Smart Study Series - ENT  
e-BookElsevier Health

Sciences

Japanese Demon Lore

Elsevier Health Sciences

In this book, globally renowned orthopedic, plastic, and hand surgeons provide the knowledge required in order to understand and resolve the full range of problems associated with diseases, anomalies, deformities, and trauma of the thumb. The opening section describes the history of “making a thumb” and covers the fundamentals of anatomy, embryology, and functional dynamics. After careful presentation of the surgical procedures for various developmental anomalies of the thumb, subsequent sections focus on the treatment of bone and joint, tendon, and nerve problems encountered in patients with different diseases and injuries. All aspects of the surgical management of benign and malignant tumors of the thumb are then described. The final section is devoted to current and emerging treatments for trauma, including amputation and microsurgical and non-microsurgical reconstruction. The text is supported by superb clinical photographs as well as high-quality schematic drawings and

video clips. The book will be of value not only to practicing surgeons but also to residents and medical students.

*Clinical Atlas of ENT and Head & Neck Diseases*

Univ of California Press

This teaching guide covers the identification, deterioration, and conservation of artifacts made from plant materials. Detailed information on plant anatomy, morphology, and development, focusing on information useful to the conservator in identifying plant fibers are described, as well as the processing, construction, and decorative techniques commonly used in such artifacts. A final chapter provides a thorough discussion of conservation, preservation, storage, and restoration methods. This is a valuable resource to conservators and students alike.

**Cyanobacterial Harmful Algal Blooms: State of the Science and Research Needs**

Springer

Diseases of Ear, Nose and Throat is a popular textbook of ENT. The first edition of the book was published in 1992. Since then it has received wide acceptance from the

readers and every attempt has been made to update the current edition in the light of the advances made by the speciality. The current sixth edition of the book marks 22nd year of its publication.

Carbon Sequestration in Forest Ecosystems

Smart Study Series - ENT e-Book

The Wild East bridges political economy and anthropology to examine a variety of il/legal economic sectors and businesses such as red sanders, coal, fire, oil, sand, air spectrum, land, water, real estate, procurement and industrial labour. The 11 case studies, based across India, Pakistan and Bangladesh, explore how state regulative law is often ignored and/or selectively manipulated. The emerging collective narrative shows the workings of regulated criminal economic systems where criminal formations, politicians, police, judges and bureaucrats are deeply intertwined. By pioneering the field-study of the politicisation of economic crime, and disrupting the wider literature on South Asia’s informal economy, The Wild East aims to influence future research agendas through its case

for the study of mafia-enterprises and their engagement with governance in South Asia and outside. Its empirical and theoretical contribution to debates about economic crimes in democratic regimes will be of critical value to researchers in Economics, Anthropology, Sociology, Comparative Politics, Political Science and International Relations, Criminologists and Development Studies, as well as to those inside and outside academia interested in current affairs and the relationship between crime, politics and mafia enterprises.

*Practical ENT* Jaypee Brothers, Medical Publishers Pvt. Limited For over 2500 years, Buddhism was implicated in processes of cultural interaction that in turn shaped Buddhist doctrines, practices and institutions. While the cultural plurality of Buddhism has often been remarked upon, the transcultural processes that constitute this plurality, and their long-term effects, have scarcely been studied as a topic in their own right. The contributions to this volume present detailed case studies ranging

across different time periods, regions and disciplines, and they address methodological challenges as well as theoretical problems. In addition to casting a spotlight on topics as diverse as the role of trade contacts in the early spread of Buddhism, the hybrid nature of religious practices in Japan or Indo-Tibetan relations in Tibetan polemical literature, the individual papers jointly raise the question as to whether there might be something distinct about how Buddhism steers and influences forms of cultural exchange, and is in turn shaped by modalities of cultural interaction throughout Asian, as well as global, history. The volume is intended to demonstrate the need for investigating transcultural dynamics more closely in the study of Buddhism, and to suggest new avenues for Buddhist Studies.

The Immensely popular SSS-ENT and Head& Neck Surgery is back in the ALL NEW, REVISED 3rd Edition. Thorough review and revamp of all chapters makes it CURRENT, CONCISE & COMPLETE. The hugely

appreciated basic theme, easy to learn 'Question-Answer format' maintained throughout by the author with his proven stamp of perfection and finesse; allows broader scope of use among students and residents. The Immensely popular SSS-ENT and Head& Neck Surgery is back in the ALL NEW, REVISED 3rd Edition. Thorough review and revamp of all chapters makes it CURRENT, CONCISE & COMPLETE. The hugely appreciated basic theme, easy to learn 'Question-Answer format' maintained throughout by the author with his proven stamp of perfection and finesse; allows broader scope of use among students and residents. Comprehensive coverage of the Subject, Subspecialties & Allied specialties in all its diversities, brilliantly linked to topics of PGMEET questions for past 30 years, updated up to 2015. Brevity and clarity allows A-Z revision of the subject irrespective of the pattern of examination; this perennial best seller should be the unequivocal choice and 'must read' for any PGMEET preparation. **Modern Database Management** Harvard University Press

