An enchanting and captivating novel about how our untold stories haunt us — and the stories we tell ourselves in order to survive. After her family suffers a tragedy, nine-year-old Alice Hart is forced to leave her idyllic seaside home. She is taken in by her grandmother, June, a flower farmer who raises Alice on the language of Australian native flowers, a way to say the things that are too hard to speak. Under the watchful eye of June and the women who run the farm, Alice settles, but grows up increasingly frustrated by how little she knows of her family's story. In her early twenties, Alice's life is thrown into upheaval again when she suffers devastating betrayal and loss. Desperate to outrun grief, Alice flees to the dramatically beautiful central Australian

desert. In this otherworldly landscape Alice thinks she has found solace, until she meets a charismatic and ultimately dangerous man. Spanning two decades, set between sugar cane fields by the sea, a native Australian flower farm, and a celestial crater in the central desert, *The Lost Flowers of Alice Hart* follows Alice's unforgettable journey, as she learns that the most powerful story she will ever possess is her own.

Justice Hall House of Anansi

A motley crew of saboteurs wreaks havoc on the corporations destroying America's Western wilderness in this "wildly funny, infinitely wise" classic (*The Houston Chronicle*). When George Washington Hayduke III returns home from war in the jungles of Southeast Asia, he finds the unspoiled West he

once knew has been transformed. The pristine lands and waterways are being strip mined, dammed up, and paved over by greedy government hacks and their corrupt corporate coconspirators. And the manic, beer-guzzling, rabidly antisocial ex-Green Beret isn't just getting mad. Hayduke plans to get even. Together with a radical feminist from the Bronx; a wealthy, billboard-torching libertarian MD; and a disgraced Mormon polygamist, Hayduke's ready to stick it to the Man in the most creative ways imaginable. By the time they're done, there won't be a bridge left standing, a dam unblown, or a bulldozer unmolested from Arizona to Utah. Edward Abbey's most popular novel, *The Monkey Wrench Gang* is an outrageous romp with ultra-serious undertones that is as relevant

today as it was in the early days of the environmental movement. The author who Larry McMurtry (Lonesome Dove) once dubbed “The Thoreau of the American West” has written a true comedic classic with brains, heart, and soul that more than justifies the call from the Los Angeles Times Book Review that we should all “praise the earth for Edward Abbey!” “Mixes comedy and chaos with enough chase sequences to leave you hungering for more.”—The San Francisco Chronicle

 Filipino Americans have a long and rich history with and within the United States, and they are currently the second largest Asian group in the country. However, very little is known about how their historical and

contemporary relationship with America may shape their psychological experiences. The most insidious psychological consequence of their historical and contemporary experiences is colonial mentality or internalized oppression. Some common manifestations of this phenomenon are described below: • Skin-whitening products are used often by Filipinos in the Philippines to make their skins lighter. Skin whitening clinics and businesses are popular in the Philippines as well. The “beautiful” people such as actors and other celebrities endorse these skin-whitening procedures. Children are told to stay away from the sun so they do not get “too dark.” Many Filipinos also regard anything “imported” to be more special than anything “local”

or made in the Philippines. • In the United States, many Filipino Americans make fun of "fresh-off-the-boats" (FOBs) or those who speak English with Filipino accents. Many Filipino Americans try to dilute their "Filipino-ness" by saying that they are mixed with some other races. Also, many Filipino Americans regard Filipinos in the Philippines, and pretty much everything about the Philippines, to be of "lower class" and those of the "third world." The historical and contemporary reasons for why Filipino -/ Americans display these attitudes, beliefs, and behaviors - often referred to as colonial mentality - are explored in *Brown Skin, White Minds*. This book is a peer-reviewed publication that integrates knowledge from multiple scholarly and scientific disciplines to

identify the past and current catalysts for such self-denigrating attitudes and behaviors. It takes the reader from indigenous Tao culture, Spanish and American colonialism, colonial mentality or internalized oppression along with its implications on Kapwa, identity, and mental health, to decolonization in the clinical, community, and research settings. This book is intended for the entire community - teachers, researchers, students, and service providers interested in or who are working with Filipinos and Filipino Americans, or those who are interested in the psychological consequences of colonialism and oppression. This book may serve as a tool for remembering the past and as a tool for awakening to address the present.

