recent trends and developments. It provides invaluable information on the health states and pathologies of historic populations and civilizations, as well as their socio-cultural and religious characteristics. Addressing the developments in mummy studies that have taken place over the past two decades - which have been neglected for as long a time - the authors excavate the groundbreaking research that has transformed scientific and cultural knowledge of our ancient predecessors. The handbook investigates the many new biotechnological tools that are routinely applied in mummy studies, ranging from morphological inspection and endoscopy to minimally invasive radiological techniques that are used to assess states of preservation. It also looks at the paleoparasitological and pathological approaches that have been employed to reconstruct the lifestyles and pathologic conditions of ancient populations, and considers the techniques that have been applied to enhance biomedical knowledge, such as craniofacial reconstruction, chemical analysis, stable isotope analysis and ancient DNA analysis. This interdisciplinary handbook will appeal to academics in historical, anthropological, archaeological and biological sciences, and will serve as an indispensable companion to researchers and students interested in worldwide mummy studies.
