Accounting, Auditing and Governance for Takaful Operations Routledge
 This book provides an overview of the current state of Malaysia, looking at political and economic developments and at governance, and discussing the impact of ethnicity, patronage and the reform movement. Apart from discussing issues such as Islamisation and identity transformations within Malaysian society, it reviews policies like privatisation and provides an examination of business enterprise, exploring how control of 'corporate Malaysia' is interlinked with political developments. This study's primary focus is an analysis of why the reform movement failed to secure

substantial support in the late 1990s even though many Malaysians then appeared ready to hold the government accountable for its poor record of a democratic and transparent form of governance. This volume also assesses the likelihood of change as a result of the retirement of Prime Minister Mahathir Mohamad

The second edition of this bestselling textbook retains its unique learning-by-doing approach to econometrics. Rather than relying on complex theoretical discussions and complicated mathematics, this book explains econometrics from a practical point of view by walking the student through real-life examples, step by step. Damodar Gujarati's clear, concise, writing style guides students from model formulation, to estimation and hypothesis-testing, through to post-estimation diagnostics. The basic statistics needed to follow the book are covered in an appendix, making the book a flexible and self-contained learning resource. The textbook is ideal for undergraduate students in economics, business, marketing, finance, operations research and related disciplines. It is also intended for students in MBA programs across the social sciences, and for researchers in

business, government and research organizations who require econometrics. New to this Edition: - Two brand new chapters on Quantile Regression Modeling and Multivariate Regression Models. - Two further additional chapters on hierarchical linear regression models and bootstrapping are available on the book's website - New extended examples accompanied by real-life data - New student exercises at the end of each chapter

State of Malaysia Edward Elgar Publishing Islamic finance distinguishes itself from conventional finance with its strong emphasis on the moral consequences of financial transactions; prohibiting interest, excessive uncertainty, and finance of harmful business. When it comes to risk mitigation, it is unique in its risk sharing approach.

Vol 3 Isu 1 2014 Hal Leonard Corporation It is said that the COVID-19 pandemic has turned back the poverty clock. As such, there is a need to have social mechanisms put in place to provide relief to those who are affected in this regard. Islamic social finance consists of tools and institutions that could be used to alleviate poverty. This book explores the impact of COVID-19 on Islamic finance to better understand the effectiveness of Islamic social finance in helping those who have been affected by poverty overnight due to the halt in all major economic activities in the context of the pandemic. Since the struggle against poverty in each country will be different, the book attempts to shed light on the experiences of different countries by presenting successful models of Islamic social finance. The book first looks at poverty and COVID-19 before delving into the role of Islamic social financial institutions and how they have risen against COVID-19. The book concludes by examining the impact of COVID-19 on Islamic microfinance. This book is the first of its kind on the subject of COVID-19, and it intends to bridge the gap in the literature.

Measuring and managing the performance of a business is one of the most genuine desires of management. Balanced scorecard, the performance prism and activity-based management are the most popular frameworks in this setting. Based on the findings of R.G. Eccles' acclaimed "Performance Measurement Manifesto (1991)" this book introduces new contexts and themes of application and presents emerging research areas related to business performance measurement and management, e.g. SMEs and sustainability. As a result of the 1st International Summer School Piero Lunghi on "Perspectives of Business Performance Management" this book is written both for students and academics, as well as for practitioners looking for new, yet proven ways to measure and manage business performance.
