Digital technology is now a normal part of everyday life. The mutation of music and film into bits and bytes, downloads and streams is now taken for granted. For the world of book and magazine publishing however, this transformation has only just begun. Still, the vision of this transformation is far from new. For more than a century now, avant-garde artists, activists and technologists have been

anticipating the development of networked and electronic publishing. Although in hindsight the reports of the death of paper were greatly exaggerated, electronic publishing has now certainly become a reality. How will the analog and the digital coexist in the post-digital age of publishing? How will they transition, mix and cross over? In this book, Alessandro Ludovico rereads the history of the avant-garde arts as a prehistory of cutting through the so-called dichotomy between paper and electronics. Ludovico is the editor and publisher of *Neural*, a magazine for critical digital culture and media arts.

For more than 20 years now, he has been working at the cutting edge (and the outer fringes) of both print publishing and politically engaged digital art.

Painted Wood Not Found

Whacky and over-the-top, this funny book is crammed full of Egyptian mummy stickers to add to lurid, madcap scenes. All the characters in this book are mummies,

even the tomb robbers and embalmers! Despite appearances, an Ancient Egyptian expert has ensured that this book is as accurate as possible.

This publication highlights the impact of culture on local economies and the methodological issues related to its identification.

Gods, Heroes and Monsters Nardini Editore

Medieval Christians knew the past primarily through what they saw and heard. History was reenacted every year in ritual observances particular to each place and region and rooted in the legends of local saints. This richly illustrated book explores the layers of history found in the cult of the Virgin of Chartres as it developed in the eleventh and twelfth centuries. Focusing on the major relic of Chartres Cathedral, the Virgin's gown, and the Feast of Mary's Nativity, Margot Fassler employs a wide range of historical evidence including local histories, letters, obituaries, chants, liturgical sources, and reports of miracles, leading to a detailed reading of the cathedral's west façade. This interdisciplinary volume will prove invaluable to historians who work in

religion, politics, music, and art but will also serve as a guidebook for all interested in the history of Chartres Cathedral.

Far from the auction halls of the elite, The Collector seeks out rare and mysterious artifacts across the world. At home in the salons of Paris as he is in the jungles of Borneo, The Collector is a man who has dedicated his life to finding objects very special and almost unknown, which tracks through his research in a variety of locations. But beware, a man who comes into possession of such items does not hesitate to use any means without scruple. Set against the backdrop of late 19th-

century colonialism, *The Collector* is a delightful, swashbuckling adventure by a master of European comic books - Sergio Toppi!

This delightfully illustrated piano book is an ideal introduction to musical instrument with 7 classic nursery rhymes for children to sing along and play along with a multifunctional electronic keyboard.

Function1: Push the key that matches the colour of the music note to play along on the keyboard. Function2: Follow the coloured lights on the keyboard to learn how to play a song. Function3: Watch the piano playing itself. Function4: Select a sound effect from different musical instruments.

The Secret History of Tom Trueheart John Wiley & Sons

Halli loves the old stories from when the valley was a wild and dangerous place when the legendary heroes stood together to defeat the ancient enemy, the bloodthirsty Trows. Nowadays heroics seem a thing of the past. But when a practical joke rekindles an old blood feud, Halli spots a chance for a quest of his own.

For *Voir la mer*, Sophie Calle invited inhabitants of Istanbul, who often originated from central Turkey, to see the sea for the first time. "I took 15 people of all ages, from kids to one man in his 80s ... once we were safely by the sea, I instructed them to take away their hands and look at it. Then, when they were ready--for some it was five minutes and for others 15--they had to turn to me and let me look at those eyes that had just seen the sea." The project was eventually composed of 14 five-minute videos, made for Calle by Caroline Champetier. Each person is filmed from behind, eventually turning to face the camera, revealing the emotions the experience has evoked. This charming catalogue features Calle's evocative photographs of these subjects.

The Production Manual Edizioni Mondadori

The best-selling text has been completely revised and revitalised in this fifth edition, with the authors once again encouraging general practitioners, medical students, general physicians and early stage dermatology specialist trainees and interns to relish the unique challenge of diagnosing and treating skin conditions. *Clinical Dermatology*, 5th edition contains over 400 high quality pictures and diagrams combined with colourful phrases to illustrate and entertain as it teaches. The book has established a reputation as a 'way of learning' and as an accessible guide to the subject for the aspiring specialist. Readers are guided through the maze that too often lies between the presenting skin complaint and its final diagnosis and treatment. The authors have skilfully crafted an easily read text with enough detail to clarify the subject, but not enough to obscure it. This fifth edition contains new chapters on non-

invasive physical treatment and dermoscopy, and new material on cosmetic dermatology, surgical dermatology, the skin and the psyche, and dermatoses of non-Caucasian skin. The text throughout the book has been updated in line with developments in the science and practice of dermatology. "... brilliantly succeeds in enticing you to look further. The writing is clear, and the joint British-American authorship avoids any parochial views." From a review of a previous edition in BMJ "...a very well-presented book...an excellent aid for teaching. I recommend this book highly to individuals and departments." From a review of a previous edition in J Derm Treatment "... provides a good overview of the structure and function of the skin as well as a good foundation for learning dermatology...well organized and includes a chapter dedicated to skin signs of systemic disease which is not covered in the other dermatology primers." If you choose to share 'the facts of life' with children at a young age, this is the perfect book to do so. It gently guides the reader through each stage of a child's development within the womb with charming illustrations and simple explanations, inviting lots of discussion and providing answers to all those questions. Shortlisted for the Junior Science Book Award (now the Royal Society's Science Prize).

Time Warp (Geronimo Stilton Journey Through Time #7) Archaia
The book presents for the first time the restoration of Amundsen's glass slides, one of the most beautiful collections of slides in the world. The 248 slides are the photographic testimony of three great explorations: the Northwest Passage (1903-1906), the conquest of the South Pole (1910-1912) and the Maud expedition (1918-1925). Discovered by chance in

1986, the slides were restored in 2009 by Pietro Librici at the National Library of Norway, in a continuous cooperation with the institute team. The restoration is presented analytically in its methodological, technical, scientific and operational aspects, constituting an updated model of intervention. Critical historical studies that accompanied the restoration and the expressive features of the slides have also led the author to identify Amundsen's own style which lies between documentary photography and photographic documentation and make the book a particular opportunity to immerse in the charm of polar expeditions, in the first years of the 20th century when the poles were the only areas of terra incognita left on the world map.
