What's in the Syringe? Oxford University Press, USA

“A gripping, illuminating book . . . Dr. Stein is drawn, in an almost Sherlock Holmesian way, toward trying to fathom and analyze addicts’ behavior. . . . hauntingly and successfully, Stein lets readers make a doctor’s experiences their own.” — New York Times “Beautifully told... [with] great insight, empathy and compassion.” — Abraham Verghese, author of *The Tennis Partner*, *My Own Country*, and *Cutting for Stone* The Addict is the powerful and revealing narrative of Dr. Michael Stein’s year-long treatment of a young woman addicted to Vicodin. Dr. Stein has followed up his award winning book *The Lonely Patient* with “a useful, sensible, and often inspiring guide to how the medical profession does—and should—treat the sick, and the sick at heart.” (Francine Prose, *O* magazine)

Oxford Handbook of Palliative Care Oxford University Press

This is a practical, easily accessible A-Z of the common drugs encountered in palliative care.

The Addict Oxford University Press

The definitive Oxford Textbook of Palliative Medicine, now in its fifth edition, has again been thoroughly updated to offer a truly global perspective in this field of extraordinary talent and thoughtfulness. Updated to include new sections devoted to assessment tools, care of patients with cancer, and

the management of issues in the very young and the very old, this leading textbook covers all the new and emerging topics since its original publication in 1993. In addition, the multi-disciplinary nature of palliative care is emphasized throughout the book, covering areas from ethical and communication issues, the treatment of symptoms and the management of pain. The printed book is complemented with 12 months free access to the online version, which includes expanded chapter information and links from the references to primary research journal articles, ensuring this edition continues to be at the forefront of palliative medicine. This fifth edition of the Oxford Textbook of Palliative Medicine is dedicated to the memory of Professor Geoffrey Hanks, pioneer in the field of palliative medicine, and co-editor of the previous four editions. A truly comprehensive text, no hospital, hospice, palliative care service, or medical library should be without this essential source of information.

Advanced Practice Palliative Nursing Springer Publishing Company

Hospice and Palliative Medicine and Supportive Care Flashcards is a comprehensive, evidence-based book of flashcards for clinicians caring for patients who require hospice and palliative care and supportive care. Written in a clinical scenario/vignette, question and answer format by experts with first-hand experience in the field, the flashcards are highly readable and serve as a source of fast answers to clinical questions in the field. A total of 300 flashcards are organized into chapters by symptom/disease and provide readers with up-to-date information that follow the core curriculum of American Board of Hospice and Palliative Medicine for ease of use and rapid review for exams. This book will equip care professionals with key concepts related to the assessment and management of palliative care, making it an ideal point-of-care quick reference material for physicians, nurse practitioners, fellows, residents, and students.

Oxford Textbook of Geriatric Medicine Oxford University Press

This essential handbook provides a practical, accessible guide to emergency situations encountered in palliative care practice. Using a system of icons, and structured around frequently encountered symptoms, it is split into two sections. The first section explores how patients with life-limiting illnesses such as cancer, AIDS, and end-stage organ failure normally present, and looks at the reversibility of their condition. The second section provides a detailed approach to specific clinical conditions, and is for use once the clinical diagnosis has been reached on the basis of the presenting symptoms. The book will provide trainees in palliative medicine, nurses, family doctors, and other allied health professionals with a pocket guide to the emergency care of people requiring palliative and supportive care, and will complement the Oxford Handbook of Palliative Care.

Geriatric Palliative Care Oxford University Press

Written by an established, comprehensive, multidisciplinary focused, internationally-recognized team, the sixth edition has been fully revised and brought up to date with the inclusion of recent developments in the speciality, to ensure that it retains its reputation as the definitive reference on palliative care.

The Philosophy of Palliative Care Oxford University Press

The growing geriatric population in the United States has created an increasing need for palliative medicine services across the range of medical and surgical specialties. Yet, palliative medicine lacks the resources to carry such a workload itself. Geriatric Palliative Care addresses this need by encouraging individual specialties to "own" the management of elderly with the same vigor as they "own" other key management competencies within their specialty. This clinically focused and highly practical handbook, which compliments the more comprehensive text Geriatric Palliative Care by Sean Morrison and Diane Meier (Oxford University Press, 2003), encourages this process of learning and ownership across many medical specialties. Designed to be readable and easily accessible to a range of health care providers, Geriatric Palliative Care outlines specific strategies for caring for specific palliative care issues common in elderly patients. The handbook also provides evidence based advice for helping patients, relatives, and staff cope with such issues as polypharmacy, dementia and consent, multiple pathologies, home care, elderly caregivers, and supporting the elderly in the place where they would like to be.

