Lymphatic System The lymphatic system consists of the lymphatic vessels, lymph nodes, and certain other lymphoid organs in the body (Figure 12.1). Extremely porous blind-ended lymphatic capillaries pick up excess tissue fluid leaked from the blood capillaries (Figure 12.2). The fluid (lymph) flows into the larger lymphatics and finally into the blood vascular system through the right lymphatic duct and the left thoracic duct.

Chapter 12: Lymphatic System Chapter 12: The Lymphatic System. STUDY. PLAY. vessels, fluids. lymphatic system consists of 2 semi-independent parts: 1) lymphatic _____ and 2) lymphatic tissues & organs. Lymphatic system functions: transports escaped _____ back to blood, plays essential roles in body defense and disease resistance.

Chapter 12: The Lymphatic System Flashcards | Quizlet Lymphatic System Organ system that consists of two semi-independent parts; lymphatic vessels and lymphoid tissues and organs. Chapter 12 --> The Lymphatic System Flashcards | Quizlet Chapter 12 Lymphatic System Notes Consists of two semi-independent parts: o Lymphatic vessels o Lymphoid tissues and organ Lymphatic system functions o Transports escaped fluids from the cardiovascular system back to the blood- vessels o Plays essential roles in body defenses and resistance to disease- tissues and organs Lymphatic vessels: o Lymph consists of excess tissue fluid and plasma proteins carried by lymphatic vessels o If fluids are not picked up edema occurs as fluid accumulates ...

Choose from 500 different sets of chapter 12 lymphatic system flashcards on Quizlet. chapter 12 lymphatic system Flashcards and Study Sets ... lymphatic system functions complex drainage system--interstitial fluid carried through, empties into veins and becomes part of blood plasma transports lipids and lipid-soluble vitamins (A,D,E,K) from digestive tract to blood-- lymphatic system slows their entry into blood and allows even dispersion throughout body Chapter 12: Lymphatic System Flashcards | Quizlet The lymphatic system. A body system consisting of lymph, lymphatic vessels, and lymphatic tissue and organs. The lymphatic system helps return intestinal fluid to the blood, transports the products of fat digestion from the digestive system to the blood, and assists in body defenses. Lymphatic System - Chapter 12: The Cardiovascular System ... Lymphatic System: Not all blood plasma that leaks out of the capillaries to nurture body tissues is returned to the blood on the venule side of the capillary bed. In order to maintain the blood volume, however, that lost fluid must be returned somehow. One primary function of the lymphatic system is to return that fluid to the blood.

Lymphatic System (pages 398-431) Study Flashcards On Chapter 12: The Lymphatic System at Cram.com. Quickly memorize the terms, ... Chapter 12: The Lymphatic System Flashcards - Cram.com The lymphatic system, for most people, is associated with the immune system to such a degree that the two systems are virtually indistinguishable. The lymphatic system is the system of vessels, cells, and organs that carries excess fluids to the bloodstream and filters pathogens from the blood. The swelling of lymph nodes during an infection and the transport of lymphocytes via the lymphatic vessels are but two examples of the many connections between these critical organ systems.

21.1 Anatomy of the Lymphatic and Immune Systems

10. Name the various types of lymphatic cells and discuss their basic functions

11. Explain the difference between red and white pulp of the spleen

12. Define MALT and name the organs apart of MALT

Learning Objectives: Chapter 21: The Immune System: Innate and Adaptive Body Defenses
