Boundaries Face to Face SAGE Publications

* Serves as a guide to using ritual acts in peacebuilding efforts * Abundant with examples of symbolic acts that aided the peace process Conflict is dramatic. In theater, literature, story telling, and news reporting, it is a powerful mechanism that draws attention, heightens the senses and evokes emotion. Schirch argues that peacebuilding has the potential to do just the same. Examples of peacebuilding often center on the serious, rational negotiations and formal problem-solving efforts in conflict situations. Schirch argues, though, that what truly bonds adversaries and helps achieve peace are the symbolic, non-verbal ritual acts--shaking hands, sharing a meal, showing a photograph of a loved one. Yet these are often overlooked as deliberate components of peace negotiations. Ritual and Symbol in Peacebuilding underscores the importance of incorporating symbolic tools, including ritual, into traditional approaches to conflict. Ritual assists

in solving complex, deep-rooted conflicts, and helps to confirm and transform worldviews, identities, and relationships. With theories and language to explain the symbolic dimensions of conflict, this text will be useful to scholars and practitioners active in the diverse field of peacebuilding.

Managing Interpersonal Conflict Routledge

This book explores the process of interpersonal conflict - from the initial decision as to whether or not to confront differences through to how to plan the actual confrontation. It deals extensively with negotiation and, where negotiation proves unsuccessful, with third-party dispute resolution. To avoid destructive or violent behaviour, Donohue emphasizes the importance of keeping conflicts under control and of focusing on the pertinent issues. He argues that the key to managing conflict is to address differences collaboratively so that the parties can create better solutions and, ultimately, strengthen their relationships.

Practical Skills for Conflict Transformation McGraw-Hill Education

Using Conflict Theory presents how and why conflict erupts, and how it can be managed.

The Dark Side of Close Relationships II is a completely new and up-to-date version of the original volume published in 1998, featuring new topics and authors. The volume showcases cutting-edge work on important topics by prominent scholars in multiple disciplines. It sheds light on the paradoxical, dialectical, and mystifying facets of human interaction, not merely to elucidate dysfunctional relationship phenomena, but to help readers explore and understand it in relation to a broader understanding about relationships. As previous Dark Side investigations have revealed, negative or dysfunctional outcomes can occur in relationships even though positive and functional ones are expected, and at the same time, positive silver linings are often found in some dark relational clouds. Such nuanced approaches are needed to better account for the complexity of close relationships. A unique and provocative collection, this volume will appeal to relationship researchers in communication, social psychology, family studies, and sociology.

The APSAC Handbook on Child Maltreatment Kumarian Press

This book discusses how people go about achieving their social goals through human symbolic interaction. The editors' collective presumption is that there are more or less typical ways that people attempt to obtain desired outcomes -- be they persuasive, informative, conflictive, or the like -- through communication. Representing a first summary of research done by scholars, primarily in the communication discipline, this volume seeks to identify and understand how it is that people achieve what they want through social interaction. Under the very broad label of strategies, this research has sought to: * identify critical social goals such as gaining compliance, generating affinity, resolving social conflict, and offering information; * specify, for each goal, the ways, or strategies, by which people can go about achieving these goals; * determine predictors of strategy selection -- that is, why does a person opt for one strategy over others to obtain the desired end? The research also reflects the attention the field of communication has given to strategy issues in the past 15 years. The chapters describe research on the ways in which people achieve different goals, and summarize existing research and theory on the attainment of social goals. Readers will gain insight into many of the issues that exist regardless of the strategy being discussed. Thus, this volume may not include chapters on topics such as ways people elicit or offer disclosure, ways people demonstrate anger, or ways people create guilt, but the issues that appear consistently throughout the various chapters should apply equally to these. Finally, the essays in this volume provide not only a summary of what has been accomplished to date, but also an initial theoretic map for future research concerning strategic interpersonal communication.