Oxford Textbook of Medicine Oxford University Press, USA

This practical guide briefly covers the historical and epidemiological background of palliative care and the growth of palliative medicine as a specialty, before dealing with major physical, psychological, spiritual, and symptom management issues from diagnosis to bereavement care.

Hospice and Palliative Medicine and Supportive Care Flashcards Harper Collins

'The Textbook of Palliative Care Communication' is the authoritative text on communication in palliative care. Uniquely developed by an interdisciplinary editorial team to address an array of providers including physicians, nurses, social workers, and chaplains, it unites clinicians and academic researchers interested in the study of communication.

Oxford Textbook of Palliative Care for Children Oxford University Press

Unlike other textbooks on this subject, which are more focused on end of life, the 4th edition of Principles and Practice of Palliative Care and Supportive Oncology focuses on supportive oncology. In fact, the goal of this textbook is to provide a source of both help and inspiration to all those who care for patients with cancer. Written in a more reader-friendly format, this textbook not only offers authoritative and up-to-date reviews of research and clinical care best practices, but also practical clinical applications to help readers put everything they learn to use.

Oxford Textbook of Palliative Medicine Oxford University Press

Symptom control, management of psychosocial and spiritual concerns, decision-making consistent with values and goals, and care of the imminently dying that is appropriate and sensitive are among the critical issues in palliative care. This book explores progress made and future goals.

Textbook of Palliative Medicine Oxford University Press

"Evidence-Based Practice of Palliative Medicine" is the only book that uses a practical, question-and-answer approach to address evidence-based decision making in palliative medicine. Dr. Nathan E. Goldstein and Dr. R. Sean Morrison equip you to evaluate the available evidence alongside of current practice guidelines, so you can provide optimal care for patients and families who are dealing with serious illness.

One Patient, One Doctor, One Year Oxford University Press

Written by an international team of authors the Oxford Textbook of Communication in Oncology and Palliative Care integrates clinical wisdom with empirical findings. It draws upon the history of communication science, providing the reader with a comprehensive curriculum for applied communication skills training. An essential resource, the Oxford Textbook of Communication in Oncology and Palliative Care is filled with tips and strategies for effective communication about difficult and challenging communication. In focusing on cancer and the end-of-life, it deals with the existential and spiritual challenges found across all of medicine, providing deep insights into what is at stake and how clinicians might optimally respond. This authoritative and wide-ranging book provides clinicians with state-of-the-art and evidence-based guidelines to achieve effective, patient-centred communication in the clinical settings of oncology and palliative care. Thoroughly revised and updated, this new edition includes sections on the curriculum for nurses, the core curriculum, and an introductory section on communication science. The chapters embrace specialty issues across the clinical disciplines, from enrolling in clinical trials, working in teams, and discussing genetic risk, to talking about sexuality, infertility, and intercultural issues. An educational perspective is also provided, with chapters covering communication skills training, how to evaluate courses, and international models of training.

Quality Care to the End of Life, Fifth Edition Oxford University Press

Have you ever wondered if you calculated your patient's dosage correctly? Against a backdrop of the growing scrutiny of appropriate dosages, this textbook takes a fresh, new approach to helping health professionals strengthen care to and possibly save the lives of patients living with pain. This easy-to-understand and often humorous book is the most comprehensive to-date on opioid calculations for pain management and palliative care. It carefully walks clinicians through a five-step process for performing opioid conversion calculations in the real-world situations they often see. The book has case examples, simple charts and tables, and practice problems throughout on topics such as: difficult conversions for methadone,

fantanyl, PCA, and neuraxial opioid therapy· conversions between routes and dosage formulations of the same opioids and different opioids· titrating opioid dosages up and down to include dosage change and timing· calculating doses for rescue opioid therapy Written by pain management expert Dr. Mary Lynn McPherson, the book gives helpful tips that practitioners should incorporate into their practices. It is a must for clinicians at all levels: hospice and palliative care physicians, physician's assistants, nurses, nurse practitioners, and pharmacists. Clinicians will come away with more confidence in doing the calculations, and higher service levels from the improvement in care.