The Handbook of ENT, authored by Dr. K. K. Sharan is a very comprehensive book that covers important topics regarding the diseases of ear, nose and throat regions quite elaborately. Throughout the book, he has discussed the intricacies of otorhinolaryngology with great sophistication yet simple presentation and lucid design. The author has described the diseases of the region and started with the scheme and manner of examination, diagnosis and treatment. His discussion of Otorhinolaryngology is scholarly and will help ENT practitioners in examination, diagnosis and treatment of diseases of ear with greater competence and insight. On rhinology, he has outlined many ailments of nose like mid-line granuloma, diseases of paranasal and frontal sinuses, nasal polyp etc. and its management. His exercise on rhinology will definitely add to the field of knowledge on the subject. On oropharynx, laryngopharynx and larynx, the book deals with ailments like acute follicular tonsillitis, chronic tonsillitis, carcinoma of tonsils, stridor,

hoarseness of voice, etc. and will be very useful for undergraduate as well as post-graduate students and quite an addition for ENT surgeons dealing with complications and ailments of laryngeal region. His discussion on salivary and pituitary glands is masterly. Surgical procedures like Septoplasty, Tracheostomy and Mastoidectomy have been discussed in detail.

The Conservation of Artifacts Made from Plant Materials Elsevier India

As records of the link between a manuscript and the texts it contains, paratexts document many aspects of a manuscript's life: production, transmission, usage, and reception. Comprehensive studies of paratexts are still rare in the field of manuscript studies, and the universal categories of time and space are used to create a common frame for research and comparisons.

Contributions in this volume span over three continents and one millennium.

The Divine Origin of the Craft of the Herbalist Springer

The new edition of this book is a complete guide to the diagnosis and management of head and neck cancers. Divided into

seven sections, the text covers thyroid, salivary glands and parapharyngeal tumours, neck, paranasal sinuses, oral cavity and oropharynx, larynx, hypopharynx and nasopharynx, with a final section on general topics. Each topic includes discussion on pathology, imaging, and medical and surgical management. The second edition has been fully revised to provide the latest advances in the field, and includes new chapters on parathyroid tumours, infratemporal fossa, temporal bone tumours, facial nerve tumours, tracheostomy, and skin cancers. Recent changes in the American Joint Cancer Committee (AJCC) 8th Edition staging system have been incorporated. More than 300 photographs, illustrations and tables further enhance the comprehensive text. Key points Comprehensive guide to diagnosis and management of head and neck cancers Fully revised, second edition with many new topics included Covers recent changes in the American Joint Cancer Committee (AJCC) 8th Edition staging system Previous edition (9789351527916)

published in 2015  
Agroforestry - The Future of Global Land Use

Springer Science & Business Media

This new edition has been fully revised to provide undergraduate medical students with the latest information in the field of ENT. Beginning with an introduction to the importance of thorough history taking, the following chapters explain examination techniques for different sections of the head – oral cavity, nose, ear, salivary glands, tonsils and pharynx, larynx, neck, thyroid gland, and cranial nerves. The book then discusses X-Ray interpretation, operative procedures and instruments, audiology, calorimetry, and applied anatomy of bones. The final sections of this practical guide provide FAQs for quick revision and case presentations to assist learning. The book is further enhanced by clinical photographs, diagrams and tables. Key points Fully revised, third edition providing undergraduates with practical guide to ENT Covers history taking, examination techniques for all sections of the head, X-Rays, operative procedures, applied anatomy, and more

Features FAQs and case presentations for quick revision Previous edition published in 2013

**Working with Ferns**

Springer

"The Chinese gazette as a publicly available government publication was distributed in a variety of formats since the twelfth century. Little is known, however, about its form and content before 1800. By looking at China from the periphery, this study shows how European sources offer a unique way of expanding the knowledge about the gazette of the seventeenth and eighteenth centuries. Its interconnected history illustrates how the Chinese gazette, as translated by European missionaries, became a major source for reflections on state and society by Enlightenment thinkers. It thus joined a global public much earlier than so far assumed"--  
FAITH AND THE BELOVED  
 Amsterdam University Press

This book gathers research contributions on recent advances in intelligent and distributed computing. A major focus is placed on new techniques and applications for several highlydemanded research

directions: Internet of Things, Cloud Computing and Big Data, Data Mining and Machine Learning, Multi-agent and Service-Based Distributed Systems, Distributed Algorithms and Optimization, Modeling Operational Processes, Social Network Analysis and Inappropriate Content Counteraction, Cyber-Physical Security and Safety, Intelligent Distributed Decision Support Systems, Intelligent Human-Machine Interfaces, VisualAnalytics and others. The book represents the peer-reviewed proceedings of the 13thInternational Symposium on Intelligent Distributed Computing (IDC 2019), which was held in St. Petersburg, Russia, from October 7 to 9, 2019.

