Noseholes and elephants! A pet-eating monster interrupts a perfect playdate with Princess Sneezewort. . . . But who is that new masked avenger? Princess Magnolia and Princess Sneezewort have plans . . . mysterious plans, like a princess playdate! They dress-up slam! They karaoke jam! But then a shout from outside Princess Sneezewort's castle interrupts their fun. It's a monster! This

is a job for the Princess in Black. Yet when the Princess in Black gets there, she finds only a masked stranger and no monster in sight. But all is not as it seems! Action and humor abound in this ode to friendship that proves that when shape-shifting monsters intrude on your plans, two heroes are better than one.

A celebrity wedding in a small Irish village goes from festive to funerary when the best man is murdered in this cozy mystery novel. Any wedding is a big deal in the County Cork village of Kilbane, but with a local lad marrying a famous fashion model at Kilbane Castle, there's no talk of anything but the upcoming nuptials. Siobhán O'Sullivan and her five siblings have their plates full catering the three-day affair from their bistro. But the celebratory mood suddenly turns sober when the best man is found murdered in the woods. For Siobhán, the tragic turn is more than grist for the gossip mill. Her beau,

Macdara Flannery, is the prime suspect—and she intends to clear his name. Now, like the bride walking down the aisle, Siobhán needs to watch her step. For as she gets closer to unveiling the truth, the murderer is planning a very chilly reception for her.

"As frustration mounts in some quarters at the perceived inadequacy or speed of international action on climate change, and as the likelihood of significant impacts grows, the focus is increasingly turning to liability for climate change damage. Actual or potential climate change liability implicates a growing range of actors, including governments, industry, businesses, non-governmental organisations, individuals and legal practitioners. Climate Change Liability provides an objective, rigorous and accessible overview of the existing law and the direction it might take in seventeen developed and developing countries and the European Union. In some jurisdictions, the applicable law is less developed and less the subject of current debate. In others, actions for

various kinds of climate change liability have already been brought, including high profile cases such as Massachusetts v. EPA in the United States. Each chapter explores the potential for and barriers to climate change liability in private and public law"--

Morality is one of the fundamental structures of any society, enabling complex groups to form, negotiate their internal differences and persist through time. In the first book-length study of Roman popular morality, Dr Morgan argues that we can recover much of the moral thinking of people across the Empire. Her study draws on proverbs, fables, exemplary stories and gnomic quotations, to explore how morality worked as a system for Roman society as a whole and in individual lives. She examines the range of ideas and practices and their relative importance, as well as questions of authority and the relationship with high philosophy and the ethical vocabulary of documents and inscriptions. The Roman Empire incorporated numerous overlapping

groups, whose ideas varied according to social status, geography, gender and many other factors. Nevertheless it could and did hold together as an ethical community, which was a significant factor in its socio-political success.

Using Lady Morgan's *The Wild Irish Girl* as his point of departure, Thomas J. Tracy argues that nineteenth-century debates over what constitutes British national identity often revolved around representations of Irishness, especially

Irish womanhood. He maps the genealogy of this development in fiction, political discourse, and the popular press, from Edgeworth's *Castle Rackrent* through Trollope's Irish novels, focusing on the pivotal period from 1806 through the 1870s.

In this funny, uncannily wise portrait of the dynamics of a sixth-grade class and of the greatness that sometimes comes in unlikely packages, Dwight, a loser, talks to his classmates via an origami

finger puppet of Yoda. If that weren't strange enough, the puppet is uncannily wise and prescient. Origami Yoda predicts the date of a pop quiz, guesses who stole the classroom Shakespeare bust, and saves a classmate from popularity-crushing embarrassment with some well-timed advice. Dwight's classmate Tommy wonders how Yoda can be so smart when Dwight himself is so clueless. With contributions from his puzzled classmates, Tommy assembles this first case file in the blockbuster bestselling Origami Yoda series, written by Tom Angleberger, author of *Star Wars: Return of the Jedi: Beware the Power of the Dark Side*, and hailed by *School Library Journal* as "honest, funny, and immensely entertaining." Succinct and concise, this textbook covers all the procedural and substantive aspects of EU competition law. It explores primary and secondary law through the prism of ECJ case law. Abuse of a dominant position and merger control are discussed and a separate chapter on cartels ensures the student receives the broadest possible perspective on the subject. In addition, the book's consistent structure aids understanding: section summaries underline key principles, questions reinforce learning and essay discussion topics encourage further exploration. By setting out the economic principles which underpin the subject, the author allows the student to engage with the

complexity of competition law with confidence. Integrated examples and an uncluttered writing style make this required reading for all students of the subject.

Textile Processing Review Cambridge University Press

Who are we, and how do we relate to each other? Luciano Floridi, one of the

leading figures in contemporary philosophy, argues that the explosive developments in Information and Communication Technologies (ICTs) is changing the answer to these fundamental human questions. As the boundaries between life online and offline break down, and we become seamlessly connected to each other and surrounded by smart, responsive objects, we are all becoming integrated into an "infosphere". Personas we adopt in social media, for example, feed into our 'real' lives so that we begin to live, as Floridi puts in, "onlife". Following those led by Copernicus, Darwin, and Freud, this metaphysical shift represents nothing less than a fourth revolution. "Onlife" defines more and more of our

daily activity - the way we shop, work, learn, care for our health, entertain ourselves, conduct our relationships; the way we interact with the worlds of law, finance, and politics; even the way we conduct war. In every department of life, ICTs have become environmental forces which are creating and transforming our realities. How can we ensure that we shall reap their benefits? What are the implicit risks? Are our technologies going to enable and empower us, or constrain us? Floridi argues that we must expand our ecological and ethical approach to cover both natural and man-made realities, putting the 'e' in an environmentalism that can deal successfully with the new challenges posed by our digital technologies and information society.