Oxford Textbook of Palliative Nursing John Wiley & Sons

Over the past two decades there has been a marked change in global age demographics, with the number of over-60s increasing by 82% and the number of centenarians by 715%. This new-found longevity is testament to the success of recent advances in medicine, but poses significant challenges to multiple areas of health care concerning older patients. Building upon its predecessor's reputation as the definitive resource on the subject, this new edition of the Oxford Textbook of Geriatric Medicine offers a comprehensive and multinational examination of the field. Fully revised to reflect the current state of geriatric medicine, it examines the medical and scientific basis of clinical issues, as well as the ethical, legal, and socio-economic concerns for healthcare policy and systems. Over 170 chapters are broken up into 16 key sections, covering topics ranging from policy and key concepts through to infection, cancer, palliative medicine, and healthy ageing. New material includes focus on the evolving concepts of malnutrition, sarcopenia, frailty, and related geriatric syndromes and integration of geriatric principles from public health, primary and specialized care, and transitional stages from home to emergency, medicine and surgery, rehabilitation, and long term care. The Oxford Textbook of Geriatric Medicine brings together specialists from across the globe to provide every physician involved in the care of older patients with a comprehensive resource on all the clinical problems they are likely to encounter, as well as on related psychological, philosophical, and social issues.

Oxford Textbook of Oncology Oxford University Press

This handbook provides an easily navigable source of information about the day-to-day management of patients requiring palliative and hospice care. Succinct, evidence-based, topically focused content is supplemented by extensive tables and algorithms. The table of contents and balance of coverage follows the core curriculum of the American Board of Hospice and Palliative Medicine, thus meeting the educational and clinical information needs of students, residents, fellows, and nurse practitioners. An expert team of clinicians, led by world renowned Eduardo Bruera, address approach to care; psychosocial and spiritual issues; impending death; grief and bereavement; assessment and management of pain; management of non-pain symptoms such as nausea, dyspnea, depression, insomnia, and bleeding; communication and team work; and ethical and legal decision making.

Oxford Textbook of Palliative Nursing Oxford University Press

The philosophy of palliative care has long remained undisputed by health care professionals and philosophers. This unique book reviews the ethical problems inherent within care of the terminally ill. It suggests a new philosophy statement that could improve clinical care and take the specialty forward.

Oxford Textbook of Communication in Oncology and Palliative Care Oxford University Press

The Oxford Textbook of Palliative Social Work is a comprehensive, evidence-informed text that addresses the needs of professionals who provide interdisciplinary, culturally sensitive, biopsychosocial-spiritual care for patients and families living with life-threatening illness. Social workers from diverse settings will benefit from its international scope and wealth of patient and family narratives. Unique to this scholarly text is its emphasis on the collaborative nature inherent in palliative care. This definitive resource is edited by two leading palliative social work pioneers who bring together an array of international authors who provide clinicians, researchers, policy-makers, and academics with a broad range of content to enrich the guidelines recommended by the National Consensus Project for Quality Palliative Care.

A Guide for Effective Dosing CRC Press

The care of patients with advanced and terminal illness can be extremely rewarding but often causes professionals a considerable amount of discomfort. This is especially so when you feel under confident in your abilities to provide a high quality of symptom management and relief from distress and to communicate appropriately with patients. Patients with advanced disease present some of the most challenging ethical, physical, psychological and social issues to clinicians and indeed to society. Patients need us to be knowledgeable, skilful and understanding. The fully revised and updated new edition of Palliative Care outlines the fundamental principles and facts which will enable you to make a very real difference to your patients and their families. Information is provided in an accessible, user-friendly way and covers a wide range of physical and non-physical symptom management. Multi-professional team work is addressed, as is the role and support of families. There is also a consideration of the dilemmas and decisions that may be encountered by doctors around the end of a patient's life. This practical resource, designed to provoke contemplative professional development, and enhance learning will be essential reading for nursing and medical practitioners, and other professionals who support patients in their homes, in care homes, and in hospital.
