 The National Electrical Code (NEC), or NFPA 70, is a regionally adoptable standard for the safe installation of electrical wiring and equipment in the United States. It is part of the National Fire Code series published by the National Fire Protection Association (NFPA), a private trade association. Despite the use of the term "national", it is not a federal law.
 National Electrical Code - Wikipedia
 Most local residential electrical codes are based on the NEC—the National Electrical Code—a model code that provides guidelines on which local communities can model their own residential codes. Among other wiring installation details, the electrical code specifies how electrical outlets should be spaced and which types of outlets to use in general living areas, in bathrooms, in kitchens ...