Marriages and Families in the 21st Century puts contemporary relationships and family structures in context for today's students. Using a bioecological framework, the book reveals how families are shaped by multiple influences, from biological to cultural, that interact with one another. Chapters cover topics from parenting to gender issues within an interdisciplinary context, weaving in stories, visuals, and examples of diverse families to dispel longstanding myths. The book creates a personalized learning experience with frequent self-assessments and strengths exercises, while

ensuring that students come to understand the research and build scientific analysis and critical thinking skills along the way. Robust digital tools and resources including SAGE edge and an interactive eBook with SAGE Premium Video help readers develop a multi-layered understanding of today's modern families while challenging them to re-evaluate their own assumptions and experiences. Dr. May explains the relationship between apathy and violence in this examination of the constructive and destructive aspects of aggression

Managing Conflict at Organizational Interfaces Guilford Press

Now available in paper for the first time, this classic work presents a structured, rigorously tested,

six-stage strategy for improving intimate relationships. Therapists and counselors will benefit from practical, step-by-step guidance for deciding how, why, and when to employ such widely cited Stuart techniques as "caring days," communication improvements, behavioral contracting, the "powergram" procedure for decision making, and conflict containment. These techniques not only provide a program for identifying and producing positive behavior change, but give the therapist the tools to assess therapeutic outcome and empirically validate the efficacy of change. A new preface to the paperback edition situates the book within the contemporary couple therapy landscape and reflects on the continuing evolution of the author's approach.

Nothing is more important to business success than innovation . . . And here's what you can do about it on Monday morning with the definitive how-to book from the world's leading authority on innovation When it comes to innovation, Curt Carlson and Bill Wilmot of SRI International know what they are talking about—literally. SRI has pioneered innovations that day in and day out are part of the fabric of your life, such as: • The computer mouse and the personal computer interface you use at home and work • The high-definition television in your living room • The unusual numbers at the bottom of your checks that enable your bank to maintain your account balance correctly • The speech-recognition system used by your financial services firm when you call for your account balance or to make a transaction. Each of these innovations—and literally hundreds of others—created new value for customers. And that's the central message of this book. Innovation is not about inventing clever gadgets or just “creativity.” It is the successful creation and delivery of a new or improved product or service that provides value for your customer and sustained profit for your organization. The first black-and-white television, for example, was just an interesting, cool invention until David Sarnoff created an innovation—a network—that delivered programming to an audience. The genius of this book is that it provides the “how” of innovation. It makes innovation practical by getting two groups who are often disconnected—the managers who make decisions and the people on the front lines who create the innovations—onto the same page. Instead of smart people grousing about the executive suite not recognizing a good idea if they tripped over it and the folks on the top floor wondering whether the people doing the complaining have an understanding of market realities, Carlson and Wilmot's five disciplines of innovation focus attention where it should be: on the creation of valuable new products and services that meet customer needs. Innovation is not just for the “lone genius in the garage” but for you and everyone in your enterprise. Carlson and Wilmot provide a systematic way to make innovation practical, one intimately tied to the way things get done in your business. Teamwork isn't enough. Creativity isn't enough. A new product idea isn't enough. True innovation is about delivering value to customers. Innovation reveals the value-creating processes used by SRI International, the organization behind the computer mouse, robotic surgery, and domain names. Curt Carlson and Bill Wilmot show you how to use these practical, tested processes to create great customer value for your organization.

Conflict Management and Resolution provides students with an overview of the main theories of conflict management and conflict resolution, and will equip them to respond to the complex phenomena of international conflict. The book covers these four key concepts in detail: negotiation mediation facilitation reconciliation. It examines how to prevent, manage and eventually resolve various types of conflict that originate from inter-state and inter-group competition, and expands the existing scope of conflict management and resolution theories by examining emerging theories

on the identity, power and structural dimensions of adversarial relationships. The volume is designed to enhance our understanding of effective response strategies to conflict in multiple social settings as well as violent struggles, and utilizes numerous case studies, both past and

current. These include the Iranian and North Korean nuclear weapons programmes, the war in Lebanon, the Arab-Israeli conflict, civil wars in Africa, and ethnic conflicts in Europe and Asia. This book will be essential reading for all students of conflict management and resolution, mediation, peacekeeping, peace and conflict studies and International Relations in general. Ho-Won Jeong is

Professor of Conflict Analysis and Resolution, George Mason University, USA. He has published nine books in the field of international relations, peace and conflict studies. He is also a senior editor of the International Journal of Peace Studies.
