Law Revision and Study Guide Council of Europe

Quality is a vital issue to be addressed by all construction professionals working in Europe today. This book provides clear, concise guidance to the making and use of codes, regulations and technical specifications in Europe.

Translation Policies in Legal and Institutional Settings Oxford University Press

This volume is a study into the norms that come into play in the translation of European Union legislation. With a focus on expressions of modality, the study adopts a corpus-based Descriptive Translation Studies approach to analyse the translation strategies used in a bilingual English/Italian parallel corpus of European Union legislation and identify the most frequent translational patterns. The book outlines the principles at the basis of the multilingual policy at the European Union and provides a detailed outline of the context in which the drafting and translation processes take place as a key to understanding the translational choices. The impact of sometimes contrasting factors such as the conventions of legal drafting at the European Union and those within the target culture, the principle of equal authenticity and the attention to the quality and readability of legislative texts is revealed in the analysis. Evidence in support of the theories concerning translation universals is also found and their implications for EU legal translation are discussed. The results lead to the formulation of several hypotheses as regards the norms

governing the translation of EU legislative texts. The book also reflects on the impact that the translational choices have on the development of European Union legal language as an independent variety. This volume will be of interest to researchers and students in the fields of Legal Translation Studies and Linguistics, as well as practising translators.

Protecting Prometheus MIT Press

Organ transplantation saves thousands of lives each day but raises some questions of principle. This guide, which is published on a biennial basis, provides guidance for all those involved in transplantation and other clinical applications of organs, tissues and cells, with the aim of optimising quality and reducing risks. The topics covered are: quality management, principles for ensuring the quality of organs, tissues and cells; selection of donors; organ procurement and preservation; tissue and cell procurement; tissue establishment; transplantation practices.

Concentrate Questions and Answers

Criminal Law Oxford University Press

Nearly two decades after the EU first

enacted data protection rules, key questions about the nature and scope of this EU policy, and the harms it seeks to prevent, remain unanswered. The inclusion of a Right to Data Protection in the EU Charter has increased the salience of these questions, which must be addressed in order to ensure the legitimacy, effectiveness and development of this Charter right and the EU data protection regime more generally. The Foundations of EU Data Protection Law is a timely and important work which sheds new light on this neglected area of law, challenging the widespread assumption that data protection is merely a subset of the right to privacy. By positioning EU data protection law within a comprehensive conceptual framework, it argues that data protection has evolved from a regulatory instrument into a fundamental right in the EU legal order and that this right grants individuals more control over more forms of data than the right to privacy. It suggests that this dimension of the right to data protection should be explicitly recognised, while identifying the practical and conceptual limits of individual control over personal data. At a time when EU data protection law is sitting firmly in the international spotlight, this book offers academics, policy-makers, and practitioners a coherent vision for the future of this key policy and fundamental right in the EU legal order, and how best to realise it.

Macedonia Country Study Guide Volume 1 Strategic Information and Developments Oxford University Press

This is the second edition of this publication which contains guidance on the transplantation of organs, tissues and cells of human origin for therapeutic purposes. It sets out safety and quality

assurance standards for the procurement, preservation, processing and distribution of human organs, tissues and cells, in order to promote ethical concerns which recognise the safety and dignity of the donor and the recipient. The guide also contains the additional protocol to the Convention on Human Rights and Biomedicine on the transplantation of organs and human tissues.

Institutional Translation for International Governance Routledge

Nigel Foster provides a concise and clear explanation of EU law, covering both institutional aspects and key substantive areas, offering an accessible entry point to the subject.

Law Revision and Study Guide Oxford University Press

'EU Law' covers both the institutions of the EU and the substantive law they produce. The new constitution is introduced, its aims and the reasons for its negotiation. Pedagogical features have been incorporated into this edition making the text easier to navigate.

Law Revision and Study Guide National Academies Press

This exciting book examines how human tissues and cells are being exchanged, commodified and commercialized by new health technologies. Through a discussion of emergent global 'tissue economies' the author explores the

social dynamics of innovation in the fields of tissue engineering and stem cell science. The book explores how regenerative medicine configures and conceptualizes bodies and argues that the development of regenerative medicine is a feminist issue. In *Regenerating Bodies*, Kent critically examines the transformative potential of regenerative medicine and whether it represents a paradigm shift from more traditional forms of biomedicine. The book shows that users of these technologies are gendered and women's bodies are enrolled in the production of them in particular ways. So what is the value of a feminist bioethics for thinking about the ethical issues at stake?

Drawing on extensive qualitative field research, Kent examines the issues around donation, procurement, banking and engineering of human tissues, and presents an analysis of the regulatory and policy debates surrounding these practices within Europe and the UK. The book considers the claims that regenerative medicine represents exciting possibilities for treating the diseases of ageing bodies, critically assessing what kind of futures are embodied in tissue and cell based therapies. It will be of interest to a wide range of scholars and students within the social sciences, in health technology studies, bioethics, feminist studies, and gender and health studies.

Law Revision and Study Guide Oxford University Press

This edited volume documents the state of the art in research on translation policies in legal and institutional settings. Offering case studies of past and present translation policies from several parts of the world, it allows for a

compelling comparison of attitudes towards translation in varying contexts. The book highlights the virtues of integrating different types of expertise in the study of translation policy: theoretical and applied; historical and modern; legal, institutional and political. It effectively illustrates how a multidisciplinary perspective furthers our understanding of translation policies and unveils their intrinsic link with topics such as multilingualism, linguistic justice, minority rights, and citizenship. In this way, each contribution sheds new light on the role of translation in the everyday interaction between governments and multilingual populations.

Law Revision and Study Guide Kluwer Law International B.V.

From the creators of the UK's bestselling Law Express revision series. Maximise your marks for every answer you write with Law Express Question and Answer. This series is designed to help you understand what examiners are looking for, focus on the question being asked and make even a strong answer stand out.

Steiner & Woods EU Law Pearson UK This volume provides a state-of-the-art overview of institutional translation issues related to the development of international law and policies for supranational integration and governance. These issues are explored from various angles in selected papers by guest specialists and findings of a large-scale research project led by the editor. Focus is placed on key methodological and policy aspects of legal communication and translation quality in a variety of institutional settings, including several comparative studies of the United Nations and European Union institutions. The first

book of its kind on institutional translation with a focus on quality of legal communication, this work offers a unique combination of perspectives drawn together through a multilayered examination of methods (e.g. corpus analysis, comparative law for translation and terminological analysis), skills and working procedures. The chapters are organized into three sections: (1) contemporary issues and methods; (2) translation quality in law- and policy-making and implementation; and (3) translation and multilingual case-law.

Law Q&A Revision and Study Guide

This book introduces and explores the concept of multilingual law. Providing an overview as to what is 'multilingual law', the study establishes a new discourse based on this concept, which has hitherto lacked recognition for reasons of complexity and multidisciplinary. The need for such a discourse now exists and is becoming urgent in view of the progress being made towards European integration and the legal and factual foundation for it in multilingualism and multilingual legislation. Covering different types of multilingual legal orders and their distinguishing features, as well as the basic structure of legal systems, the author studies policy formation, drafting, translation, revision, terminology and computer tools in connection with the legislative and judicial processes. Bringing together a range of diverse legal and linguistic ideas under one roof, this book is of importance to legal-linguists, drafters and translators, as well as students and

scholars of legal linguistics, legal translation and revision.
