The History Press
New England is so
compact that even
casual visitors can
sample its diverse
history in just a short
time. But travelers and
residents alike can also
pass right by historic
buildings, landscapes,
and iconic objects
without noticing them.
New England's Hidden
Past presents the
region's history in an

engaging new way: through 58 lists of historic places and things usually hidden in plain sight in all six New England states. Pay attention and you'll find stone structures built by Indians, soaring churches financed by Franco-American millworkers, and public high schools started by colonists when New England was still a howling wilderness. You may have seen them, but you probably don't know the story behind them. *New England's Hidden Past* takes readers to the grave sites of revolutionary heroines, Loyalist house museums, as well as, Revolutionary taverns and colonial inns. It takes them to Indian trails, the oldest houses, historic

department stores, ghost towns, and Little Italys. Each unique, interesting location or object has a counterpart in the other five New England states. A perfect guide to keep in the car and refer to when traveling New England or planning a trip. [Parliamentary Debates](#) Boydell & Brewer Links changes in the sites at which medical services are offered to changes in medical practice, in medical economics, and in patterns of American commerce and urbanism. Parliamentary Debates

Throughout the
 Victorian period, life-
 threatening diseases
 were no respecter of
 class, affecting rich
 and poor alike.
 However, the medical
 treatment for such
 diseases differed
 significantly,
 depending on the class
 of patient. The wealthy
 received private
 medical treatment at
 home or, later, in a
 practitioner's
 consulting room. The
 middle classes might
 also pay for their
 treatment but, in
 addition, they could
 attend one of an
 increasing number of
 specialist hospitals.
 The working classes
 could get free
 treatment from
 charitable voluntary
 hospitals or
 dispensaries. For the
 abject poor who were
 receiving poor relief,

their only option was to seek treatment at the workhouse infirmary. The experience of a patient going into hospital at this time was vastly different from that at the end. This was not just in terms of being attended by trained nurses or in the medical and surgical advances which had taken place. Different methods for treating diseases and the use of antiseptic and aseptic techniques to combat killer hospital infections led to a much higher standard

of care than was previously available.
