#### TEACHING ENGLISH AS A SECOND LANGUAGE, Second Edition Penguin

The untold story of the root cause of America's education crisis--and the seemingly endless cycle of multigenerational poverty. It was only after years within the education reform movement that Natalie Wexler stumbled across a hidden explanation for our country's frustrating lack of progress when it comes to providing every child with a quality education. The problem wasn't one of the usual scapegoats: lazy teachers, shoddy facilities, lack of accountability. It was something no one was talking about: the elementary school curriculum's intense focus on decontextualized reading comprehension "skills" at the expense of actual knowledge. In the tradition of Dale Russakoff's *The Prize* and Dana Goldstein's *The Teacher Wars*, Wexler brings together history, research, and compelling characters to pull back the curtain on this fundamental flaw in our education system--

one that fellow reformers, journalists, and policymakers have long overlooked, and of which the general public, including many parents, remains unaware. But *The Knowledge Gap* isn't just a story of what schools have gotten so wrong--it also follows innovative educators who are in the process of shedding their deeply ingrained habits, and describes the rewards that have come along: students who are not only excited to learn but are also acquiring the knowledge and vocabulary that will enable them to succeed. If we truly want to fix our education system and unlock the potential of our neediest children, we have no choice but to pay attention.

*A Guide for Teaching Children (Tesl or Tefl)* Tesol Press

This guide examines the concepts that most often confound ESL students, whose confusion can generally be reduced to one very basic question: Why does English work that way? Focusing on the grammar of conversational speech, the book goes beyond simple description of the parts of speech, tenses and modes, and other topics of instruction to consider the cultural differences in language use (for native speakers of Japanese, for instance, the painting may be on the wall—but the wall is also on the painting) and even the neuroscience of our speech patterns. With 36

illustrations, an annotated bibliography and list of online resources, a glossary, and end-of-chapter exercises, this book equips instructors and advanced students to explain everyday language choices that stymie non-native speakers. Instructors considering this book for use in a course may request an examination copy here.

*The Knowledge Gap* Routledge

Written as a guide for people who already have a basic understanding of English and want to improve their ability to speak it the way it is spoken in the United States.

*Theory and Praxis* SAGE

Reflecting the internationalization of the field of second language writing, this book focuses on political aspects and pedagogical issues of writing instruction and testing in a global context. High-stakes assessment impacts the lives of second language (L2) writers and their teachers around the world, be it the College English Test in China, Common Core-aligned assessments in the U.S., English proficiency tests in Poland, or the material conditions (such as access to technology, training, and other resources) affecting a classroom. With contributions from authors working in

ten different countries in a variety of institutional contexts, the chapters examine the uses and abuses of various writing-related assessments, and the policies that determine their form and use. Representing a diverse range of contexts, methods, and disciplines, the authors jointly call for more equitable testing systems that consider the socioeconomic, psychometric, affective, institutional, and needs of all students who strive to gain access to education and employment opportunities related to English language proficiency.

This engaging volume on English as an Additional Language (EAL), argues persuasively for the importance of critical participatory pedagogies that embrace multilingualism and multimodality in the field of TESOL. It highlights the role of the TESOL profession in teaching for social justice and advocacy and explores how critical participatory pedagogies translate into English language teaching and teacher education around the world. Bringing together diverse scholars in the field and practicing English language teachers, editors Polina Vinogradova and Joan Kang Shin present 10 thematically organized units that demonstrate that language teaching pedagogy must be embedded in the larger sociocultural contexts of teaching and learning to be successful. Each unit covers one pedagogical approach and includes three case studies to illustrate how English language teachers across the world implement these approaches in their classrooms. The chapters are supplemented by discussion questions and a range of practical sources for further exploration. Since it was first established in the 1970's the Applied Linguistics and Language Study series has become a major force in the study of practical problems in human communication and language education. Drawing extensively on empirical research and theoretical work in linguistics, sociology, psychology and education, the series explores key issues in language acquisition and language use. English as a Second Language learners are now a considerable and increasing part of the mainstream of urban schools in English-speaking countries. Beyond the learning of English, this development raises broader questions of language as a medium of education in a multilingual, multicultural environment. Drawing on their experience as researchers and educators in Australia, Canada and England, the authors of English as a Second Language in the Mainstream present an up-to-date account of advances in theory and practice. Their analysis of system-wide provision however, suggests that a truly responsive educational vision is lacking: government policy is

inadequate, educational practices for ESL students are either underdeveloped or poorly coordinated with practices for other students, and the rhetoric of reform fails to engage significantly with issues of teaching and resources. The authors argue towards a more comprehensive vision which can acknowledge the relation between issues concerning ESL students and issues concerning the educational system as a whole, which can coordinate reforms in ESL education with general reforms, which can explicitly and systematically integrate language learning and content learning, and which can build more positively on the multilingual and multicultural nature of modern education for all students.

The Second Edition features: Substantial updates that include new findings on interactional practices Reconceptualized, reorganized, and revised content for greater accuracy, clarity, and readability Expanded key concepts glossary at the end of each chapter New tasks with more transcripts of actual talk New authors' stories The book is geared towards current and prospective second or foreign language teachers, material developers, and other language professionals, and assumes neither background knowledge of conversation analysis nor its connection to second language teaching.
