Kathy Sullivan wanted to go everywhere. She loved blueprints and maps. She loved languages and the ocean. She didn't like the question, "What do you want to be when you grow up?" studying science. That's what she liked and that's what she decided to do with her life. She followed her heart and eventually became a NASA astronaut and the first woman to walk in space. Kathy wanted to see the whole world and so she did: from space! Backmatter includes further information about Dr. Sullivan and her career, as well as other famous firsts made by women astronauts.

Eyes That Speak to the Stars Sourcebooks, Inc.

ONGLISTED FOR THE 2022 NATIONAL BOOK AWARD FOR FICTION "An endlessly inventive and moving collection from a thrilling and capacious young talent." —Jess Walter, author of *Beautiful Ruins*. A luminous new collection of stories from a young writer who "has brought his culture's rich history, mythology, and lyricism to American letters." —Sandra Cisneros Pen/Hemingway finalist Jamil Jan Kochai breathes life into his contemporary Afghan characters, moving between modern-day Afghanistan and the Afghan diaspora in America. In these arresting stories verging on both comedy and tragedy, often starring young characters whose bravado is matched by their tenderness, Kochai once again captures "a singular, resonant voice, an American teenager raised by Old World Afghan storytellers."\* In "Playing Metal Gear Solid V: The Phantom Pain," a young man's

video game experience turns into a surreal exploration on his own father's memories of war and occupation. Set in Kabul, "Return to Sender" follows two married doctors driven by guilt to leave the US and care for their fellow Afghans, even when their own son disappears. A college student in the US in "Hungry Ricky Daddy" starves himself in protest of Israeli violence against Palestine. And in the title story, "The Haunting of Hajji Hotak," we learn the story of a man codenamed Hajji, from the perspective of a government surveillance worker, who becomes entrenched in the immigrant family's life. *The Haunting of Hajji Hotak and Other Stories* is a moving exploration of characters grappling with the ghosts of war and displacement—and one that speaks to the immediate political landscape we reckon with today. \*The New York Times Book Review

A true story from one of the Women of NASA! Margaret Hamilton loved numbers as a young girl. She knew how many miles it was to the moon (and how many back). She loved studying algebra and geometry and calculus and using math to solve problems in the outside world. Soon math led her to MIT and then to helping NASA put a man on the moon! She handwrote code that would allow the spacecraft's computer to solve any problems it might encounter. Apollo 8. Apollo 9. Apollo 10. Apollo 11. Without her code, none of those missions could have been completed. Dean Robbins and Lucy Knisley deliver a lovely portrayal of a pioneer in her field who never stopped reaching for the stars.