A classic of Modern Persian literature, Charand-o Parand (*Stuff and Nonsense*) is a work familiar to every literate Iranian. Originally a series of newspaper columns written by scholar and satirist Ali-Akbar Dehkhoda, the pieces poke fun at mullahs, the shah, and the old religious and political order during the Constitutional Revolution in Iran

(1906–11). The essays were the Daily Show of their era. The columns were heatedly debated in the Iranian parliament, and the newspaper was shut down on several occasions for its criticism of the religious establishment. Translated by two distinguished scholars of Persian language and history, this volume makes Dehkhoda's entertaining political observations available to English readers for the first time.

A Room of One's Own IAP

#1 NEW YORK TIMES BESTSELLER • A bold work from the author of *The Black Swan* that challenges many of our long-held beliefs about risk and reward,

politics and religion, finance and personal responsibility. In his most provocative and practical book yet, one of the foremost thinkers of our time redefines what it means to understand the world, succeed in a profession, contribute to a fair and just society, detect nonsense, and influence others. Citing examples ranging from Hammurabi to Seneca, Antaeus the Giant to Donald Trump, Nassim Nicholas Taleb shows how the willingness to accept one's own risks is an essential attribute of heroes, saints, and flourishing people in all walks of life. As always both accessible and iconoclastic, Taleb challenges long-held beliefs about the values of those who spearhead military interventions, make financial investments, and propagate religious

faiths. Among his insights:

- For social justice, focus on symmetry and risk sharing. You cannot make profits and transfer the risks to others, as bankers and large corporations do. You cannot get rich without owning your own risk and paying for your own losses. Forcing skin in the game corrects this asymmetry better than thousands of laws and regulations.
- Ethical rules aren't universal. You're part of a group larger than you, but it's still smaller than humanity in general.
- Minorities, not majorities, run the world. The world is not run by consensus but by stubborn minorities imposing their tastes and ethics on others.
- You can be an intellectual yet still be an idiot. "Educated philistines" have been wrong on everything from Stalinism to Iraq to

low-carb diets. • Beware of complicated solutions (that someone was paid to find). A simple barbell can build muscle better than expensive new machines. • True religion is commitment, not just faith. How much you believe in something is manifested only by what you're willing to risk for it. The phrase "skin in the game" is one we have often heard but rarely stopped to truly dissect. It is the backbone of risk management, but it's also an astonishingly rich worldview that, as Taleb shows in this book, applies to all aspects of our lives. As Taleb says, "The symmetry of skin in the game is a simple rule that's necessary for fairness and justice, and the ultimate BS-buster," and "Never trust anyone who doesn't have skin in the game. Without it, fools and crooks

will benefit, and their mistakes will never come back to haunt them."

Doing It Riverhead Books

On the advice of a five-dollar psychic, Tina Martin, a zany, overworked mother of two, quits her high-powered job and moves her family to Shanghai. Tina yearns for this new setting to bring her the zen-like inner peace she's always heard about on infomercials. Instead, she becomes a totally exasperated fish out of water, doing wacky things like stealing the shoes of a shifty delivery man, spraying local women with a bidet hose, and contemplating the murder of her new pet cricket. It takes the friendship of an elderly tai chi instructor, a hot Mandarin tutor, and several mah-jongg-tile-slinging expats to bring Tina closer to a culture she doesn't

understand, the dream job she never knew existed, and the self she has always sought. *Fish Heads and Duck Skin* will resonate with anyone who has ever wondered who they are, why they were put here, and how they ever lived before eating pan-fried pork buns. *The Monkey Wrench Gang* Little, Brown A leading advocate for social justice excavates the history of forced migration in the twelve American towns she's called home, revealing how White supremacy has fundamentally shaped the nation. "At a time when many would rather ban or bury the truth, Ali-Khan bravely faces it in this bracing and necessary book."—Ayad Akhtar, Pulitzer Prize-winning author of *Homeland Elegies* Sofia Ali-Khan's parents emigrated from Pakistan to America,

believing it would be a good country. With a nerdy interest in American folk history and a devotion to the rule of law, Ali-Khan would pursue a career in social justice, serving some of America's most vulnerable communities. By the time she had children of her own—having lived, worked, and worshipped in twelve different towns across the nation—Ali-Khan felt deeply American, maybe even a little extra American for having seen so much of the country. But in the wake of 9/11, and on the cusp of the 2016 election, Ali-Khan's dream of a good life felt under constant threat. As the vitriolic attacks on Islam and Muslims intensified, she wondered if the American dream had ever applied to families like her own, and if she had gravely misunderstood her home. In *A Good Country*, Ali-Khan