**World Philology**

University Press of Colorado

Carbon Sequestration in Forest Ecosystems is a comprehensive book describing the basic processes of carbon dynamics in forest ecosystems, their contribution to carbon sequestration and implications for mitigating abrupt climate change. This book provides the information on processes,

factors and causes influencing carbon sequestration in forest ecosystems. Drawing upon most up-to-date references, this book summarizes the current understanding of carbon sequestration processes in forest ecosystems while identifying knowledge gaps for future research. Thus, this book is a valuable knowledge source for students, scientists, forest managers and policy makers.

Arthroscopy and Sport Injuries Simon and Schuster

Naithy Cherozil is a rich and successful business woman from Mumbai who marries the young and handsome model Tony D'Souza after the death of her spouse. Little does she know that the ideal sex slave of her husband is the sleeper cell of a terror outfit. Events in her life take unforeseen turns as the male Mata Hari is activated. Prem Rollands is a 'Kalari' exponent and a brilliant student whose world revolves around his brother Arun. Things go awry when the police kill Arun under mysterious circumstances. Prem kills the inspector in retribution and is on the run. He is on the lookout to find the dark secrets

leading to Arun's death. Prem must avenge those who have plotted to kill his brother. Eighteen year old Alice Cherozil knows more about computers and mystery games than a girl of her age. Her life falls apart when her mother is hospitalised and in a coma. She is playing the ultimate mystery game of her life as the web of secrets surrounding two precious diamonds and her stepfather threaten to destroy her family. She overcomes the moral dilemma to kill her stepfather. Alice must outwit the underworld and stay ahead of all to save her mother's life or the guilt of her failure will haunt her forever. As the lives of Naithy, Prem and Alice cross each other they must retain their faith and protect their beloved ones, even at the cost of their own lives. A riveting saga of love, lust, betrayal, intrigue and revenge.

Placing Empire Notion Press

This new edition has been fully revised to provide students with the latest advances and technologies in general surgery. The book begins with a selection of long and short cases, each covering different regions

of the anatomy. The remaining sections discuss surgical problems, X-Rays, pathology, preoperative preparations, minor surgical procedures, instruments, operative surgery, and surgical anatomy. The text is highly illustrated with clinical photographs and schematic drawings, and the surgical anatomy section provides hand drawn illustrations correlating anatomy with pathology. The third edition includes several new features including: a long case on the management of diabetic foot, the TNM malignant tumour staging classification has been updated in accordance with the 7th edition American Joint Committee on Cancer (AJCC) manual, interpretation of mammography has been added to the X-Ray section, and lower leg compartments and cervical fascia have been added to the surgical anatomy section. Key points Fully revised, new edition providing students with the latest advances in general surgery Third edition includes many new features such as the updated TNM malignant tumour staging classification Highly

illustrated with clinical photographs and schematic drawings

 ♦Should feminists clone? ♦What do neurons think about? ♦  
 ♦How can we learn from bacterial writing? ♦ These provocative questions have haunted neuroscientist and molecular biologist Deboleena Roy since her early days of research when she was conducting experiments on an in vitro cell line using molecular biology techniques. An expert natural scientist as well as an intrepid feminist theorist, Roy takes seriously the expressive capabilities of biological ♦objects ♦♦such as bacteria and other human, nonhuman, organic, and inorganic actants ♦in order to better understand processes of becoming. She also suggests that renewed interest in matter and materiality in feminist theory must be accompanied by new feminist approaches that work with the everyday, nitty-gritty research methods and techniques in the natural sciences. By

practicing science as feminism at the lab bench, Roy creates an interdisciplinary conversation between molecular biology, Deleuzian philosophies, science and technology studies, feminist theory, posthumanism, and postcolonial and decolonial studies. In *Molecular Feminisms* she brings insights from feminist and cultural theory together with lessons learned from the capabilities and techniques of bacteria, subcloning, and synthetic biology to offer tools for how we might approach nature anew. In the process she demonstrates that learning how to see the world around us is also always about learning how to encounter that world.

 Examines the relationship between social movements and the law in bringing about social change in Japan  
*Bedside Clinics in Surgery* University of Michigan Press  
 Oni, ubiquitous supernatural figures in Japanese literature, lore, art, and religion, usually appear as demons or ogres. Characteristically

threatening, monstrous creatures with ugly features and fearful habits, including cannibalism, they also can be harbingers of prosperity, beautiful and sexual, and especially in modern contexts, even cute and lovable. There has been much ambiguity in their character and identity over their long history. Usually male, their female manifestations convey distinctively gendered social and cultural meanings. Oni appear frequently in various arts and media, from Noh theater and picture scrolls to modern fiction and political propaganda. They remain common figures in popular Japanese anime, manga, and film and are becoming embedded in American and international popular culture through such media. Noriko Reider's book is the first in English devoted to oni. Reider fully examines their cultural history, multifaceted roles, and complex significance as "others" to the Japanese.  
 Springer Nature  
 The fifth edition of *Modern Database Management* has been updated to reflect the most current database content available. It provides

sound, clear, and current coverage of the concepts, skills, and issues needed to cope with an expanding

organisational resource. While sufficient technical detail is provided, the emphasis remains on management and

implementation issues pertinent in a business information systems curriculum.