revisits the color lines in each of her twelve towns, unearthing the half-buried histories of forced migration that still shape every state, town, and reservation in America today. From the surprising origins of America's Chinatowns, the expulsion of Maroon and Seminole people during the conquest of Florida, to Virginia's stake in breeding humans for sale, Ali-Khan reveals how America's settler colonial origins have defined the law and landscape to maintain a White America. She braids this historical exploration with her own story, providing an intimate perspective on the modern racialization of American Muslims and why she chose to leave the United States. Equal parts memoir, history, and current events, *A Good Country* presents a vital portrait of our nation, its people,

and the pathway to a better future.

A perfect and irresistible idea: A cookbook filled with delicious, healthful recipes created for everyone on a tight budget. While studying food policy as a master's candidate at NYU, Leanne

Brown asked a simple yet critical question: How well can a person eat on the \$4 a day given by SNAP, the U.S. government's Supplemental Nutrition Assistance Program informally known as food stamps? The answer is surprisingly well: Broiled Tilapia with Lime, Spicy Pulled Pork, Green Chile and Cheddar Quesadillas, Vegetable Jambalaya, Beet and Chickpea Salad—even desserts like Coconut Chocolate Cookies and Peach Coffee Cake. In addition to creating nutritious recipes that maximize every ingredient and use economical cooking methods, Ms. Brown gives tips on shopping; on creating pantry basics; on mastering certain staples—pizza dough, flour tortillas—and saucy extras that make everything taste better, like spice oil and tzatziki; and how to make

fundamentally smart, healthful food choices. The idea for Good and Cheap is already proving itself. The author launched a Kickstarter campaign to self-publish and fund the buy one/give one model. Hundreds of thousands of viewers watched her video and donated \$145,000, and national media are paying attention. Even high-profile chefs and food writers have taken note—like Mark Bittman, who retweeted the link to the campaign; Francis Lam, who called it “Terrific!”; and Michael Pollan, who cited it as a “cool kickstarter.” In the same way that TOMS turned inexpensive, stylish shoes into a larger do-good movement, Good and Cheap is poised to become a cookbook that every food lover with a conscience will embrace.

This novel follows the 8 protagonists of series 3 and the forthcoming series 4 over the course of the college summer break. Brand new storylines, that don't

feature in the series, or the upcoming film. Effy, Freddie, JJ, Cook, Naomi, Pandora, Thomas and Katie are all dealing with the aftermath of the events at the end of series 3. Effy has fled to Italy with her mum, where she tries to put her feelings for Freddie, and the guilt she feels for stealing him from Katie out of her mind. The perfect distraction comes in the form of sophisticated older man, Aldo... Naomi and Emily are struggling with spending time apart when Em goes to France with her parents and battles with her stubborn twin sister, Katie. Back in Bristol, Naomi pines for Emily while wondering about her future education. Thomas and Pandora are sweetly in love, and finding it difficult to consummate their feelings for each other. Freddy and Cook are

engaged in a vigorous game of sexual one-upmanship with a frustrated JJ as referee... By the end of the summer, the gang will have resolved some issues and brought up some more, but always in the raw, uncompromising, contradictory and authentic narrative style that makes the series so popular and compelling.

confused by these ideas, and do you wonder how they have managed so quickly to challenge the very logic of Western society? In this probing and intrepid volume, Helen Pluckrose and James Lindsay document the evolution of the dogma that informs these ideas, from its coarse origins in French postmodernism to its refinement within activist academic fields. Today this dogma is recognizable as much by its effects, such as cancel culture and social-media dogpiles, as by its tenets, which are all too often embraced as axiomatic in mainstream media: knowledge is a social construct; science and reason are tools of oppression; all human interactions are sites of oppressive power play; and language is dangerous. As Pluckrose and Lindsay

warn, the unchecked proliferation of these anti-Enlightenment beliefs present a threat not only to liberal democracy but also to modernity itself. While acknowledging the need to challenge the complacency of those who think a just society has been fully achieved, Pluckrose and Lindsay break down how this often-radical activist scholarship does far more harm than good, not least to those marginalized communities it claims to champion. They also detail its alarmingly inconsistent and illiberal ethics. Only through a proper understanding of the evolution of these ideas, they conclude, can those who value science, reason, and consistently liberal ethics successfully challenge this harmful and authoritarian orthodoxy—in the academy, in culture, and beyond.
